## Table of Contents

|  |    |
|--|----|
| Preliminary Note .....   | 9  |
| Foreword .....   | 11 |
| Prelude .....  | 12 |
| Chapter 1: The State Of The World .....  | 16 |
| Chapter 2: The Underlying Global System.....   | 19 |
| The State Is Absolute.....   | 22 |
| Overview On The Current Widespread Political System .....  | 24 |
| The Political Parties .....  | 24 |
| The Commonly Ran Political Regimes .....   | 25 |
| Chapter 3: The Alternative: Recognizing the Oneness of ALL, Serving Life Alone.....              | 27 |
| Chapter 4: <i>FELETE-FELISHI NE DUKEKELE SUTE-ATON</i><br>Or The Lighted Divine Popularism ..... | 31 |
| The State Political Organization .....   | 33 |
| The Direct and Representative Regime .....   | 33 |
| The Territorial Space .....  | 34 |
| The Constitution Of The Federation States .....  | 34 |
| The Life Community .....   | 35 |
| The Elective Mandates .....  | 36 |
| The Federate Grand People's College .....  | 37 |
| The Federal Grand College .....  | 37 |
| The Federal Grand People's College .....   | 37 |
| The Federal Grand Senatorial College .....   | 38 |
| The Federal Grand Supreme College .....  | 39 |
| The Administration .....   | 39 |
| Offices, Denominations and Assignments .....   | 39 |
| The Federal State Administration .....   | 42 |
| The Federate State Administration .....  | 43 |
| The Life Community Administration .....  | 43 |
| Interaction With The Executive Administration  |    |
| The Political Operating Mode .....   | 44 |

|   |    |
|---|----|
| <i>The Administration of Justice</i> .....  | 44 |
| <i>The Constitutional or Fundamental Law</i> .....                                  | 47 |
| <i>The Laws of GOD AND CREATION</i> .....   | 48 |
| <i>Additional Constitutional Provisions</i> .....                                   | 58 |
| <i>The Citizen's Initiated Referendum</i> .....                                     | 59 |
| <i>Linguistic Unity and Civilizational Foundation</i> .....                         | 59 |
| <i>The Inalienable Rights of All Peoples</i> .....                                  | 61 |
| <i>Demography And Natural Resources</i> .....                                       | 62 |
| <i>The Demography</i> .....   | 62 |
| <i>The Natural Resources</i> .....  | 65 |
| <i>The Energy</i> .....   | 67 |
| <i>Habitat and Housing</i> .....  | 70 |
| <i>The Volitional Systemic Autarchy or Self-Centered Economic Endogeneity</i> ..... | 72 |
| <i>Money, Banking, Finance and Labor</i> .....                                      | 75 |
| <i>Banking and Money</i> .....  | 75 |
| <i>The Monetary Problem</i> .....   | 75 |
| <i>Omitted History</i> .....  | 76 |
| <i>Gold Fails As Standard</i> .....   | 77 |
| <i>Time and Money</i> .....   | 78 |
| <i>Standard of Value</i> .....  | 79 |
| <i>Function</i> .....   | 80 |
| <i>Finance and Labor</i> .....  | 81 |
| <i>The Finance</i> .....  | 81 |
| <i>External Exchanges</i> .....   | 82 |
| <i>The OITC</i> .....   | 83 |
| <i>The Labor</i> .....  | 84 |
| <i>Wage-Earning and Taxation Slavery</i> .....                                      | 84 |
| <i>The Labor Organization</i> .....   | 86 |
| <i>The Forms of Corporation</i> .....   | 87 |
| <i>The Community Sector</i> .....   | 87 |
| <i>The Public Sector</i> .....  | 88 |
| <i>The Public Maintenance Service</i> .....   | 88 |

|   |     |
|---|-----|
| <i>The Agrarian and Land Reform</i> .....   | 88  |
| <i>Science, Industry and Technology</i> .....                                     | 89  |
| <i>The Science</i> .....  | 89  |
| <i>Technology and Industry</i> .....  | 94  |
| <i>Global Bodily Harmony, Philosophy of Life and Education of Wholeness</i> ..... | 95  |
| <i>The Global Bodily Harmony</i> .....  | 95  |
| <i>The Philosophy of Life</i> .....   | 105 |
| <i>The Education of Wholeness</i> .....   | 112 |
| <i>The Territorial Defense</i> .....  | 114 |
| <i>The Regular Armed Forces</i> .....   | 114 |
| <i>The Paramilitary Civil Defense</i> .....                                       | 115 |
| <i>Light Bearers : Orientation And Stabilization</i> .....                        | 116 |
| <i>A Lighted Leadership Moved By Service Alone</i> .....                          | 117 |
| <i>A Monopolar Political Dynamic</i> .....  | 118 |
| <i>The Sub-Regional Field</i> .....   | 118 |
| <i>The Continental Field</i> .....  | 119 |
| <i>The International Field</i> .....  | 119 |
| <i>The Globalization</i> .....  | 120 |
| <i>Epilog</i> .....   | 122 |

PROPHECIES ARE THAT WHICH HAS BEEN AND REPEATED;

THE "FUTURE" IS FOR "CREATING" THAT WHICH WILL BE.

*As you come to recognize the script and the players within the PLAY and PLAN you will see that naught is but a rerun of that which was wrong and never corrected--repeating of that which should have been corrected. The "FUTURE", therefore, is an open slate for the creation of the script and play. It is the opportunity to utilize wisdom, knowledge and "knowing" that prophecies do not have to be repeated in error of action and perception. May GOD guide your thoughts--for thoughts ARE CREATION!*

*Aton Michael, Christ  
Excerpt from Phoenix Journals*

*All of history, as we now know it, has been revised, rewritten, twisted and tweaked by selfishly motivated men to achieve and maintain control over other men. When one can understand that everything is comprised of "energy" and that even physical matter is "coalesced" energy, and that all energy emanates from God's thought, one can accept the idea that the successful focusing of millions of minds on one expected happening will cause it to happen.*

*If the many prophecies made over thousands of years are accepted, these are the "end times" (the year 2000, the second millennium, specifically). That would put us in the "sorting" period and only a few short years from the finish line. God has said that in the end-times would come the WORD -- to the four corners of the world -- so that each could decide his/her own course toward, or away from, Divinity -- based upon TRUTH.*

*Aton Michael, Christ  
Excerpt from The Phoenix Journals*

*This book is dedicated to Terra-Urantia and those who have chosen and will choose to bring the new Global Civilization of the Golden Age to this world, here below, that which many call paradise on Terra without having a clear idea of what it might entail.*

## PRELIMINARY NOTE

The following is a list of terms in the Ewe/Ewe Language corresponding to the terms used for the various institutions of the Federal State. Since the Ewe language is, to the best of the author's knowledge, the source language of nearly all languages spoken upon Mother Earth--or at least the vast majority of them--it has become of paramount importance that it be placed at the heart of the entire linguistic issue of our present civilization. The goal is to restore our multilingual societies' ability to rediscover their roots and quickly merge into a global human brotherhood.

### Denominations in Ewe/Ewe Language of the Federal State and Federate States Institutions

|                                  |                           |
|----------------------------------|---------------------------|
| <i>The Federal State</i>         | <i>FELEDU SETEDU</i>      |
| Federal Administration           | FELEDU SETEDUDƆFE         |
| Federal Prime Administrator      | FELEDU SETEDUFIALA        |
| Federal Vice-Prime Administrator | FELEDU SETEDUKOFIALA      |

## FOREWORD

The idea of bringing forth and releasing the present treatise, one which I have chosen to intitle The Blue Book of Terra-Urantia,<sup>1</sup> came to mind after a relatively long journey of research studies and experiences encompassing all facets of Mankind Civilization and a number of observations derived from the political, social, economic and cultural sphere upon Earth that have led to uplifting conclusions.

And all of this was made possible only through the Higher Guidance of the Inner Divine Presence and the Forces of Light in Service of Creator-Creation.

To me, it had become clear that the society established by Man had completely lost all value and required a new orientation beyond all resolution proposals that might seem logical to many, but all of which would inevitably lead to a dead end.

This is an initiating input to the matrix of a new system serving as a foundation for the builders of a new Terra-Urantia where all is reformulated in accordance with Nature and Universal [Cosmic] Laws that preserve and sustain our Terra Abode, and all Life upon and within Her.

You will, therefore, see throughout my unfolding of key elements, a path that sometimes seems familiar, but for the most part confusing as I introduce new concepts for a new Global Civilization.

IN THIS POLITICAL-CIVILIZATIONAL TREATISE, **JE-ESUTE-ATON**  
(**PE-ESUTE-ATON**), WHICH MEANS THE LANDS WHERE  
ONENESS WITH ATON, THE CREATOR FATHER, IS DESIRED  
AND SUSTAINED, IS THE NEW NAME GIVEN TO MOTHER AFRIKA

---

<sup>1</sup> Urantia, Terra Father-Mother

## PRELUDE

*If you do not know where you come from, know where you are headed for.* A very common saying often uttered in circumstances where things seem confused and uncertain in the life of an individual or a whole people. But this raises a major issue that is:

**IS IT REALLY POSSIBLE TO KNOW WHERE ONE IS HEADED FOR WITHOUT KNOWING WHERE ONE COMES FROM?**

Answering this questioning may hold the key to finding a way out of this psychocultural quagmire wherein human race upon Earth finds itself trapped. But it must be obvious to any perceptive person that an appropriate, clear, and unambiguous answer to this query alone will ensure the finding out of the right resolution ; a resolution that can only be conceived by 'enlightened minds,' for the purpose of a worthwhile rectification of the global social order to set nations to right wherever need be. And need is all around present upon the surface of Mother Earth (Urantia) and imperatively felt. This applies first and foremost to the individual, and by extension to the community, of course.

In the current situation of the Peoples upon Earth, long defrauded and cut off from their roots, and especially those of Pe-Esute-Aton, the issue is crucial, even fundamental, to the entire civilizational challenge we face at every level of Life unfolding, both in the material and the philo-spiritual fields. A confused and lost spirit (Mind) would not accomplish anything of value--with few exceptions--in a body (Matter) as beautiful, lovely, and perfect as it could be, and inversely. Go ask a skilled and talented musician to produce beautiful harmonies on a defective instrument, or inversely. It is simply impossible.

**'WHERE ONE COMES FROM'** refers to the PAST whether of an individual, a family, a people, or a race. And **'WHERE ONE IS HEADED FOR'** refers to the FUTURE that is yet to be, and the determination of which is made from this third time segment which is the PRESENT (the Present Moment). The Present, therefore, holds a crucial significance in relation to the Future since it serves as a matrix for the creation of what will be and of the soundness of the 'present moment' depends the FUTURE in the making. **Thus the Present is the Past of the Future and the same Present is the Future of the Past.**

As a logical sequel of what has just been stated, one can ascertain without a shadow of a doubt that Past and Future lie within the Present since just as this Present creates and impacts the Future, the Past created and continues to affect the Present. Our actions, thoughts, beliefs of the moment are, to a certain extent, not to say almost always with regard to the majority of minds on the evolution scale, determined by experiences we have been through in the Past. And these inter-reactions, conditioned

by our Past, with our present environment creates the fabric of happy or unhappy events to come. Now beyond these three (3) spatiotemporal parameters, there is this individual and collective consciousness (the Divine Spirit) that enters into the Life equation, and literally the Master Creator, using its Divine attributes such as free will, sense of judgment and discernment among others, to steer events in one direction rather than the other.

But for this to unfold as intended by God-Nature, in accordance with the Cosmic Order within Creation, it still requires the mind functioning naturally without falsely erected barriers to cause dysfunctions--or, worse still, a quasi-complete brain-dead coma. This assumes that the Past be recognized as such in its integrality and integrity, without any tamperings or omissions, so that the individual and collective Conscious Mind of a People, Race, may have knowledge of same, bringing it under control and proceeding with 'corrections' and 'readjustments' certainly needed to the clearing of certain pitfalls that would confront it in its evolutionary path.

Earth Races, and peoples of **Pe-Esute-Aton**, do not fit into this Natural dynamic and evolving pattern at all, far from it. In fact, it would seem that only the Indigo Race (so-called Black Race) has allowed itself to be pulled down that far. Logically speaking, ask yourselves how, with a Past so deceitful, counterfeited, tortured, and riddled with enormous gray areas deliberately induced by men and women--an essentially external, organized globalist minority harboring the most malicious intents--the children of the Mother Abode, Pe-Esute-Aton, can reasonably be said to have mastery over a Present that, subtly and completely, eludes them for the most part. This Past which is of vital significance for understanding this Present within which everything is unfolding.

The Peoples upon Earth, Hu-mankind in general, can be likened to a traveler following a specific route who, somewhere along the way, is attacked by a gang of hardened, parasitic thugs armed with state-of-the-art weaponry and using advanced Satanic (anti-Christ) means. He then loses consciousness, falls into a comatose condition, and becomes almost completely amnesic--if not, in reality, schizophrenic. Thus unable to say who he is, where he comes from, and thus where he is headed for. Curing this severely ill entity--and this is what we've been reduced to--who populates the continent, and Earth in general, will require restoring his past and, through this act, **HIS CONFIDENCE AND DETERMINATION. THIS WILL INEVITABLY PROPEL HIM TOWARD THE RECLAIMING OF HIS FREEDOM, DRIVEN BY SELF-LOVE AND GROWING WISDOM.**

It goes without saying that when a tree has its roots severed, regardless of the circumstances, it is inevitably doomed to perish, as it is now unable to draw sustenance from the life force of Mother Earth. In this respect, humans are no different from the other realms of life that populate Urantia and the other worlds of Outer

Space. The outcome resulting from the relentless persecution by a certain Western so-called White Elite of Indigo peoples in particular is by no means unique. And it is important to note here that other races have been and continue to be treated in similar manner, contrary to the general perception held by so-called non-Western peoples on this issue. Had the situation been reversed, or had it involved any other group, it would have produced the same devastating effect. Our cultures, our experiences, and our history serve as our guiding principles for moving forth in life, inspiring us to build versions of selves better than before. And when we see that all of this has been reduced to a trickle--and worse, has become a cruel hoax transformed into a subtle mechanism of mind control, maintained with the intent of perpetuating this state of events--one can easily note the level of difficulty our societies have to face.

