

# What is Behind the Political-Media Hype Around the so-called Pandemic Covid-19?

The real implications that are never discussed on almost all media outlets

By G. M. AKUÉ

08/14/2021

Our potentially wonderful world has been plunged for some time now into a terrible deceptive muddle which, in reality, is but a logical consequence of the myriad of actions undertaken by the pretentious Evil Oligarchy at the helm of our world civilization's affairs on this anti-God/Christ route long walked on. This is an undeniable fact for any adequately enlightened thinking mind.

On purpose, this paper aims at clarifying the fog around the conspiracy behind the political-media smoke screen projected like a virus, the Covid-19-Coronavirus, highly dangerous that would threaten the whole planet. Moreover, in the same conspiratorial dynamic, this "pandemic" arbitrarily proclaimed on no basis of logical and scientific medical elements has been very quickly transformed into the only cause of all the diseases and deaths observed for some years within all the nations of the world.

Therefore, for the sake of truth, the following development will bring elements that will make things much clearer for those who will read it with interest.

## **The Photon Belt & Its Effects**

The Photon Belt is a continuous light charge, pure Photons of Light that continuously come from the center of the Milky Way Galaxy.

The central sun of the Pleiades Constellation in which our solar system, and therefore our Terra, is normally found is called Alcyone. Suns closer to Alcyone, that thus have a smaller orbit around Alcyone, are in the Photon Belt more often and as a result are much more highly evolved than those further away. Earth is pretty far away.

It takes Earth about 26,000 years to journey around Alcyone. The planet goes through these 26,000 year cycles as a period of school, so to speak. If the planet and her students have done well, a graduation occurs, if not the school repeats. When a

humanity graduate from the Earth school, it normally is placed on a planet that is a higher grade in school.

There are 2 semesters in this period, since our solar system is in the belt twice in this time period. Usually the changes during the semester break are not as great as the end of the period. We are in the end of the period, hence the end times, and more major changes occur. In fact Earth did not do particularly well this last 26,000 years and would in fact go back a grade, so poor was the progress. Had our space friends not intervened right after World War II, the planet would have rolled over and very little life would have survived. Earth would need reseeded with life, including most likely new bodies for our evolutionary journey. This situation is pretty much the fault of our extremely poor teachers, those that fell from heaven and those that took the planet through force and enslaved it.

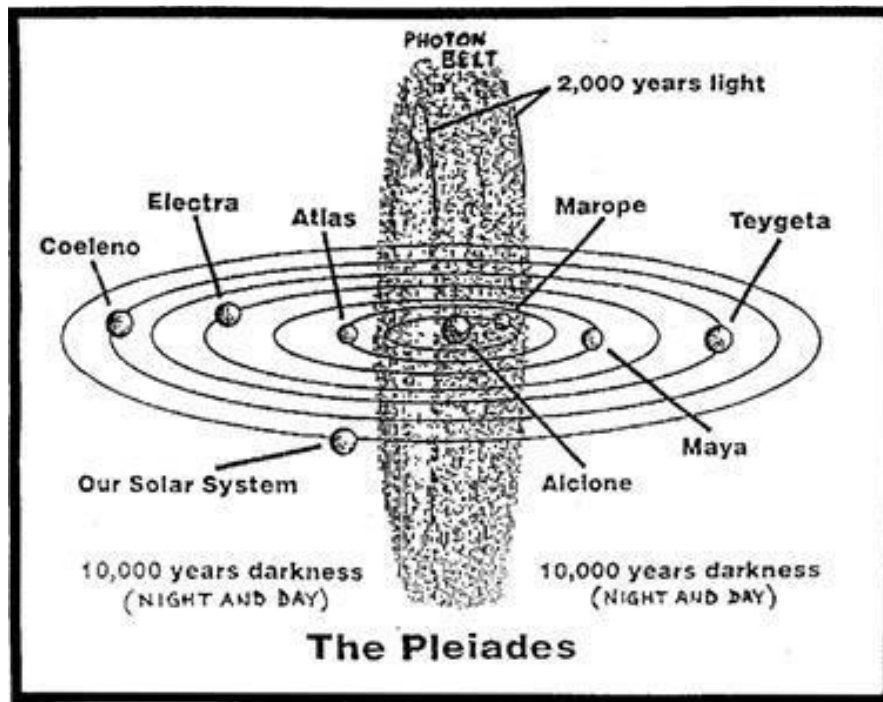

Now out of every 13,000 years on Earth, 2000 are spent in this which is called the "Photon Belt", where special energies are directed at Earth that cause much change. Much of the global warming is the result of these activities. The 11,000 years not being in the Photon Belt are often referred to as the "long dark night". The 2000 years spent in it are the years spent in the light. Many planets elsewhere in the Universe experience a similar happening on timetables particular to them. If the population of our planet makes good healthy progress during the long dark night, then the time in the Photon Belt greatly enhances our humanity. If our planet has sunk further into disharmony, then it gets a cleaning. This cleaning last occurred from around 11,000 BC to 9000 BC, and is the source of the many stories of destruction that abound in the Bible and the other Holy Books and traditions of Earth.