It is therefore of utmost importance that all sons and daughters of Mother Abode, Pe-Esute-Aton, nourishing dreams of Freedom and Grandeur for the Mother, undertake this enormous, demanding and exciting task of rediscovering **WHO WE ARE AND FROM WHERE WE COME**. A task of deconditioning and stripping away the old, truncated, counterfeited patterns implanted in our minds--patterns that have the effect of automatically programming people to swallow and support all the nonsense orchestrated by THE GLOBALIST ELITE and relayed by its propaganda machine, including the controlled MEDIA. It has gone so far that the victims have, in total unconsciousness, turned into defenders of their persecutors, to the detriment of the interests of their own siblings.

Not only the children of Terra must set out to discover their **True Past** but also be prepared to welcome with detachment whatever it might reveal to them in shades of black and white. This will be our strength and light for the road that lies ahead.

Needless to say that the sooner a **POWERFUL MINORITY** will emerge to form a central catalyst core by and around which we will work toward a genuine and rapid mastery of our destiny, the sooner the number of "awakened" individuals will reach the desired and necessary critical mass to recover, correct and perpetuate the achievements already garnered from our journey and those yet to come. Thus, and only thus, we can be assured that the grim scenarios of shadowy organizations of enslavement and self-sabotage--such as those within which we wallow in indignity on the continent and on a global scale, under the dictates of involutory forces--will become a thing of the past. Then the Peoples of Terra, particularly those of Pe-Esute-Aton, will be walking with heads up high, fully aware of who they are, of their recovered Past, and knowing where they are headed for.

The enlightening road just been outlined, will lead us, as a Civilization, to this Position or State of Higher Human Being where we see emerge a Terra carrying a **True Galactic Human Civilization** anchored in **Divine Wisdom**. This Highest Position of

Divinity incarnate in the Perfection of the Father/Mother Supreme is achieved through the successful completion of challenging yet edifying experiences that test the individual and collective ability to recognize and live in harmony with and within the Laws of Terra-Urantia which are those of **THE BALANCED RHYTHMIC INTERCHANGE OF CREATION**. It is desperately urgent--more than ever--that human species as a whole, for its very survival, and specifically its Esute-Atonla component, turn away from the downward spiral fueled by its social paradigm, with all the imbalances, inconsistencies, and contradictions that have already led mankind to a dead end. Our insistence on continuing in the same direction would amount to nothing less than suicide and pure masochism.

A complete reassessment is undoubtedly necessary and requires not only courage but also advanced knowledge from men and women of the caliber of pioneers who will venture into playground that, for the most part, has never been explored before--or at least not in living memory. This journey will bring major corrections to existing patterns or outright establish new settings for a new stage where the economic, political, social, communal, philo-spiritual, and other spheres will play out a new scenario of a balanced **WHOLE** more in harmony with **LIFE**, in service of which it is supposed to be in the first place.

**IT IS THEREFORE OUR DUTY TO KNOW WHERE WE COME FROM, THE REASON WHY WE ARE HERE UPON THIS HIGH ABODE, TERRA-URANTIA, IN ORDER TO BE IN THE KNOWING OF OUR DESTINATION.**

## THE STATE OF THE WORLD

The norm in current human societies is individualism characterized by competition at all costs and at every turn. Whether in the fields of relations between states, communities or individuals, in the economic, political and social spheres, a dual dichotomous pattern is omnipresent. In every facets of life we train and instill in our progeny this mode of functioning which calls for the existence of a first, a second etc.; of strong and weak ones; of rich and poor ones ; useful and useless ones ; smart ones destined to become graduate intellectuals and fools directed to the so-called degrading manual and other trades.

Within these dynamics of competition there is a pre-established winner-loser antagonist dual, rooted in a mindset of constant rivalry fueled by a devastating individualism, the desire to be noticed, the pursuit of recognition at any cost. Yet it is quite clear that without this accepted perception of a first, there can be no second; that without a strong there can be no weak and so on. It always goes in pairs, one being the counterpart of the other.

We are kept busy and stimulated to struggle like poor, helpless creatures to get rid of our miserable living conditions through means that are intentionally limited to the intellectual and material spheres of reality, whereas it be solely with our powerful, fully functional Inner Divine Spirit at the helm that can one create, act, and manifest or alter the material reality desired--or no longer desired. Large and small churches are put to task, above all, to force-feed peoples with drugs or spiritual garbage, fear, and all manner of erroneous attitudes and beliefs that keep them in the illusion of separation from the Divine Being that they truly are, and consequently, in a state of utter helplessness. So-called traditional spiritualist practices lie at the very heart, if not at the foundation, of evil as well, confirming that the issue originates deep within the misguided, misunderstood, and thus out-of-control collective subconscious.

The way popular political struggles have been waged and managed almost everywhere in Pe-Esute-Aton, with the near-unanimous reliance on religious institutions--which, yet, embody the conspiracy and perpetuation of Evil--is highly revealing to the awakened mind. This Evil that besets humankind has become institutionalized within the structures of the three major so-called monotheistic Religions (Christianity, Islam, and Judaism)--which have ended up engulfing and taken precedence over all others, plunging peoples into despair and disarray, held hostage as they are by their leaders

who have become puppets in the hands of the most malevolent forces operating through a supranational pyramidal structure.

Therefore, our world is certainly not governed by so-called democratic regimes on the one side and autocratic ones on the other and certainly not by the official and unofficial puppets that are constantly paraded before our eyes. Neither in the North, nor in the South, neither in Developed Countries, nor in so-called Developing Countries. We are governed by an Underground Global Dictatorship--Holders of Globalism--who, cautiously, through multinationals, organized anti-Divine Religions (supposedly monotheistic), the monetary-banking system, among others, proceeds by successive stages toward a visible and accepted final structure and/or force onto all of us, at least on the slumbering majority. The remaining minority, rebellious and unbowed, being purely and simply destined to be returned to barbarous slavery or outright taken out.

The critical times hu-mankind is currently experiencing are those of a world that has long been in decline, gradually over millennia, prey to a merciless struggle between Darkness and Light and dispossessed of its creative power through the progressive degradation of collective consciousness and a number of conditions favorable to the Dark Brotherhood acting through incarnate entities that we are.

This is a world that must rise again by reclaiming its Divine Attributes with assistance from CREATOR FATHER/MOTHER and CELESTIAL HOSTS.

But as we know, erecting the New if the old one has not been demolished before is impossible, since the New must take foundation upon the ashes of the old. The only way to save the world and preserve the Human species is to save ourselves by freeing selves from the yoke of ignorance and obscurantism upon which the old one stands. By stopping pretending, burying our heads in the sand.

KNOW THE TRUTH AND IT WILL SET YOU FREE. AND YOU WILL DEFINITELY COME TO KNOW THYSELF.

A Mother is never ever really happy when her offspring are at a total loss. All the warning and distress cries that our Mother Terra is sending seem to fall only on deaf ears of a Humanity become insensitive and numb from drugs and follies of the ego. Peoples and Races are therefore, and will always be, faced with the consequences of deeds, thoughts and words of imbalance and irresponsibility committed over millennia vis-à-vis themselves and the very Being who provides them with shelter and sustenance with so much love and for so long.

Wars breaking out here and there, manufactured from the Headquarters of the Dark Forces, the stubbornness of the "White Elite" in maintaining at all costs the Peoples of Pe-Esute-Aton, and of elsewhere as well, under their dominion and dictates, the

geological and climatic upheavals that are becoming more and more intense, etc.--all contribute to the need for individual and global awareness to bring about a radical awakening of slumbering HUMANITY so that its long-neglected homework may ultimately be assumed.

The reactions and interpretations observed in response to destabilizing situations orchestrated among the Esute-Atonla Indigo Peoples demonstrate that the overwhelming majority of mankind are malleable and subjugated at will. All it takes is for pseudo-revolutions and prefabricated concepts to be waved in our faces, and we buy into them immediately without any questioning, but with such frenzy and blindness that it defies comprehension. And all that comes afterward through more objective and serious alternative sources--intended to alert and enlighten the poor, misinformed, and brainwashed people--is brushed aside without any regard by the very same people who rush to and make the many swallow just anything they are presented with. Yet the history of these last two millennia, at the very least, has been nothing but a series of repetitions of the same attitudes, leading to the same disastrous consequences for the many human civilizations that have spread across the Terra.

**In always sweeping it all under the rug out of apathy and convenience, we end up undoubtedly facing one good day with a tough massive pile of garbage to clean up. Here we are now.**

And when we are aware that everything arises from Energy and that it is the SPIRIT that IS, unlike MATTER (physical)--that is merely the projection of the former--we will agree that all approaches aiming at the resolution of any problematic of this material world must put Spirit (and not Religion) above the manifested (physical) or at the very least concede equal importance to both levels of manifestation, while remaining mindful that Mind takes precedence over all. This has not been the case in our civilizations for far too long.

Pride; Spiritual and Intellectual Laziness; Selfishness; Infertile and Stupid Materialism; Fear; Lack of Vision and Self-Esteem; Apathy. These ended up stripping mankind of his potential as creators and masters of his own life he be, leaving entire Peoples and Communities, at the mercy of powerful, unbalanced manipulators with suicidal tendencies.

We are therefore led to move beyond the stage of dualistic perception of Life if we are to found or re-found a **Civilization of Freedom and Equity in a state of perpetual Balance.**

## THE UNDERLYING GLOBAL SYSTEM

*We must know our enemy or we cannot "change" of one thing in our "reality" because our "perceptions" are INCORRECT!*

Man of the upon-Terra civilization, and the Esute-atonla in particular, must never lose sight of--amidst this big, planet-wide mess, which constitutes a defiance of the natural order of things and a rebellion against Life--the utterly prohibitive and compromising nature of the mechanism that the Occult Internationalist Organization, the masters of the shadowy game of deception, has established in the form of a 'natural' reality originating from that dark underside within the imperfect beings that we are. This is not true; if it were solely a matter of the 'Natural' nature of Hu-mankind, it is clear that we would never have gone this far. On the contrary, the means in use are most ignominious and unnatural, involving exceptionally distorted life forms and action. Cloned duplicates, lookalikes, men and women controlled by microchips and other computer devices implanted in their nervous systems and linked to powerful computers operating via satellites, are in use hidden away from public knowing.

There is a devious and deceitful war that threatens the very existence of civilizations and certain races, with the Indigo race at the forefront, through an absolute and complete takeover of all Nations on Terra, a forced march toward a standardization of lifestyles and worldviews leading to a Satanized and enslaved society according to the views of a handful of individuals rebellious to the Divine Order.

There is no room for compromise with the legal and personified Evil on this Terra. We are on the verge of being utterly and miserably exterminated from the face of this orb without having learned anything.

Basically, the values that the Global System claims to embody--whether from Political, Econo-Financial, Social, Religious/Occult standpoints, or otherwise--are just bill of goods sold to peoples along the primrose path on which our enemy has led and continues to lead mankind.

A phony seeming conflict is maintained within a restrictive mold through a cynical 'Thesis-Antithesis-Synthesis' GAME upon which the entire scheme was constructed from the onset. The triadic concept of Thesis-Antithesis-Synthesis is a political stratagem whose modern use is widespread and lies at the core of the Globalists' tactics for manipulating the masses into swallowing the bitter tasting pills of their evil agenda.

The **HEGELIAN** concept represents the process of transforming in two stages a non-existent problem created from scratch toward the realization of a desired and pre-manufactured resolution :

By applying the Hegelian Principle and the irresistible influence of money--due to human mind corruption under ego grip--the hidden psychotics, brought to the forefront and controlled by the occult rulers of the International Kabbalist Elite, seek to dismantle the social and political structures through which so-called free human beings govern themselves.

Their goal is to emasculate sovereign States, to merge nations under One World Government, to centralize economic powers and control the peoples and resources of the world.

Here's how it works :

**The Thesis** consists in creating the issue.

**The Antithesis** consists in generating opposition to the created issue (fear, panic, hysteria), the expected and fostered reaction.

**The Synthesis** aims at offering the predetermined resolution to the issue created in the first stage for adoption by the masses--a change that would have been impossible to impose on the Peoples without the appropriate psychological conditioning carried out in stages one and two.

There is, therefore, a deliberate manipulation of public opinion designed to lead people to demand a resolution that has already been decided upon and preconceived by the secret rulers of this world.

**In the Political field**, if you look closely, you will see--certainly with clarity--that the political divisions and affiliations being highlighted are nothing more than ploys. The rise to power of one party or another through endless elections does not prevent--and has never prevented--living conditions from deteriorating from all points of view: more working period for higher income ; or more work load for a lower salary in the hope of keeping a precarious job in any case; or else, idle and die.

It is very clear that Socialism and Liberalism, even in their current limited conception, are not mutually exclusive. It is as if we were to say that Individualism and Communitarianism do not go hand in hand. Both are part of the same equation for Balance and Harmony, Equity and Diversity, Freedom and Solidarity. The underlying agenda is thus otherwise conceived for the purposes of world domination other than what is officially proclaimed and publicly taught.

**In the Econo-Financial field**, we have a monetary system and an economy driven by Systemic Scam, Crime and Predation. The banking-monetary system operates on the basis of the fractional reserves system which designates the right for a commercial bank to lend, by book entries, money which it does not have and on which, besides repayment by the debtor, it will earn interest. This right is granted by the criminal Private Central Bank which creates money from thin air.

Currencies are pledged on wind--that is, by fictitious assets, gold in this case--and two sources of counterfeit money issuance are Central Banks and commercial banks through the fractional reserves system. And the Federal Reserve System, issuing the Dollar, is a Private Bank that acts as the Central Bank of the World Central Banks. The Bank for International Settlements (BIS) is merely the ultimate structure designed to ensure control over the global monetary economy through dictates and predation. The whole system is therefore private and criminal. Thus, an organized gang of thugs has managed to secure a monopoly on the production of worthless printed paper that nations have--or have been forced to--adopt as currency. The prerogatives of our states, which are otherwise beyond the control of their true holders, are placed in the hands of individuals who have ultimately taken the People and their Future hostage. All of this is leading us toward an exclusively economic globalization under a World Government, wherein hu-mankind upon the planet will find itself in a pattern of enslavement by the slave Masters of the Elite few.

**In the Occult-Religious field**, we have a pyramidal structure with several branches. The latter, at the top of which sits the Council of 13, controls all the occult and religious organizations including the Vatican. Directly under the 13 we have the Council of 33 where Freemasons from the highest ranks of the worlds of politics, economics, the military, and the Church are represented. They are the Elite of the Committee of 500, the Bilderberg Group, which constitutes The World Government. It represents the global banking system as a whole. All banks are connected to the Council of 13.

So we have an occult organization that owns and controls the Global Private Banking System under the umbrella of the US Federal Reserve Bank. This system makes it possible to bribe and subdue the World policies if not through voluntary cooperation. Through Multinationals created and supported by the Internationalist Central Bankers, national economies are seized and altered to be merged into a Global Interdependency Regime hidden under the label of New World Order or Globalization.

This Interdependency is not something that arises naturally through Free Trade evolution, as economic theories claim. It is an orchestration of the Evil Elite that has been going on for at least centuries. It is a strategy.

Here is an edifying excerpt that explains a very important part of the situation.

## THE STATE IS ABSOLUTE

*Get across to the Peoples what is really an elementary observation is probably the most difficult task in this work. The OBJECTIVE of the Secret Cercle (The Order) that rules this world is neither "left" nor "right". "Left" and "Right" are artificial devices to bring about changes, and the extremes of political Left and political Right are vital elements in the process of controlled change.*

*The answer to this seeming political puzzle lies in **Hegelian Logic**. In reality, Marx and Hitler, the extremes of the "Left" and the "Right", which the textbooks present as enemies, have evolved on the same philosophical system: Hegelianism. That brings screams of intellectual anguish from some Partisans, but is well known to any student of political systems.*

*The dialectical process<sup>2</sup> did NOT ORIGINATE WITH **MARX** as Marxists claim, but with **Fichte and Hegel** in the late 18<sup>th</sup> and early 19<sup>th</sup> Century Germany. In the dialectical process a clash of opposites brings about a synthesis. For example, a clash of political right and political left brings about another political system, a synthesis of the two, neither left nor right. **This conflict of opposites is essential to bring about change.** Today this process can be identified in the literature of the Trilateral Commission where "change" is promoted and "conflict management" is termed the means to bring about this change.*

*In the Hegelian system conflict is essential. Furthermore, **for Hegel and systems based on Hegel, the STATE IS ABSOLUTE.** The State requires complete obedience from the individual citizen. An individual does not exist for himself in these so called organic systems but only to perform a role in the operation of the State. There was no freedom in Hitler's Germany, there was not freedom for the individual under Marxism, neither will there be in the NEW WORLD ORDER.*

*In brief, the State is supreme and conflict is used to bring about the ideal society. Individuals find freedom in obedience to the rulers.*

**So who or what is the State? OBVIOUSLY IT'S A SELF APPOINTED ELITE.** It is interesting that Fichte, who developed these ideas before Hegel, was a Freemason, almost certainly Illuminati,<sup>3</sup> and certainly was promoted by the Illuminati.

---

<sup>2</sup> Dialectic Process: Reasoning in which question-answer approach (dialectic) is used to examine the correctness, legitimacy, or validity of an assumption, idea, opinion, etc.

<sup>3</sup> The Illuminati is a secret organization that has infiltrated and controls Freemasonry. It is an Elite in the elite. It is the most secret of the organizations of those who claim to be "Masters of the World".

Furthermore, the *Illuminati* principle that the "end justifies the means", a principle that *Quigley*<sup>4</sup> scores as immoral and used by *The Order*, is rooted in Hegel.

When its cofounder, William Russell, was in Germany in 1831-32, there was no way he could have avoided Hegelian theory and discussion. It was the talk of the campus. It swept intellectual Germany like a Pac Man craze. Its assumptions are completely at variance with our sense of individual freedom and Constitutional guarantees. Most of us believe THE STATE exists to serve the individual, not vice versa.

The Order believes the opposite to most of us. This is crucial to understanding what they are about. So any discussion between left and right, while essential to promote change, is never allowed to develop into a discussion along the lines of Jeffersonian "Republic" "democracy" i.e., the best government is the least government. The discussion and the funding is always towards more STATE power, use of state power and away from individual rights. So it does not matter from the viewpoint of The Order whether it is termed Left, Right, Democratic, Republican, Secular or Religious -- so long as the discussion is kept within the framework of the STATE and the POWER OF THE STATE.

This is the common feature between the seemingly dissimilar positions taken by members--they have a higher common objective in which clash of ideas is essential. So long as rights of the individual are not introduced into the discussion the clash of ideas generates the conflict necessary for change.

As the objective is global control, emphasis is placed on global thinking, i.e. internationalism. This is done through World Organizations and World Law.

Aton Michael, Christ,  
Excerpt from Phoenix Journals

The above statement puts things very plain. It is therefore only pure stupid outmaneuverings inspired and used by EVIL to maintain control over Hu-mankind. We, therefore, have to take our Peoples out of this Satanic March of the World. Our Policies and Economies need to be rethought as part of a New Civilization based on positive Values in Service to LIFE.

Only noble ideals rooted in the convictions of enlightened men and women--those entrusted with the conduct of state affairs upon the continent Esute-Atonla or any other--and supported by at least a strong, well-informed segment of the people, well-organized and structured will make a difference.

---

<sup>4</sup> Carroll Quigley (1910 – 1977) was an American historian and theorist of the evolution of civilizations. He is noted for his teaching work as a professor at Georgetown University and for his academic publications.

## OVERVIEW ON THE CURRENT WIDESPREAD POLITICAL SYSTEM

### 1. The Political Parties

An entity known as a political party--defined as an association of people who share the same interests, goals, and opinions, with the aim of gaining and exercising political power--has essentially become the only possible avenue for eventual access to our nations governance. Yet its emergence, dating back barely two (2) short centuries, marks the beginning of the most sophisticatedly dark period in the history of humankind upon this planet. Human civilization has functioned relatively better with other patterns. This structure is therefore highly reductive and greatly increases the risk of being swallowed up and controlled by organized dark forces, both from within and without, pursuing hidden agendas--as we have experienced over the past few centuries in this world become unbearable.

It is clear that what we have institutionalized as a political party--one that is, moreover, funded by taxpayer money--on one side, and exploited primarily by evil foreign Globalist organizations, acts rather as a consciousness inhibitor, a subverter-perverter and misleader of societies' political march toward a well-being and global fulfillment. By this positioning on the right, left or center or etc., whatever, the dice are already loaded from the onset, imposing a narrow and fragmented view of the reality of things of the living. Add to all this the dualistic postures of the ruling versus opposing parties with all the preconceived and pre-established notions that we know and are constantly witnessing, and we very soon see the limits and dangers of this kind of practice.

It is from genuine exchange of ideas emanating from free and empowered individuals that insight--that is, the best approaches to resolutions--emerges. And thought (idea) is dynamic and ever-evolving. This is something that the rigid concept of a pre-positioned and pre-oriented political party often does not allow, if at all. Since, more often than not, the political platforms and promises put forth by both parties not yet in power and those currently in power are nothing more than mere bait intended to seduce the populaces that are often uninformed and gullible. To their credit, it must be said that they generally lack the means to better inform selves, no more so than our career-minded politicians face with the magnitude of the real issues at stake.

More than the pre-packaged programs devised in 'political' think tanks--to which the general public doesn't understand much--it is their basic needs that should be the top priority. And these needs are not merely material; as well, and above all, are they spiritual. And this should be left to the direct management of peoples themselves, who know better than all the political and economic "experts" that the current system

churns out en masse--experts whose very existence depends on keeping the populace in point in this demeaning state of infantilization.

All of this leads to the acknowledgement that the structure known as a political party--through which political life of an entire people is supposedly animated and organized, but in reality confiscated--is not only useless but actually harmful.

**In conclusion, this system must be discarded as a matter of urgency.**

## 2. The Commonly Ran Political Regimes

### The Semi-Presidential Regime

The semi-presidential regime is one of the most aberrant ever established. Here is an ambiguous bicephalous system that serves as a cover for all the political machinations and deceptions perpetrated against citizens. In this context, a President is directly elected by voters to represent the state with full authority, delegates authority to a Prime Minister who implements his policies but ends up alone with the government, endorsing all the responsibility in the event of glitches. Under this regime, in particular, the Head of State can afford making 'MISTAKES' without any immediate threat by hiding behind his Prime Minister.

If the people are to directly elect, by so-called universal suffrage, a legitimate ruler with full authority, then it is preferable that he be directly ACCOUNTABLE and IN COMMANDS of government action.

### The Parliamentary Regime

This regime has the advantage of clearly defining the responsibilities for the exercise of political power: the executive and legislative branches. Citizens theoretically exercise control through their elected representatives in Parliament. But here again, these citizens are subjected to ongoing deception, scheming, and constant political-mafia-style compromises, due to the mediocrity and self-centeredness of the politicians who are supposed to be their representatives.

The system is so locked down that their only recourse is periodic elections to try to put other men and women in office who would do a better job. And as is becoming increasingly evident, voting and even the alternation of power are revealed to be a ruse to trample on and make a fool of the people while hidden agendas are set in motion. Authentic and genuine representation of the people cannot, therefore, be ensured by this type of system.

## The Presidential Regime

Here, the separation of powers is clearly defined and strictly enforced; in other words, the different branches of government have no means of exerting pressure to influence one another. In theory.

The executive branch is not politically accountable to the legislative branch; in other words, the government cannot be overthrown by Parliament. The same applies to the executive branch, which cannot dissolve Parliament.

The two branches--the executive and the legislative--are of equal legitimacy. Thus, here at least, there is greater balance and relative clarity in the power interplay. But the problem remains in the absence of direct citizen control over the mechanisms of the political apparatus, which would eventually allow them to intervene when need be to remedy a deviation meticulously plotted by certain greedy and deranged minds, which, unfortunately, is all too common in our societies upon Terra Earth. The case of the United States of America, where the population is practically imprisoned within a two-party system--orchestrated, imposed, and co-opted by the Zionist element--is the most compelling.

All these regimes commonly practiced on Earth have undeniably failed in their proclaimed goals, making it necessary to take a new path.

## THE ALTERNATIVE :

### Recognizing The Oneness Of ALL, Serving Life Alone

To begin with, I would like to share with the reader, below, a telepathic message that is highly enlightening regarding the topic addressed in this chapter.

Quote:

*This World, That You inhabit within and upon and Surrounding, this World is being given an Extraordinary, Unique et Singular Gift of many and multitudinous and varied Gifts SPIRITUALLY, MENTALLY, EMOTIONALLY, and PHYSICALLY, from CREATION, from CREATOR, from PARADISE TRINITY, from CHRIST MICHAEL ATON, and from MYSELF and from Others In This UNIVERSE, This SUPERUNIVERSE, This REALM OF BEING and DOING, from all Dimensions, from THE CENTRAL UNIVERSE, from THE PARADISE ISLE INFINITE AND ETERNAL LIFE, LIGHT, LOVE abundant supply.*

*But know this. Ye who have been raised to perceive only separation and can only see and understand and understand and comprehend that which separates the near infinite SUBSETS of Existence and Being shall find yourselves further separated.....*

*For what comes is the Foundation of UNITY.*

*Unity of Thought; Unity of Feeling;*

*MIND AND HEART AS ONE IN GOD AND WITH EACH OTHER YE ARE ALL SOVEREIGN CITIZENS OF CREATION.*

*SOVEREIGN CITIZENS OF THIS SUPERUNIVERSE OF ORVONTON;<sup>5</sup>*

*SOVEREIGN CITIZENS OF THIS UNIVERSE OF NEBADON;*

*SOVEREIGN CITIZENS OF THIS SYSTEM OF SATANIA;*

*SOVEREIGN CITIZENS OF WHAT YOU CALL YOUR SOLAR SYSTEM;*

*SOVEREIGN CITIZENS OF THIS, YOUR PLANET, URANTIA, EARTH, EARTH SHAN GAIA.*

---

<sup>5</sup> For your information our solar system is part of a local system called SATANIA which itself is part of a Local Universe, our Universe of belonging, named NÉBADON. ORVONTON is the Super- Universe that encompasses everything and there are 7 Super-Universes. See The Urantia Book.