A planet, when in the Photon Belt will either be destroyed or renewed. If renewal occurs the planet will ascend higher into the Holy Realms. In the case of Earth, she has never before completed the ascension. All has gone down the tubes to various degrees. Because of other galactic and universal issues, and our prayers that have been heard, it was decided to not allow the destruction in these times that would normally occur and instead give humanity Divine Grace and intercede in our behalf. This process started, the plans began to be formed even before the last time you were in the Photon Belt. Destruction happened that time.

The Bible proclaiming that God would never again destroy the world is true and is happening at this time. However let's understand, God, whatever perception that Earth humans have created around IT, does not ever destroy. The workings of the Photon Belt is natural. It is man that determines the destruction and brings it upon himself by his behavior as a group. The reason this destruction will not occur this time is because of help from The Galactic Federation. Earth undergo and will undergo earthquakes and similar activities, but it is and will be controlled as much as possible

by the latter, which will make it an easier experience. The difference this time is that the earthquakes will rebuild the Earth rather than destroy it.

It must be noted that the Khazars, the element behind the Globalist World Cabbala, know about the Photon Belt times, and knew long ago that God of Light, that is the Universal Forces of Light, would be here in these important end times, and they purposely deliberately changed the interpretation of the gospels to suit their needs.

Thirty years ago in 1992, the year our planet entered the Photon Belt, the Evil Elite which claims possession and domination of our world, had undertaken an action to ignite the radioactive belt encircling our planet. The plan was to launch a device from shuttle via higher orbiting instruments to ignite the radioactive belt encircling our planet. This is in preparation for the upcoming "Photon Belt" entry which loomed ever closer ahead. IF the radioactive belt can be ignited and/or other scientific technologic intervention can be utilized, the entry into the "Photon Belt" can be postponed, giving the Elite great advantage. Several things would be made possible, they thought! Firstly, if the radioactive belt is burned, it is supposed that Space Command will not pass through it to come within Earth atmosphere layers. But they were not the BIGGIE: The Russian Cosmospheres and platforms, which form a ridge in the throat of this most evil faction, were outside that 210 mile orbit from whence they plan to launch the igniting device and it would preclude their entry until the belt burns off pretty much.

This done, there will be total chaos on Earth and the Elite discerned that they could simply give those instructions already well planned and definitely entrap Earth population. This, as explained earlier, because the entry into the Photon Belt that was supposed to bring destruction upon the civilization, will no longer do so as there is Divine assistance present in our solar system to see to it. Therefore, to prevent the preservation and reclaiming of our Mother Planet by humanity assisted by the Forces of Light, this attempt has been desperately hatched in the hope of thwarting the Divine Plan and destroying all humanity and certainly along with the Earth in yet another anti-God war.

### Reasons For A Mandatory Wearing of Face Masks

Following the failure of the above mentioned initiative, this group has not ceased to develop satanic plan after satanic plan to achieve exactly what has always been the dream of the Forces of Darkness, namely to prevent the redemption of humanity. As time goes by and from failure to failure, the intensity of the photonic light has not ceased to increase as our solar system is now fully and permanently bathed in pure photonic energy and this will be the case for another 2000 years, therefore approximately until the year 4000.

In order to carry out this project of total domination or eventual destruction, it is necessary to keep the people asleep and unable to understand what is ongoing until all goals are achieved. However, with the entry into the Photon Belt and all the awakening of consciousness that this inevitably brings about, and especially with the help of the Universal Forces of Light, it is game over for any group trying to interfere with the Divine Plan.

The continued presence in this pure Light is impacting every life particle in the Earth system. Our atmosphere is vibrating more and more in higher frequencies cleansing the planetary egregore that has long been a prison to the collective human consciousness keeping it in low frequencies that sow the seeds to the anti-God.