*Soon your differences will fade away and melt and be cast to the wayside.*

YOUR RACIAL DIFFERENCES

YOUR GENDER DIFFERENCES

YOUR POLITICAL DIFFERENCES

YOUR RELIGIOUS DIFFERENCES

AND THE THOUSANDS OF MINUTE DIFFERENCES THAT YOU USE TO DETERMINE  
YOUR ENSUING AND MANIPULATED AND ENCOURAGED PREJUDICES OF THE DAY;

YOUR NATIONAL DIFFERENCES

YOUR LANGUAGE DIFFERENCES

YOUR REGIONAL DIFFERENCES

YOUR CULTURE DIFFERENCES

YOUR ECONOMIC DIFFERENCES

YOUR INTELLECTUAL DIFFERENCES

YOUR HEIGHT AND WEIGHT AND SIGHT AND SOUND DIFFERENCES

AND THE REMAINING HOST OF OTHER CATEGORIES THAT YOU HAVE BEEN GROWN  
TO ACCEPT AND CONTRIBUTE TO AND PERPETUATE AMONG YOURSELVES;

ALL OF THAT SHALL FADE AND MELT AWAY AND BE CAST TO THE WAYSIDE ON THE  
CONTINUING PATH OF YOUR LIVES TOGETHER BACK TO THAT FOUNDATIONAL  
POINT OF YOUR ORIGIN GOD.

THE ONE, CREATOR, CREATION.....

*And you will understand it better by and by. But as that by and by is being experienced, you will give up your opposition to each other; you will give up your COSMIC IGNORANCE and replace it with A COSMIC KNOWING OF THE UNITY OF ALL THINGS AS ONE IN AND WITH THAT....THING THAT YOU STRUGGLE TO RELATE TO AS GOD. NOT JUST YOUR GOD BUT GOD OF ALL EVERYWHERE IN CREATION. AND NOT JUST WHERE YOU ARE AND NOT JUST YOU, BUT ALL, ALL ONES, ALL THINGS EVERYWHERE.*

*Dabi Micael, Creator Son*

*End quote*

As it is stated, quality produces quantities. Priority must be given to Quality, and Quantities undeniably will ensue. Quality of Life, quality of Love. And here it is the perception of the Oneness of All within the Higher Consciousness of THE ONE, The Creator of All Things, that determines and gives Quality. And from this Quality flows True Abundance without perversion.

The point to bear in mind in the light of the above is the need of recognizing this Oneness in the actions of a Brotherhood of Men and Women bearing some degree of light, both through their high level of consciousness and integrity and their mastery of the political reality of this world, to serve as anchors of Light upon the territories of their very residence or through a connection in Spirit and Heart wherever they may be, in order to counterbalance the dark energies nourished and sustained by the Darkness within the collective consciousness of peoples. The energies of Light must be rooted and supplant the manifestations of Darkness.

*This is The Reconnaissance of the Oneness of All.*

This must be done with love and impartiality through meditative techniques, intentionally in communion with the Father/Mother within each one, so that the Divine Blueprint may be fulfilled in perfection without human interference--which is often self-seeking, immature, and therefore unbalanced.

And this enlightened Brotherhood will serve as a Beacon and a Stabilizing Core, ensuring that Creator-Source Light always inspires the thoughts and actions of both leaders and individuals. This will coordinate the course of events and have the merit of neutralizing the confusion and disunity subtly insinuated into minds by the Evil forces. We need a disconnection from the illusion fabricated and sustained by the official religions to which many of our brothers and sisters are subject, as well as from traditional beliefs and practices, of which the former are merely more sophisticated versions.

Incarnate souls that do feel or get an inner call (divinely authentic, very important) and are clearly, or more or less, aware of their life mission, must make the decision to enter active service by agreeing to **be in the right place, at the right time, doing the right thing**. It is important to listen to and follow one's heart, completely overcoming fear and the ego--the number one mortal enemy--and to develop absolute trust in the **Inner Divine Being**.

*This Is Service To LIFE.*

Before any political action is even undertaken, it is essential to ensure that a sound spiritual foundation is established by and among those called to serve as pillars of what might be called the **Nurturing and Protective Matrix** of what we shall refer to as the **Grand National Resurrectional Structure**. And upon this foundation will be

anchored the political-ideological, psychological, and educational preparedness of the players in The Founding Action Matrix.

Within this structure, custodian of Cohesion, Unity, and Stability, the Peoples will inevitably gather together. In this way, potential moles, unwitting agents, and the weak-minded ones will find it difficult to infiltrate the structures in any form whatsoever to sow disunity, confusion, and treachery.

The single-headed model of national liberation movement embodied in the person of a single 'charismatic' leader has shown its weaknesses and limitations in that all it took was to take out or sideline the head to sow disarray in the ranks and often definitively dismantle the entire structure. This must come to an end. **The higher structure merging the political (dense) and the spiritual (subtle) will ensure that there is a strategy that addresses not only the pre, in, and post periods, but also the short-, mid-, and long-term of every facet of the Global Issue.** It is this intelligent strategy, it must be confessed, that we are facing on the side of the Dark Brotherhood, proven master in the art of manipulation and recapture.

## FELETE- FELISHI NE DUKEKELE SUTE-ATON

Or

### THE LIGHTED ATONLA (DIVINE) POPULARISM In PE-ESUTE-ATON & Upon TERRA-URANTIA

*'Be The Change You Want To See Manifested In Society'*

As a result of the relevant analyses and observations of the international and continental socio-political arena, as outlined in the preceding chapters, an ideal political system at the foundation of a Balanced and Harmonic<sup>6</sup> Civilization has taken shape in my Mind. And it is one that must meet the criteria formulated below.

It is of necessity to make room for the Free and Direct Expression of the citizen by taking care to choose a form of the State such that anarchy and disunity do not take precedence at the expense of the very assigned goals of the institution of said structure. And for conclusive results, the reconstruction of our territories must be rethought taking into account the key foundations that are :

1 -- Optimal Demography

2 -- Socio-Cultural Affinities

3 -- Systemic Autarchy

*Demography.* An enhanced functional Harmony within an improved Direct and Representative model regime requires organizing of the people into communities of substantial medium size. Furthermore, excessive population concentration in sprawling cities leads to imbalances in political, socio-economic, and human terms, impacting natural resources, living conditions, and Nature (the environment). It is very crucial to take this into consideration.

*Socio-Cultural Affinities:* It is important that peoples be grouped together on the basis of their socio-cultural affinities and in their integrality. Artificially induced separations under the pretext of anti-tribalism are based solely on fear and misunderstanding of human being. Individually and collectively, the Peoples must be led to form de facto

---

<sup>6</sup> Harmony : Happy relationship between the parts of a whole, of a society, of Nature. State of relations between people or in a human group, which results from the agreement of thoughts, feelings, wills.

cultural groups with which they identify selves most at a given moment of their life journey so as not to interfere in their spiritual unfoldment.

*Systemic Autarchy*: It consists of adopting a sustainable development strategy that prioritizes the systematic and systemic nurturing of substantial, self-reliant autonomy within each Community, as far as possible. This is all achieved through a comprehensive and federalizing approach via policies from National and/or Federal perspective. Assets are thus pooled, and temporary shortcomings/weaknesses are appropriately addressed.

In this dynamic, the inviolability of so-called inherited frontiers from colonization is undeniably called into question. States must be refounded, taking into account the prevailing millennia-old cultural traditions. Never again should a frontier separate peoples of same culture and filiation. New states are founded on the basis of a new paradigm aiming for a Re-Evolution toward a Civilization of Light and Life. **And it is only from the accepted and apprehended prevailing order that a society can validly progress in Harmonic Convergence toward this new Civilization.**

Therefore, the only model that can serve as the foundation for this Civilization of High Divine Aspiration is Creation and Nature themselves, since, in all wisdom, it is impossible to know (do) better than the Creator. Thus, it is clear that the Principles and Laws that govern Nature, our Nature, must be understood and mastered by the leaders and the people themselves, who, ultimately, are the vessel receiving and maintaining this Life Consciousness that determines the nature and values upon which the Civilization reposes. All facets of Life must be built upon these Immutable Divine Principles and Laws if we are to progress as Humanity without repeatedly falling; and this in order to establish a system by which the citizens of the various Territorial Life Communities would constitute themselves into People's Colleges from which they could directly and more easily take part in the administration of their Communities and become involved at all levels in the conduct of affairs and decision-making concerning them. Social cohesion will be reborn and take root.

We have chosen to designate it by the authentic name of :

**JELETE-FELISHI NE DUKEKELE SUTE-ATON<sup>7</sup>**  
or **THE LIGHTED (DIVINE) ATONLA POPULARISM.**

It will therefore be of need to well-pave the way for the emergence of a true sense of unity, gently leading to the birth of a genuine Enlightened Nation in the hearts and minds of the People, in lieu of the debilitating, unnatural persistence of self-denial and self-disdain imposed primarily on those of Pe-Esute-Aton, above all. In Pe-Esute-Aton,

---

<sup>7</sup> Political Life System for A Lighted Atonla Nation.

peoples are naturally led to begin with large, remodeled transnational Federal States, to then move ahead just as naturally toward National Federal States.

The goals to be achieved are **Liberation, Empowerment**, and progressive and ongoing **Enlightenment** within Divine Consciousness, sole custodians of a Civilization progressing toward and within Higher Universal Consciousness. A society in which peoples are united and interdependent because having consciously chosen to be thus, and not because believing they have no control over their lives and destinies.

## THE STATE POLITICAL ORGANIZATION

### 1. The Direct and Representative Regime

Since it is universally accepted that power belongs first and foremost to the People, who can decide whether or not to entrust it to representatives who would exercise it in their name, it must be quite clear in our minds that the People have the right and the duty to ensure that it maintains effective and efficient control over the mechanisms of representation and the exercise of power, alongside the mandates entrusted to elected officials, and thus make room for direct and irrevocable involvement in the running and conduct of state affairs.

Direct Regime (or Rule) calls upon the People's wisdom and maturity to assume its primary role as bearer and protector of daily life, to identify and elect the most enlightened individuals, in light of their actions and daily experiences in the midst of their fellow citizens, to represent them where need be.

It is obvious that the current so-called 'democratic' system, inherited from a civilization that is far from being the best the world has birthed, does not allow political interplay and people's interests to merge in transparency in service of the common good.

Therefore, ideally, a Political Regime (System) that is both direct and representative seems best suited to providing a lasting and sustained balance through a socio-political system structured in such a way as to ensure compliance with both communal and individual life and citizens' interests in all circumstances, through a unique Constitution provided with safeguards for this purpose.

It is therefore important to devise a Territorial Political-Administrative Organization that takes into account criteria that make practicable what we herein refer to as **JFELETE-JELISHI NE DUKEKELE SUTE-ATON**, that is a Political Life System for A Lighted Atonla (Divine) Popularism. Direct Administration (almost equivalent to Direct Democracy), which is one facet of this system, is retained for both the Federate

States and the Federal State. This form of administration, a balanced mix of Direct and Representative, is quite wise and relevant. However, the whole system must be redefined and reformulated to suit the nature of the system here in projection.

The State Administration and Legislature are directly chosen by the People, who are organized as a whole into a Grand People's College (Federate), according to the pattern defined further on in the chapter devoted to the mode of operation of the institutions. This pattern is the same in terms of selection of the Federal Representatives.

The legal voting age must be set at 21 years or older, so that citizens would have reached a minimum level of maturity before assuming any political responsibility.

## 2. The Territorial Space

In this field, a genuine territorial reform is necessary. The federal system is the obvious choice, with a less intrusive, yet still coherent and efficient, federal state. Centralized unitarian states are too patronizing and oppressive, as are federal states wherein there is excessive government involvement. The ultimate goal is to empower and involve citizens in the affairs of their home communities and to place much more direct control in their hands.

This restructuring must take into account the cultural and sociological affinities of the peoples. Our current states frontiers will therefore, as already mentioned, give way to groupings and delimitations that are more respectful of the natural tendencies of the peoples who inhabit the territories. The development of a sense of national affiliation cannot and should not be incompatible with respecting and highlighting of ethnic, cultural, and regional specificities. On the contrary, this must be considered on the same level as the individualities we all display, which constitute genuine assets within a given group or Life Community. Brotherhood, Balance, and Harmony among the different constituents of the Nation are that which must be sought and constantly nurtured. And the only way to achieve truly transcendental unity remains education and free participation.

## 3. The Constitution of the Federation States

We must be in the redrawing of our states frontiers within the coming Federations, taking care to integrate within a single state the entirety of cultural areas inhabited by a homogeneous people. The resulting state entities must imperatively be multicultural in order to foster the constant pursuit of harmony and balance.

In the Western PE-ESUTE-ATON, covering an area of approximately 6,200,000 km<sup>2</sup>, there are 16 states in existence within borders defined by events of colonialism and a population of nearly 300,000,000 inhabitants. These territories can be redrawn into 50 states, more or less, according to pre-established criteria. This would result in a population of 6,000,000 inhabitants per state.

In the Central PE-ESUTE-ATON, there we have 6,640,600 km<sup>2</sup> occupied by 9 states and approximately 163,500,000 inhabitants. A total of roughly 27 states within a United Federation would be appropriate. This would result in approximately 6,000,000 inhabitants per state.

It could also be arranged so that each reconstituted state has a population of no more than 10,000,000 residents. In this case, there would be approximately 30 states in the Western region and 17 states in the Central region of the continent.

The Southern Region, with an area of 5,329,760 km<sup>2</sup> and a total population of approximately 163,315,735, will comprise 17 states.

The Eastern Region, with an area of 6,240,814 km<sup>2</sup> and a total population of 289,797,027, will comprise approximately 29 states.

The Northern Region, with an area of approximately 8,000,000 km<sup>2</sup> and a population of 277.8 million, will comprise 28 states.

Going along with the same Federative political pattern, the entire PE-ESUTE-ATON continent would thus be restructured into a total of 111 states, federated within five (5) coherent and sound Federal entities.

#### 4. The Life Community

The Life Community referred to in this political-civilizational treatise is conceived as follows. It is the basic building block, unit-cell, of the Political and Philo-spiritual organization of society. It must be regarded in the same way as a cell in the human body, independent within the cellular interdependency system that characterizes the entire body. The entire Political-Civilizational System of the new Enlightened Nation is built around it.

Life Communities are cities and also constitute electoral districts. Their population must be held between 50,000 and 100,000 residents. Large cities are limited to 1,500,000 citizens, no more. Within these cities, the electoral district is organized to elect two (2) Representatives per 100,000 inhabitants. The same applies to Communities of 100,000. Those with fewer inhabitants retain the same status.

Let's take the instance of the Western Region of Pe-Esute-Aton. As for its tangible structuration, here is what it might look like. The overall population of this Region is approximately 300 million (2018). Based on 100,000 per Life Community, we end up with 3,000 Life Communities/Electoral Districts. For a population of 10,000,000 individuals within a state, we have 100 Life Communities with 100,000 inhabitants. For another state with 60,000,000 people, we get 600 Communities of 100,000 residents.

Since each Community is represented by two (2) members, a population of 10,000,000 results in 200 Representatives. For a population of 12 million, for example, there are 240 Representatives.

The electorate includes all residents of the state--children, youth, and adults--represented by citizens of voting age.

## 5. The Elective Mandates

Representatives, General Administrators, and General Vice-Administrators (Federate States), as well as the Prime Administrator and Vice-Prime Administrator (Federal State), are not appointed for a fixed term.

People's Representatives may be replaced at any time for any reason, at the initiative of their electorate, since they are merely faithful spokespeople for their Communities.

As for the States Administrators and those of the Federal State, the mechanism for their removal from office--certainly for high treason in the first instance--is initiated by a citizens' initiated referendum triggered by a popular petition that must meet certain specific conditions to be established in order to preserve the Nation stability.

The mandate is binding, meaning that the representative--the elected official--is granted only limited discretion. He is appointed by the electorate to carry out precisely defined tasks, namely to faithfully represent his constituents, from whom he cannot deviate without provoking his own removal from office. The elected official is therefore merely an executor of a sovereignty that exists only in the people who appointed him.

The duration of a term in office will therefore depend solely on the efficiency, equity, and wisdom embodied by those in office. In this scenario, it is possible that elected officials may remain in their positions for a long period without any controversy, since their continued tenure would reflect a renewed popular choice.

## 6. The Federate Grand People's College

At the level of the Federate States, the system is based on Direct Rule, whereby all citizens of legal voting age collectively constitute the Legislative Branch. The People directly serve as both Legislators and Overseers.

The people elect Representatives from among themselves, all of whom are free from any partisan affiliation, to assume office as rulers in the staff of the General Administration of the Federate State.

The established electoral District/Life Communities appoint two (2) Representatives responsible for conveying their voices and positions within the Federate Grand People's College. Positions are determined through debates at the Community level, as mentioned further on in the chapter devoted to the mode of operation.

Since the Federate State is assumed to have a population of no more than ten (10) million residents, the number of Life Communities, DUSHITE, would be around one hundred (100) per 100,000 residents per Community. The two (2) Representatives per Community make a total of two hundred (200) at the Federate State level. The mode of operation at this level will proceed normally without any further procedures.

## 7. The Federal Grand College

The Modus of Direct Administration remains the system adopted at the Federal level. It is to be a tricameral system, consisting of a **Grand People's College**, a **Grand Senatorial College**, and a **Grand Supreme College**.

The Federal Central Grand College, acting as the representative of the People's power, will have the traditional prerogatives of proposing, approving, overseeing, legislating, etc.

### 7.1 The Federal Grand People's College

Its members are elected by direct vote by the Life Communities (Grand People's Colleges) of the Federate States by virtue of a single quota regulated by the Federal Electoral Code. This house represents all of the peoples in accordance with their natural demographic proportions.

Based on a total population of approximately 300 million inhabitants, if we choose a quota of one (1) Representative per Life Community (100,000 inhabitants), we arrive at 3,000. This would likely be too many to manage, if not impossible, unless the structure is otherwise organized.

Thus, with a view to having 3,000 representatives to form the Grand People's College, the assembly could operate in ten (10) groups of 300, whose decisions, following deliberations, will be carried out by a delegation of 300 members composed of 30 delegates from each group.

One option worth considering is electing one (1) People's Representative for every three (3) Life Communities, which would reduce the total number to 1,000. These representatives would operate in ten (10) groups of 100, whose decisions--after deliberations--would be carried out by a delegation of 100 members composed of 10 delegates from each group.

Representatives may be recalled at any time by a referendum initiated by their constituents.

## 7.2 The Federal Grand Senatorial College

The members of this College are also elected by direct vote by the Federate Grand People's Colleges through the electoral district of the Life Communities. At this level, all states are allocated the same quota of representation, regardless of their demography. This College acts as a traditional second House, the Senate, which, by a qualified majority, exercises the power to approve or reject any decision made at the level of the Federal Grand People's College. The demographic "imbalance" is compensated at this stage, where a balance restoration is observed.

Thus, a double majority is required for the passing of any act, that is, the approval of the popular majority represented in the Grand People's College and also that of a majority of the Federation's states represented in the Grand Senatorial College.

Since the FGSC is the central forum for the balance of political forces, each state sends in the same number of Representatives. Three (3) per state, which will make a total of 150 based on 50 states or 90 for 30 states.

All Life Communities in each Federate State therefore proceed according to the same mode of appointment described for the First House to select the three (3) National Representatives to the Second House.

Let us continue to consider a population of 3 million people within a state, divided into 30 Life Communities, each with 100,000 inhabitants. Each Community selects one (1) candidate. The thirty (30) elected representatives thus selected meet to elect the state's three (3) Senatorial Representatives.

Now, let us consider twice the population mentioned earlier, that is, 6 million people organized into 60 Life Communities. The vote of these communities selects 60 elected

representatives. The 60 appointed elect 3 from among themselves or divide into 3 groups of 20 to each select one (1) candidate.

In the case of a population of 12 million people organized into 120 Life Communities, the votes cast by these communities elect 120 individuals. The 120 representatives split into three groups of 40, each of which selects one (1) candidate. And so on...

Senatorial Representatives may be recalled at any time by a referendum initiated by their constituents.

### 7.3 The Federal Grand Supreme College

The FGSC is composed of eminent figures from various cultural, scientific, and artistic communities, as well as political veterans and former judges of the Federation from all constituent states. These are Enlightened personalities who have singled out themselves through their service to the peoples of the Federation.

Its members shall be elected for life by a college composed of the General Administrators of the Federation's states and the Prime Administrators of the Federal State, as well as the Grand Federal College.

In relation to the first two (2) legislative houses of the Federal Grand College, its role shall be decision-making, and its opinions shall be binding.

Its role, in relation to the Executive Branches of the states of the Federation and the Federal State, will be advisory in nature; providing highly significant and valuable counsels to assist them in making decisions in the spirit of the law and with wisdom regarding crucial issues affecting the unity and future of the Peoples that the Administrations may face.

It will help ensure that laws and various decisions align with the Universal Laws enshrined in the Constitution at both State and Federal levels.

It may consist of 50 to 100 members and may exercise a veto power within the scope of its duties as the custodian of the integrity of the Constitutionally adopted Universal Laws.

## THE ADMINISTRATION

### 1. Offices, Denominations And Assignments

**Administration :** The portion served at Table; that which serves, which is responsible for serving.

A reformulation of offices and denominations of the various positions within the Administration--namely ministries, secretariats, and the presidency, as conceived in these so-called modern times--as well as their interrelationships, is mandatory. This stems from the perception of the very essence of the matter: the community.

To this end, we have chosen instead to present them under the wording of Administration in order to highlight the primary function of service to the People and to Life. In this context, emerges the following reformulation :

President : Prime Administrator (Federal)

Vice-President : Vice-Prime Administrator (Federal)

Governor : General Administrateur (Federate)

Vice-Governor : Vice-General Administrator (Federate)

Minister : Co-Administrator (Federal/Federate)

Deputy Minister : Assistant-Administrator (Federal/Federate)

Administration Staff : Servant (Federal/Federate)

### The Federal State

- Federal Administration
- Federal Prime Administrator
- Federal Vice-Prime Administrator
- Federal Administrator
- Federal Assistant-Administrator

### The Federate State

- General Administration
- General Administrator
- Vice-General Administrator
- Co-Administrator (Federate)
- Assistant-Administrator (Federate)

### La Communauté de Vie

- Communal Coordination
- Prime Communal Coordinator
- Vice-Prime Communal Coordinator
- Communal Co-Coordinator
- Communal Servants

### Offices' Assignments of the Federal Administration

- Federal Prime Administrator, in charge of Harmonic Convergence
- Federal Vice-Prime Administrator, in charge of Domestic Intelligence
- Administrator-Administration of National Defense
- Administrator-Administration of Industry and Technology
- Administrator-Administration of Troc-Economy, Commerce, Finance and Natural Resources
- Administrator-Administration of Science and Philosophy of Life
- Administrator-Administration of Justice
- Administrator-Administration of Foreign Relations and Continental Unification
- Administrator-Administration of Global Bodily Harmony, Agriculture, and Demography

### Offices' Assignments of the Federate Administration

- General Administrator
- Vice-General Administrator
- Administrator-Administration of Civil Popular Defense
- Administrator-Administration of Territory, Planning and Land
- Administrator-Administration of Habitat and Housing
- Administrator-Administration of Labor and Troc-Economy
- Administrator-Administration of Wholeness Education and Communication
- Administrator-Administration of Transportation and Energy

The administrations of the Federate States, other than those defined in this Treatise, are free to determine their own offices, except for those matters that fall within the exclusive domain or prerogative of the Central Federal Administration. To ensure the successful implementation of these measures with minimal disruption, the Federation must maintain firm control over certain spheres in order to prevent any misuse resulting from the weakness or freshness of a new structure of a kind never before explored.

The exercise of the Administration's action is collegial and unified. All actions are undertaken, coordinated, and carried out with cohesion and consistency in the service of the Peoples' interests.

## 2. The Federal State Administration

Administrators are elected through a process that must be based solely on their reputation for integrity and wisdom. From the long history mankind has experienced as a civilization, it is abundantly clear that establishing a sustainable civilizational order requires three essential ingredients: **Equity, Wisdom, and Discipline.**

**Discipline:** Rule of conduct that one imposes on self, self-control, sense of duty.

**Equity:** The quality of attributing to everyone what is due to them by reference to the principles of natural justice; impartiality.

**Wisdom:** Higher ideal of life proposed by a high spiritual or philosophical teaching; the daily experience of this knowledge.

**Candidates for leadership positions must be selected solely on the basis of these criteria, on an individual basis.**

Now, the mode of appointing Federation Administrators is of vital importance in this Lighted Atonla (Divine) Popularism that we are outlining in this treatise. The central issue here is how to proceed in order to elect or select candidates primarily on the basis of the three (3) golden criteria, rather than their popularity.

Thus, the process could take the following form.

1-/ Candidates are appointed at the level of each state within the Federation. Each community comprising the state may or may not nominate a candidate for the office of Federal Prime Administrator.

2-/ Election (by show of hands) within the community, which is organized into one hundred (100) electoral districts or groupings of one thousand (1,000) inhabitants. Each district elects one candidate.

3-/ The vote selects one hundred (100) elected representatives from the Life Community, who in turn designate one (1) Elder-Leader by vote.

4-/ These Representatives from all the Life Communities involved meet together to choose one (1) Elder-Leader to represent the State.

5-/ The final election of the State Representative also takes place by show of hands.

Thus, for a State of three (3) million people, the thirty (30) Communities select approximately thirty elected representatives who, from among themselves, will make the final choosing.

All these Elders-Leaders gather in the Federal Capital city to conduct a secret ballot among themselves to elect the two (2) Elders-Leaders who will serve as Federal Prime

Administrator--for the one receiving the most votes--and Federal Vice-Prime Administrator--for the one receiving the second-highest number of votes.

The Federal Prime Administrator then forms his administration, which is subject to the approval of both Houses of the Federal Grand College.

The States General Administrators, Federal State Prime Administrator and Vice-Prime Administrator do not serve fixed terms, and the number of terms is not limited, as they are under the direct and permanent oversight of the Life Communities through the Lighted Divine Popularity System.

The minimum age of eligibility may be set at 40 years, with no defined upper age limit, as this depends solely on the condition of the candidate involved.

### 3. The Federate State Administration

The procedure followed at the level of the Federate States Administrations is as follows.

- 1-/ Each Life Community may or may not nominate a candidate for the position of General Administrator.
2. Election (by show of hands) within the Community, which is organized into 100 electoral districts or groupings of one thousand (1,000) inhabitants. Each district elects one candidate.
- 3-/ The vote selects one hundred (100) representatives from the Life Community, who in turn designate, by secret ballot, two (2) Elders-Leaders. The first who receives the most votes assumes the office of State General Administrator, and the second, that of Vice-General Administrator.