One thing that comes into play here, and of which many do not report, is that the air we breathe daily is increasingly becoming a healing and awakening energy in contrast to what it had totally become for a very long time. **This is where the so-called facemask comes in.** Nevertheless, before the facemask would be imposed, an imaginary virus had to be created and a lot of media hype had to be created around it to instill fear and panic so that pre-prepared solutions could be inoculated into the world's population. This is the way of conspiracy and these forces have always done it this way -- **Problem-Reaction-Solution.**

The idea is to prevent people from fully breathing in this pure photonic energy in the hope of slowing or lessening the impact and especially by contaminating these masks with substances they believe will cause damage to human DNA. This is done in the

hope of making them unfit to receive and integrate the high Divine energy. Hence, in some countries they are even trying to force the population to wear only those approved by the government.

## The Multiple Vaccines

When this latest conspiracy broke out, the world saw, for the first time in history, a whole series of vaccines appearing in a record time. This in itself is an indication that something exceptionally abnormal is happening before our eyes. The first certainty is that some of these vaccines were already available for use as a solution after the problem was created in the first place and the reaction that resulted. Others have been proposed as such but are but placebo to calm the fears of the populations whose countries will understand and accept to play the game.

The fact of the matter is that an extremely dangerous power faction has control of information through the television and press media, and through this easily manipulates public opinion and behavior. Therefore, by the mere fact of conducting aggressive misleading propaganda through their controlled media, they can very easily influence/determine the choices and emotional patterns of the popular masses and the direction of socio-political events.

Thus the strategy will have been to propose a placebo vaccine to more easily appease people, to put them in confidence, since it is well known that fear and panic alone weaken the human immune system. These factors alone have and are making people more vulnerable to diseases that were already present in their bodies and around them.

The explanation behind the smoke screen that is all this conspiratorial uproar is simple: this pure high frequency photonic energy has the function of cleansing the human entity and the entire Earth of its imbalanced patterns, thoughts-feelings-perceptions, to allow everyone to see clearly before him/her the direction to follow so that they can definitely make the choice to embrace the Light of the Cosmic Christ Consciousness. However, it is a process that may cause more or less inconvenience in relation to the level reached by each individual in his incarnational journey (**karmas must be healed up to a certain proportion before the rest can be forgiven, that is the Divine Dispensation**). In addition, some may not be able to bear it and in the process lose their lives, while others will manage it with much more difficulty and others much less, etc. etc.

**THIS IS WHAT THEY ARE PASSING OFF AS INFECTIONS TO THE SO-CALLED COVID-19.**

Something we need to know about these so-called Covid-19 tests is that most of the people conducting them do not know what they are doing or what is that they are looking for. It is just like medical prescriptions where the doctors know nothing

about what is contained in these said drugs, except for their composition which is listed in the leaflet inside, but the veracity of which cannot even be checked and confirmed. Even those who can claim that they know what they are looking for in order to conclude whether or not an individual has tested positive to the illness do not know the real meaning of what they are observing. Only the conspirators know what they are monitoring to see the impact of the Photon Light on the human body.

This is precisely in order to follow the evolution of the transformation at the DNA level that will allow them to "track" all of this through the constant improvement of their vaccine weapon. Hence the second and third shoots and soon, if we allow them, continuous periodic shoots. We all see very well that despite the fact that the various vaccines on the market are proclaimed aimed to fight Covid-19, there are governments that have started to reject the validity of these other vaccines that obviously do not meet their needs since for them it is a matter of killing rather than healing, weakening rather than strengthening.

In any case, one thing is certain. All attempts against The Divine Plan of preservation and evolution are doomed to failure, except that the human being must play his or her conscious part to bring about the rapid relieve of the burden.

### **Failure of The One World Government Agenda**

According to the world government's Global Plan 2000 agenda, the year 2000, which the Earth passed about 21 years ago, was supposed to see the culmination of the completion of the global satanic control of said world elite. But since the entry into the Photon Belt in 1992, and even before that, the many things that have been attempted to achieve just this ultimate evil goal have consistently failed. And the deadline set for the year 2000 has not been met to this day, not for lack of trying everything.

AIDS and other viral and retroviral infections that were meant to accelerate the depopulation of Earth have totally missed their intended goals.

The war in Syria specifically, and indeed all those initiated in the Middle East, which was supposed to ignite the world in a global nuclear war with the same goal of depopulation, eliminating 2/3 of the planetary population, has not only been delayed but totally failed.

And there is currently underway, the last desperate attempt named Covid-19-Coronavirus that is itself watching over the definitive and irremediable fall of the Globalist Cabbala.

All the signs are there in front of humanity, this is the end of darkness on Earth and the world is about to come out of it definitively to give full control to the Divine Light of Love, Balance and Harmony. This is it.