### 4. The Life Community Administration

The procedure followed for the election of members of the Life Community's Communal Coordination is as follows.

1. Candidates come forward and/or are nominated within each Community of Life for the position of Prime Communal Coordinator.
2. Election (by a show of hands) within the Community, organized into 100 electoral districts or groupings of one thousand (1,000) residents. Each district selects its best candidate.

3-/ The vote selects one hundred (100) representatives from the Life Community, who in turn designate from among themselves, by secret ballot, two (2) Elders-Leaders. The first to finish in the lead holds the position of Prime Communal Coordinator of the State, and the second, that of Vice-Prime Communal Coordinator.

## 5. Interaction With The Executive Administration The Political Operating Mode

Any proposal or project from the Administration is submitted directly to the Nation for approval through its Representatives. Initiatives originating from the People and the Communities follow the same path until a final decision is reached at the highest level of the Popularist Legislature. It is at this stage that the intelligent and well-organized electoral structuring makes perfect sense.

Debates first take place at the level of each Life Community after communication of projects-proposals by the Administration, and the decisions reached are presented to the Grand People's College (Federate) to determine whether or not the public opinion is in favor of the Administration's proposal.

The following procedure is followed. One thousand (1,000) groups of one hundred (100) members debate the issues and reach a majority position; the one thousand (1,000) Delegates responsible for carrying these votes are divided into 10 groups of 100 and proceed in the same manner to reach a position that will be carried by 10 Delegates; and in the end, the majority vote of the 10 represents the decision of the 100,000 members of the Community, which will be defended by their Representatives.

Alternatively, the discussions within the groups result in votes that, when tallied together, indicate which position prevailed; and this is what the Representatives will take into account.

## THE ADMINISTRATION OF JUSTICE

### 1. The Court of Justice

**The Universal Law** *decrees that Man's primary obligation, regardless of which planet he happens to inhabit, is to develop his Divine Spirit.*

*I AM! I AM THE LAW, THE TRUTH, AND THE WORD. You need no burning bushes nor snakes into the staff--nor do you need blazing wheels in the cosmos. Hear Me clearly, children, for you who have been misled into the corners of darkness and into behaviors which have unbalanced your planet and soiled the places of perfection, shall hear Me, find Truth and turn unto that Truth in the days that*

*follow, or you shall be separated into the places away from My presence. For as you have made your choices, and continue to act in ways against the laws as given unto your species to maintain balance and wholeness of soul direction, you shall continue in the places of the adversary which have pulled you down.*

*You have put reason and Godly thought to the side and entered into the places of darkness--claiming that you know not that which is Truth and living according to that which Man has made "legal", but that which remains "unlawful". Now you spread the shackles of the "voted-in ' legal" evil which have been thrust upon you in your "modern" world and have defiled ALL that remained sacred and wondrously gifted unto you.*

*Aton Michael, The Christ*

In these few, highly enlightening words, we are once again faced with a fact that has been magnificently demonstrated. It is that, in this world as we perceive it, things have been deliberately made complex and ineffective in order to deceive people regarding this so-called realm of justice, as well as others. Human society needs nothing but Divine truth and justice. Human lawfulness must therefore align itself with Universal Law. It is as simple as that.

In the current judicial system, monitoring of law enforcement is divided between courts and tribunals. The difference between a court and a tribunal lies in the fact that a court issues rulings and a tribunal issues judgments. In this new system, things will be different, since structures must be built on simplicity and the Laws restored to their simplest forms, serving solely the Truth to render--or at the very least--emulate Divine Justice.

Tribunals and courts will be merged, and the term Courts will be retained for the bodies responsible for upholding and enforcing the Law. Judgments (instead of rulings and judgments) are therefore rendered by the Courts.

## **2. Judges, Attorneys and Juries**

In reality, Judges alone serve a purpose in a system known as the Lighted Atonla (Divine) Popularism. Since truth--and truth alone--is the institution's primary concern, it must be ensured that every citizen be subject to justice based on factual truth, free from legal and bureaucratic costs or artifices rooted in an imbalance favoring the most powerful and the highest bidder--the result of which is nothing but injustice, suffering, and the impoverishment of the vast majority. And this sustains and protects society's major criminals, as money has become the supreme value par excellence.

From this perspective, in a context of professional tampering with evidence and false testimony, attorneys have no positive impact on the course of a trial manipulated by powerful hidden interests of which they are, for the most part, mere tools. And the juries in the case depend solely on confrontational games that have nothing to do with searching for truth and the rendering of justice. Attorneys and Juries are there only to impress. It is therefore pretty clear that, provided that only the truth is sought for fair justice, judges alone and the Judicial Administration acting in service of Life are sufficient to weigh the facts. And, certainly, citizens will always have full latitude to provide for their own defense as they see fit.

Furthermore, there will be no need for professionals in public and ministerial offices, such as notaries and bailiffs, because global refoundation will eliminate any demand or need of this nature within society.

There is therefore no need for all this legal confusion deliberately instituted in a System of Lighted Divine Atonla Popularism. Justice is rendered in simplicity by the Servants of Divine Laws and of Creation.

### 3. The Divine Justice

Divine Justice, based on unalterable factual and non-factual truths, can and must be sought and established. The material and the immaterial are often at play in unfortunate and illegal occurrences that are subject to prosecution. But human justice is essentially limited to the material level of the unfolding of events and, moreover, lacks the necessary and effective tools in establishing the context of events in their truth.

Divine Justice must, in any case, give primary consideration to an effective knowledge of the Laws. The common assertion on earth that "**Ignorance of the law is no excuse**" is an aberration that cannot apply. One cannot validly judge on the basis of laws unknown to the citizen and which no one--certainly not the educational system--has taken care to instill in him.

Therefore, it is essential to be familiar with the laws through a thorough civic education, and only then can strict and proper enforcement take effect.

A reliable and Divinely established tool allows for a high level of enlightened mastery over all circumstances surrounding the unfolding of an event. This tool is the reading of what is called the Akasha. The Akashic Records, also known as the Akashic Memory, are a kind of Cosmic Memory, of an etheric nature, which records in minute detail the life unfolding of the Planetary Being and of every living being. They constitute the individual, planetary, and universal recording memory of Creation. All

that has ever occurred at any given moment in existence, whether hidden or not, is found within it, intact and clearly established in terms of its real, visible, and invisible implications.

**The reading of the Akashic Records by well-trained telepaths is the most reliable method available to a court composed of enlightened Judges for rendering true Divine Justice without any ambiguity.**

Arrangements should be made to have, in each instance, a certain number of telepaths (Akasha readers) simultaneously assigned to every case under trial. In this way, the sequence of events recorded in the Akasha will serve as the only real evidence of guilt or innocence--in parallel with and consistent with the established facts--regarding the defendants, thereby ensuring the rendering of a fair judgment.

This is the recommended path for a Human Justice system that comes ever closer to the Divine One. And this is what the Systems based on The Lighted Divine Atonla Popularism will strive to achieve.

## **THE CONSTITUTIONAL OR FUNDAMENTAL LAW**

The Constitutional Law of a Lighted Divine Popularist State must be fundamentally based on the Laws or Divine Principles which are those of Balance and Harmony. Provided our desire is to live in harmony with the Creation to find peace and fulfillment and above all a realization of Souls' evolution, it is clear that the whole organization of our societies must be built around these Natural Laws which govern all of CREATION. All laws governing the Nation must strictly and carefully comply with and align with these principles.

Hu-mankind has descended into the depths of darkness and must return to Life by following these LAWS OF GOD AS THEY HAVE BEEN HANDED DOWN TO US FOR OUR GREATEST GOOD. Mankind has been neglectful and thoughtless, trampling the Holy Word of the Creator underfoot. There will no longer be the excuse of ignorance for doing so; the Fundamental Law and the judicial and educational systems will be structured so that everyone acts responsibly and with full knowledge.

Therefore, the following are the eighteen (18) fundamental Laws-Principles of Creation, with brief explanations, which must be incorporated in one form or another into the Constitution as Mother-Law of all other laws of the Nation. No law may deviate from these Universal Laws. Furthermore, no legal or educational mechanism or content may or should contradict them.

# The Laws of God and Creation or The Laws of Balance of THE ONE

## I. The Highest Command Of The LAW OF CREATION is:

**Achieve the wisdom of knowledge inasmuch as this will enable you to wisely follow the Laws of The Creation.**

This means to seek and demand the TRUTH be shown to us so that we must develop that ability to discern and judge all information, actions and behavior with self and others which go against the laws of balance given forth by GOD and The Creation. This also means that when information is put before our attention, we must ask the FATHER within us to show us whether or not it is true and ask for the Father to give us the verification we need for understanding the Truth in all information and situations which HE puts before us. THIS means we must have the courage and the determination to conquer the fear, apathy and ignorance within our altered ego to ACHIEVE THE WISDOM OF KNOWLEDGE OF TRUTH!

Universal Truth is everything we need to know to make it a foundation of our Life Vision, since knowledge on Terra-Urantia is fundamentally based on Lies and Half-Truths.

## II. The Highest Commandment Of The Law Of God Is:

You will Honor God as the Ruler of the Human races and follow His Laws for He is the "King of Wisdom". And to do this, we need to know His Laws in their clarity.

### **I. You Shall Have No Other gods Than The Creator God Before You And Abide With The Laws of Creation which Encompass All. Also known as "THE LAW OF ONE".**

This means we must recognize that our soul existence and our life on this plane is only possible by the wondrous grace of God, our Creator. We must recognize and honor HIS HOLY PRESENCE within us AND ALL THAT IS, because it is by HIS HOLY GRACE that we shall be able to receive His guidance and instructions for WHAT our service is to God and The Creation to maintain the glory of light and love and life in constant unfoldment of the glorious mystery of the ONE. In other words, WE will learn to understand and be always connected with the ONENESS of ALL THAT IS in Creation.

## 2. You Shall Not Make For Yourselves Idols And False Images To Worship As gods, For Therein You Give Power Into The Hands of Evil.

This means that there is NOTHING in material manifestation for us to worship as our GOD. There are no temples or churches, deities or crosses that need be the places or images to worship in or of. Nor are there any priests, ministers, rabbis OR ANY OTHER HUMAN who may act as representatives BETWEEN us and God. EACH and every one of us Human Beings carries with him the TEMPLE OF GOD WITHIN HIM! We are the temple. And so with this truth in mind we might ask ourselves, WHERE do WE take God in our life journey?

So we must not place the attainment and hoarding of "worldly" treasures above the attainment of our spiritual wisdom and perfection lest we "die" in the darkness of spiritual poverty. A good example of this false image of "worship" is quite prevalent now in our societies and that is THE WORSHIP OF GOLD (EVIL MATERIALISM). If we make the accumulation of gold (money) our first preoccupation for the sake of having more and better "things" and possessions, we are pushing God out of HIS temple and the Anti-Christ will become our constant bedfellow, urging us to consider ONLY our material desires, promising us greatness and importance ABOVE our brothers, so that eventually God within us becomes but a glimmer of what was once the flame of our eternal GOD EMPOWERMENT within. And if WE allow our Altered Ego POSSESSION by the Anti-Christ to rule our being, the Anti-Christ will not stop until our flame of life is extinguished and our spirit is left ALONE and naked to stand before self and God in the agony of self-judgment of the transgressions against HIS HOLY PRESENCE.

## 3. You Shall Love The Lord God With All Your Heart, Soul And Being (You Must Love Thineself As God And God As Self).

This means that within the Christ Circle of Infinity, which is the Christ Consciousness of ONE, we must recognize the tremendous and Wondrous Love that our Lord God has for us to allow our experience in HIS kingdom of life unfolding. We and ALL THAT IS are but the reflection of HIS LOVE and JOY of The Creation before him. We are his co-creator in the infinity of The Creation and we are the co-creator of HIS jubilant Self-discovery within the unfolding manifestations of the mystery of the ETERNAL ONE. So when we despise ourselves or another, we despise the very SPIRIT of LIFE ETERNAL and it all exists within US. You see, OUR Great Central Sun, The ONE Eternal Light is beckoning to us: I AM THE LIGHT, I AM THE JOY, I AM THE LOVE, I AM THE TRUTH, I AM THE ADVENTURE, I AM THAT I AM...AND SO ARE YOU! YOUR TICKET TO THE ETERNITY THAT I AM IS YOUR LOVE OF THE HOLY SPIRIT OF LIFE WITHIN SELF AND ALL THAT IS!

Also remember that in our physical world, we have a physical body which we are given to use to house OUR SPIRIT OF GOD WITHIN. We must take care of the needs of the body with proper food, water, clothing, shelter, exercise and rest so that we remain vibrant, clean and healthy in order to perform, with honor, the service of GOD. So too, we must not knowingly "poison" the body with the ingestion or inhalation of devastatingly harmful and addictive "drugs" whether they be of "legal" or "illegal" status by Earth standards. The spirit of God within us needs no "mind" altering to connect and commune with THE HIGHEST DIVINE LIGHT OF THE ONE ALL THAT IS.

#### 4. You Shall Not Use The Name of God Irreverently, Nor Use It To Swear A Falsehood.

This means we shall not cast BLAME against or curse another IN THE NAME OF THE FATHER in our thoughts, words or deeds. We must take full responsibility for our own errors or transgressions against self or others. And so when we blame, curse, resent and condemn another being we are ALSO blaming, cursing, resenting and condemning GOD our Creator, who exists as the flame OF IMMORTAL LIFE WITHIN US and WITHIN ALL OTHERS. So as we cast outward the blame of irresponsibility and denial, it must return to us UNTIL the lesson is learned by US the one who is the creator of the transgression in the first place upon THE ONE self.

Also, we must not knowingly and purposely deceive or lie to ourselves or others in the name of OUR HOLY FATHER. So when we say, "I swear this to BE the total truth in the NAME OF GOD", we had better KNOW that to be a factual statement or we have dishonored GOD'S SACRED NAME for our own selfish altered ego means.

#### 5. Remember God's "DAY" And Keep It Holy.

Within the "so-called" Christian Bible, this law has been interpreted as "A" day and the day that was chosen by HUMANS was the one called SUNDAY and also called "The Sabbath". This was the day which HUMANS said that NO work could be done and we must go to THEIR Church and pray, repent and give thanks because this was God's day. This is not correct because ALL days in the Kingdom of God and The Creation are HIS. This means we must keep ALL of our Days HOLY in reverence to THE DIVINE HOLY ONE PRESENCE OF GOD WITHIN ALL OF THE CREATION. EVERY day we must, as a part of our prayer, acknowledge and give thanks and HONOR unto God and The Creation for ALL the blessings of abundance, Wisdom and LIFE which THE FATHER WITHIN US has bestowed upon us. Remember this about the true purpose and POWER of Prayer and Meditation. PRAYER is Asking for guidance from the Father within for WHAT

WE NEED TO KNOW IN ORDER TO SUSTAIN IN HIS SERVICE, "AND IN ALL THINGS, FATHER, NOT MY WILL, BUT THINE WILL BE DONE". MEDITATION then is RECEIVING that information from the Father within to sustain in HIS service. Eventually, WE will ALL be in a constant state of meditation and communion (mutual participation or sharing) with the Divine Father within.

## 6. You Shall Honor Your Mother And Father.

This wondrous Law has most often been taken only in the quite literal sense. AND it is true, we must honor the ones who were the vehicles for our SOUL being sent here by the Grace of God, THE SAME AS WE WOULD HONOR ALL THE BEINGS OF LIFE CREATED BY OUR CREATOR GOD AND THE CREATION. This means that as a babe and child we are dependent upon our parents, or others, to sustain us physically in the very least. There is also the tremendous responsibility that those who choose to be "parents" -- defined as "A Father or Mother; or any organism that generates another; a source or cause" -- have. THEY are also choosing to be teacher and guardian for us, one of GOD'S CREATIONS. They are also entrusted by GOD our Creator (whether THEY know it or not) the responsibility of giving US the tools to become self-sufficient and sustain in HOLY GOD's service for the remainder of this life-time. This is why in the more spiritually aware Kingdoms of God, ALL beings are NOT given the responsibility for the procreation of the species.

## 7. You Shall Not Murder Your Fellow Man.

In the Bible of the "so-called" Christians, this Law is written simply as "Thou Shalt Not Kill" which leaves room for misunderstanding of interpretation. What this law means is we shall not WISH death upon another human being of God in OUR THOUGHTS as well as we shall not commit physical murder of another human.

This rule does not mean we cannot defend ourselves and our family if our lives are threatened, because that is SUICIDE which is SELF-MURDER and so also against God's Laws. We must not ever choose suicide of our body because we feel worthless and "can't" go on, because we dishonor the life-force of God within us. Only God within us must decide the end of a physical life-stream. That time will only come when our purpose and mission are accomplished so that the process and Divine Plan of God for our spiritual growth will not be interrupted. The remorse of the soul is oftentimes much greater AFTER the suicide of the body is accomplished than in the perceived "altered" ego illusion of suffering BEFORE the life-stream is terminated. Just remember that when we honor God within ourselves and ALL THAT IS and truly understand the laws of balance given by our Divine HOLY ONE, we would never consider the self-punishment of suicide. We will simply CHERISH every living breath we take in the Gift of LIFE of God and The Creation!

## 8. You Must Not Commit Adultery.

In the higher realms it is a very serious and joyful commitment and is called DIVINE UNION. In this way HE planted the seed of JOINT responsibility of this husband and wife to each other AND to any offspring they produced. This is why Marriage is to be considered one of the MOST serious and SACRED commitments TO GOD!

Nearly 2000 years ago when the Master Jesus, Esu Immanuel was asked about the commitment of marriage and the rights of men and women. This is what he said:

"All good things were given unto you and you received the Laws according to which you are to live. You should adhere to these and additional laws, so that you shall prosper on Earth and have peace in your families; *remove the power of the old law that women shall be subject to man, since she is a person equal to man in spirit respect, and has equal rights and obligations.* There are many distortions in the laws since they were given forth by God and the Celestial Sons, for men have built them to be suitable unto themselves.

Further:

"The bond of matrimony between man and woman should be permitted only if both are of mental competence and capable of leading a marriage in accordance with the law.

"The inability of a wife to bear children, or a man's inability to sire children is no reason for divorce, nor does she or he deserve other opinions or actions.

"The only reason for divorce is that of adultery, that is the destruction or endangering of spirit, the body, or the life of the members of one's own family unit. If a person is divorced by his own actions of adultery, he should be sterilized, for he is unworthy of life and its laws for he has responded to the selfish lustful drives of pleasure-seeking and has cast aside all responsible behavior". (End of quoting)

Now, in the literal translation in order for ADULTERY to occur, then one or the other or both of the two adulterers would have to have made the vow of marriage. In God's Kingdom of Truth, this vow of DIVINE UNION made between two, a man and a woman to live together as ONE, is taken most seriously indeed because it is a commitment made to **THE FATHER WITHIN, EACH TO THE OTHER for that entire life-stream.** It is a contract with GOD rather than a legal contract of the human experience. This means that a man and woman who cohabit together as "lovers" without a "so-called" legal contract **must make THE SAME COMMITMENT** to God as those who have the "so-called" legal contract, whether THEY realize it or not. It is NOT necessarily always a contract made to God to

PRO-CREATE the species because many who choose DIVINE UNION may not choose, be able, or be qualified to fulfill that (pro-creation) service to THE ONE FATHER. But both "lovers" STILL HAVE THE SAME RESPONSIBILITY (as a "legally" married couple) for the offspring they may produce. If they only choose cohabitation because of sexual lust or other selfish reasons, they have, thus, denied THEIR responsibility to GOD, and they will suffer the consequences of their actions at the hands of evil.

Does this mean that DIVORCE goes against the laws of God and The Creation? YES AND NO! You see it depends on the TRUE circumstances experienced by the divorcing couple. For example: Since our commitment in life is always FIRST IN SERVICE TO GOD, then ideally, our chosen partner in marriage must support OUR commitment as well as his/her commitment to THE HOLY FATHER.

### 9. You Must Not Steal (Materially or Emotionally).

This law does mean literally that we must not **steal**. And it also means, we must not steal the trust and good faith of another by lying to them about our true motives and intent. Malicious LYING and STEALING are opposite sides of the same coin.

Here are some examples of various forms of lying and stealing: If a man falsely tells a woman who is a virgin that he LOVES her and wants to marry her, but all he really wants from her is a sexual encounter, he is misleading her. If she in good faith falls "in love" with him and also falls for the trap of his "false" promise to her and succumbs to his pressure to express "their love" physically before the marriage vow is made, and then he abandons her, he has essentially "stolen" her heart, her innocence and her chastity for his own lustful, selfish intent.

Even if the woman wisely refuses his sexual advances, and finds herself rejected by him, he is still guilty of lying to her WHICH IS STEALING FROM HER EMOTIONALLY. The big difference in these two scenarios is that, although she has been robbed emotionally, at least she doesn't have the "guilt" of dishonoring herself by breaking the laws of God and giving away her chastity to an unworthy man.

Here is another example of STEALING the innocence of another. Stealing in itself is a "sin" against God's laws upon only the one who steals, BUT when one succeeds in stealing the innocence of another, what he has essentially done is WILLFULLY AND BLATANTLY lied to him/her, so thus he has enticed and manipulated the other to also BREAK THE LAWS OF GOD AND THE CREATION! So in order for innocence to be "stolen" from another, the person "stealing" must be doing so knowingly and blatantly with the INTENT of manipulating another to fulfill his own selfish means and the victim has to guilelessly trust the person.

## 10. You Must Not Covet Or Envy That Which Belongs To Your Neighbor.

Let us first define the words "covet" and "envy". **Covet** means: "To long for something belonging to another". **Covetous** means: "Excessively desirous (of something); greedy". **Envy** means: "1. A feeling of resentment or discontent over another's superior attainments, endowments, or possessions".

So the literal meaning of this Law is that we must not, because of our own insecure/inferior feelings and lack of self-worth, long to have something another has, such as money, a new car, a skill or talent. And then on top of longing for this "object" another has, we must not then resent the person who has attained that which WE feel we desire, but have not created, exactly because of our insecure/inferior feelings and lack of self-worth.

What transpires when we become covetous and envious is that we become wrapped up in our greed and resentment, and will not be taking "personal responsibility" for OUR manifested illusion. We will continue to create the perceived "lack" and eventually will be consumed by the effects of covetous and envious feelings, which most often result in the various manifestations of "Self-punishment", i.e., anger, guilt, criticism, jealousy and depression.

## 11. You Should Not Impose or Force Your Free-will Upon The Free-Will of Another. Also known as The "Law Of No-Interference".

This Law was given forth by God so that the free-will and soul-evolution of each fragment would not be infringed upon without permission from GOD WITHIN, especially by the adversaries of God with more awareness of their power. This is each fragment's GOD-GIVEN protection so that there is justness in their individual process of God potential unfoldment toward THE ONE.

## 12. You Must Not Judge Others, But You Must Wisely Judge All Behavior And Actions Which Are Contrary To The Laws Of Balance Of God And Creation.

"JUDGE NOT FALSELY LEST YE BE JUDGED FALSELY. For with whatever judgment you judge, so will you be judged, and with whatever measure you measure, so will you be measured. Therefore judge according to the logic of the Laws of Nature, which are from The Creation, for they alone are true and accurate".

## 13. As Ye Sow So Shall Ye Reap. Also called "The Law of Cause And Effect".

Now this is the Law that most choose to ignore or misunderstand when they do not want to take personal responsibility for their manifested experience, perceived "good" and/or (especially) "bad".

#### 14. You Must Honor All Commitments Made In Service To God, The Father, The One Within.

So what are the commitments made in service to GOD versus commitments of this manifested illusion. Our MOST IMPORTANT commitment in service to GOD is to WISELY understand and obey THE LAWS OF GOD AND THE CREATION. This is THE excellent way for honoring self and GOD within ALL others in service to God and The Creation. Simply, UNDERSTAND AND OBEY THE LAWS OF GOD AND THE CREATION. We have made this commitment difficult unto ourselves and it need not any longer be so.

#### 15. You Must Obey The Wisdom Of God For The Responsible And Balanced Procreation of Your Species.

The Commitment of Marriage by A MAN and A WOMAN To God is one of the necessary components to also becoming a PARENT for God which means pro-creating our species.

Now the DIVINE and SACRED "act" which was created by GOD for the procreation of the species we call "sexual union". God created THIS DIVINE UNION to be performed between ONE man and ONE woman specifically for maintaining the balanced level of the species for each given planetary system. Now the "fallen" ones or adversaries of GODNESS have completely perverted and maligned this once "sacred" and "divine" act that at one time was DONE with complete LOVE and DEVOTION to THE FATHER within each partner, so that it (sex) is now called "a birthright" to be done often, with impunity and with MANY partners of either sex and without consideration of LOVE or responsible procreation. This ONE abuse of God's creation has nearly destroyed our species! Let us quote once again from ESU IMMANUEL SANANDA:

"The act of marriage and procreation must have the highest degree of pure intent and preparation, for upon these bonds and restrictions will rest the preservation of mankind as a species upon the planet. If everything is done and adhered to, justice and peace will come to all mankind, and life in the human form can be preserved.

The sexual "act" was specifically designed to be performed by ONE man and ONE woman who had committed THEIR DIVINE LOVE AS ONE in the union of marriage, ordained by GOD. Through this union OF LOVE, the act of sexual intercourse between a husband and his wife for pro-creation was a most sacred and honored responsibility, an extension of their LOVE and COMMITMENT TO GOD in his service as PARENTS of HIS Children.

The following BEHAVIORS are specifically and undeniably AGAINST OR CONTRARY TO THE LAWS OF GOD AND THE CREATION:

1. Any Homosexual *sexual* activity between two or more men is strictly forbidden.
2. Any Homosexual *sexual* activity between two or more women is strictly forbidden.
3. Any Bi-Sexual *sexual* activity between two or more men and women is strictly forbidden.
4. Any Anal (Sodomy) *sexual* intercourse performed between any persons, male or female, is strictly forbidden.
5. Any *sexual* activities performed with ANIMALS (Bestiality) by any human is strictly forbidden.
6. Any *sexual* activity performed by ones closely related within the same family line (Incest). For example: brother and sister, father and daughter, uncle and niece, aunt and nephew, cousin and cousin, mother and son, grandfather and granddaughter is strictly forbidden.
7. Any *sexual* activity performed by any (male or female) adult upon or with any child is strictly forbidden.
8. Prostitution--the act of offering oneself, man or woman, to another for sexual relations in exchange FOR PAYMENT of same--is strictly forbidden.
9. Any Sadistic or Masochistic *sexual* practices performed by anyone or ones upon self or others is strictly forbidden. **Sadistic**: "1. A tendency to take delight in being cruel. "Masochistic": "1. A condition in which sexual gratification depends largely on undergoing physical pain or humiliation. 2. A tendency to derive pleasure from one's own suffering".
10. Any voyeuristic (one who is sexually gratified by looking at sexual objects or acts) activity or **any participation** in pornographic (sexually explicit and obscene) materials, i.e., movies, magazines, books, "artwork" and objects is strictly forbidden.

**16. You Must Do Unto Others As You Would Have Them Do Unto You. Also called "The Golden Rule".**

The GOLDEN Rule. How true it is that if ones would really think about how they treat one another, and consider that they are ALL ONE, most of our petty "perceived" differences would dissolve. Let's ask ourselves how we, when we honor the spirit of God within, truly like to be treated by others.

Here is a start : With respect, with reverence, with honor, with worthiness, with enthusiasm, with patience, with tolerance and understanding, with forgiveness, with kindness and courtesy, with caring, with appreciation, with generosity, with interest in our conversation, with love, with consideration, with honesty and integrity, with trust, with friendship and with harmony.

Now, do we treat others in the same ways described above, HOW we would like to be treated? Do we even treat ourselves in the same ways described above? If WE do not even HONOR ourselves, how do we expect to receive HONOR and respect from OTHERS? Let's treat others honorably and with integrity, kindness and tolerance and EXPECT that they will treat us the same. If they DO NOT treat us with the same respect, let's HONOR ourselves enough to recognize their transgression, call it to their attention and then leave their presence.

### 17. Evil (The Adversaries Of God) Must Always Bear A Sign Of Their Evilness. (By Their Fruits You Shall Know Them).

One of the biggest "signs" of the evil ones is their HYPOCRISY:

"1. The pretense (pretending) of having feelings or characteristics which one does not possess, especially deceitful presumption of virtue.

2. One who pretends to be pious and virtuous without really being so".

### 18. You Shall Not Commit The Act of Slavery Upon Any Human Being of God.

This means we must not DEMAND by force and fear to control, confine, use, or manipulate another human being to do any service or work for us, against his will, without giving him FAIR compensation. This also means that we cannot BUY or SELL another human being as if he/she were a product WE own. This includes OUR CHILDREN. Babies and children are not "products" to be created, such as by "in-vitro" fertilization, or given to be birthed by a "surrogate" mother. If a couple are unable to physically pro-create, then they have a choice: they can ADOPT a homeless or unwanted child, or they can choose not to be parents at all. ADOPTION of another's unwanted or parentless child is one of the most LOVING and UNSELFISH acts any competent and caring couple could do in service to GOD. Not all couples are or were meant to pro-create! It is not punishment from God. It is the responsibility of any "barren" loving couple to recognize that pro-creation is not their function at this time. But if they desire children, then they must understand what an HONOR it is to accept the nurturing care of one of GOD's children who has no one else to love him/her!

One of the most painful and degrading terms we humans have labeled those children who are born "out of wedlock" is "bastard" (which means illegitimate

according to HUMAN LAW). WE must now KNOW that in GOD's kingdom THERE ARE NO BASTARDS. These "born out of wedlock" children are as precious to God as any other child born with "married" parents.

It can not be deny that all these aforementioned considerations--or understanding of the workings of Creation--fundamentally elude mankind here upon Earth. We, Humanity, are a part of Creation, and failing to live by and within this knowledge can only result in the creation of civilizational patterns that are out of phase with Mother Creation.

Alignment with these Laws-Principles is that which is intended in this work for the founding of a new Civilizational Matrix wherein creator-Man and Prime Creator will become as ONE, in a constant quest for oneness. We need to correct our earthly human ways, especially in the religious and sociocultural fields, within our Pe-Esute-Aton and on Terra-Urantia as a whole.

ALL OF THESE LAWS MUST BE INTRODUCED INTO CONSTITUTIONS PREAMBLE OR ANNEXED TO THEM AS A CHARTER WITH THE STATUS OF MOTHER-PRIMARY LAW.

### Additional Constitutional Provisions

The following precautions must be strictly taken, observed and rooted in the Constitution(s):

- The aforementioned Universal legal provisions must be incorporated into the Constitutions of the Federate States.
- Any Constitutional Amendment must be put to a referendum and receive a qualified majority of 75% of the total electorate and three-quarters (3/4) of the states; and the Federal Grand Supreme College must be consulted on any matter concerning the amendment of the Constitution before it is submitted to a citizens' initiated referendum.
- Any potential candidate for a supreme political office, as well as for other key offices of the Federal State or the States of the Federation, must, if married, be part of a **single-national mated couple**. This implies that, regardless of the nature of the couple--whether mixed or not--neither partner may hold any nationality other than that of the country wherein they aspire to assume the highest offices.
- Dual citizenship and pluri-nationality (multiple citizenship) are expressly prohibited in the Constitution. A citizen's allegiance must clearly lie with a

single Nation upon this troubled and devious world. The offspring of couples with multiple citizenship will enjoy all the benefits of citizenship except for the political rights of eligibility and voting if they choose a nationality other than that of the Nation in point.

### The Citizens' Initiated Referendum

The right to Citizens' Initiated Referendum must be expressly and unambiguously secured by the Federal Constitution.

Major acts, such as amendments to the Constitutional Law, should only be ratified by referendum.

Particularly with regard to Federal Institutions, citizens have the right to direct intervention to exert influence over the course of events in case of need.

The replacement of Federal Administrators and Representatives is carried out through a referendum initiated by the electorate involved.

### LINGUISTIC UNITY AND CIVILIZATIONAL FOUNDATION

The following excerpt has been selected to provide a brief insight into the history of humanity in the crucial field of language and to emphasize the need for a single lingua franca<sup>8</sup> within the context of the new civilization envisioned in the present Treatise.

"Your Old Testament of your Bible (and other "bibles") will tell you of the Tower of Babel. The point, chelas, was not to have a disoriented tower of babbling people all speaking different languages -- it was built in the area of Babylon and was a launch tower! Just like you have these days launching pads for shuttles on sites in Europe and America among others! To involve human-mankind in building such a structure was about the worst mistake made by the "visitors" in those early days. You couldn't and didn't get along even then.

According to Christian traditions, Nemrod reigning over the descendants of Noah, had the idea to build in Babel (Babylon) a tower high enough for its top to reach the heaven (the throne of God). But God defeated this project by introducing "confusion" (diversity) of languages.

---

<sup>8</sup> A lingua franca is a common language or bridge language used for communication between speakers of different native languages.

At that time you still had only ONE ACTUAL CIVILIZATION. So, it was decided that it would be wiser to split up that one civilization and its languages. This period of activity lasted half a millennium and was a period of total chaos. I did not say you only had one race -- I said "civilization". After the split-up the various people of similar nature and identity were either transported or migrated. Since the global land masses were originally in connection but terribly out of balance on the orb, measures had to be taken to stabilize and rearrange for a better stability in both balance of the orb and the stability of the orbiting planet.

Remember, please, that we speak here of 3450 B.C. as to the above measures and actions. There had been humankind on the planet for eons before this event within your time of historical calculations and data were recorded. So, much of the history was oral and became myth -- some misinformation but also much truth. The area of the time of chaos of which I just spoke was within the peoples along the Nile River -- for that is where a lot of us had our beginnings of interrelated functioning. Don't concern about that, please, or you will be distracted from the important information in favor of the mystical. STOP THE MYSTICISM!

It was along the Nile area where the first language of the day and place was recorded. This does not mean that things were not taking place in an even more advanced state in other places.

*Aton Michael, Christ  
Excerpt from Phoenix Journals N° 116*

Only one conclusion emerges from reading the preceding excerpt: that hu-mankind upon this orb has, from the very beginning, inherited a single language (a unique wording)--that of so-called ancestors--and that this situation of multilingualism upon Terra, and particularly in Fe-Esute-Aton, is a cumbersome, retarding legacy imposed by those referred to as the forefathers, in a selfish attempt to maintain control over Earth's humanity. Therefore, maintaining this factual situation is not at all in the interest of peoples, and certainly not upon the continent of Fe-Esute-Aton (Africa), where the issue is most acute. It is essential that we take swift action to move toward the adoption of a single language for the entire continent. Communication and understanding become easier and natural if all individuals within a Civilization and humanity share a single language.

The need to reduce the number of languages in use on the continent is imperative, and beyond that, the choosing of a world language--one of which all Nations should promote proficiency by their citizens--is required. As long as the goal remains clearly

the evolution toward a Lighted Brotherhood of Men and Women of this world, Linguistic Unity will constitute the inescapable Civilizational Foundation.

Can anyone find it normal, acceptable, that the Esute-Atonla cannot express selves in a continental language that is understandable to and by all its children ? Even the colonial foreign languages accepted by countries upon the continent fail to reach, in terms of comprehension, even the majority of residents. And even if we manage to reach 100% of the population in these various languages, peoples will remain in division, misunderstanding and prejudiced against one another, since there will be different linguistic groups corresponding to the number of foreign spoken languages-- that is, five (5) in total. Moreover, it is this kind of manipulation that occurred during the colonial period and has continued since the beginning of the neocolonial era in our various countries.

We must insist in Pe-Esute-Aton on a Linguistic Unity that will serve as the cement for a Political Unity at the foundation of the new enlightened Civilization, as part of a bold move on the path toward the emergence of a new Continental Nation. The multitude of languages is not an asset--far from it--but rather a factor of division skillfully maintained by interests that rely on this to rule.

As has been sufficiently documented and proven by several authors, including Mr. Cheikh Anta Diop,<sup>9</sup> all languages of Pe-Esute-Aton originate from a single linguistic source. However, we need not return to that source, but rather forge a new path toward a single linguistic source--this time chosen deliberately in the interest of Unity, Coherency, and Cohesiveness within the new Civilizational paradigm.<sup>10</sup>

**One People, One Language, One Civilization.**

### THE INALIENABLE RIGHTS OF ALL PEOPLES

Before proceeding further, let us bring certain guidelines to the forefront of minds to help people truly see a little more clearly and stay focused on this journey of transfiguration. To do so, we must all be reminded of our inalienable rights as residents of this World. And this unified call for rights applies to all peoples living upon the surface of earth who have been deprived of their freedom and dignity from the very beginning. They are the following.

1. *This planet, Terra-Urantia, is the home of all its residents, on an equal footing.*
2. *Peoples living upon it are children and caretakers of the planet, their Mother.*

---

<sup>9</sup> Cheikh Anta Diop was a Senegalese intellectual. As the author of works on history and anthropology, he sought to highlight the contributions of Africa--and Black Africa in particular--to global culture and civilization.

<sup>10</sup> World Vision, pattern, mode of thinking of the new Civilization.

3. *Waters, rivers, lakes, and forests are under the responsibility of the Peoples, the Civilization as a whole.*
4. *The Gold, platinum, chromium, copper, iron, uranium, tin, aluminum, oil, natural gas, and all other elements in the subsoil of Terra-Urantia are its possessions, over which the Peoples share custody and are its "usufructuaries."*
5. *Everything that grows on Terra is under the direct responsibility of this Terra's residents.*
6. *The beaches, the mountains, and the sky above our heads are under our responsibility.*
7. *Wild animals do not belong to us or to anyone else; they belong to the Planet, and we are their brothers, caretakers, and protectors.*

None of these things belong to politicians, governments, or any corporation that has illegally claimed exclusive rights over them.

Peoples have been dispossessed of their lands by governments. Their life forces are enslaved and exploited with contempt. We, the peoples, have a duty to pull ourselves together and regain control in order to make better use of it in line with Divine Wisdom.

## DEMOGRAPHY AND NATURAL RESOURCES

### 1. The Demography

At this stage of the statement of facts, what is imperative for the world population to grok is the true nature of wars currently raging on planet Earth. It is crucial that mankind acknowledges the fact that these wars are not directed against any particular nation or race, nor are they solely aimed at controlling natural resources, as projected by so-called authorities on the matter. Not only do they aim at controlling these global resources, but above all, they account for one among other means implemented with the ultimate goal of depopulation, a drastic reduction of Earth's population (by approximately four-fifths). Namely, with a population of ten (10) billion people, for instance, the goal would be to leave merely two (2) billion survivors. If you think it through, you will see a logic--albeit a scary one--behind this approach, and this is : No matter how abundant a planet's natural resources may be, they are by no means inexhaustible, and the foremost of the coveted resources on Earth--and we do not discuss it enough--is WATER. Yet, at the pace humanity is expanding--with all its flaws--it will likely reach a huge figure in the coming decades, assuming that Terra agrees to withstand even more damage beyond what she already receives in abundance from ungrateful hu-man. You can therefore logically deduce

that the tiny minority, which considers selves masters of the New World Order, is planning a major reduction in the global population alongside a stranglehold on resources in order to keep the Planet under their total control for as long as possible. Since mere control of wealth is powerless in the face of a revolt by a growing population crushed by contempt and misery.

Twenty (20) billion people on this Terra, which already struggles to support about eight (8) billion officially, will be impossible to manage--both by a hu-mankind itself remained immature, and even more so by its invisible Rulers, who are utterly limited and helpless at this advanced stage of planetary imbalance, and Mother Earth, who has already suffered enormously from their mistreatment. The fewer of us there are, the easier it will be to exercise control. These are the reasons--logical, incidentally--that explain the attitude of the criminals we are facing. Humankind of this material world would therefore do well to wake up and quickly come to terms with the fact that only a return to the Wisdom of the Government of the GREAT CREATOR will allow for the salvation of this humanity. Because otherwise, it is the anti-Divine Alliance--which has reigned over this world for far too long--that will prevail, and this for the single, inescapable reason that when faced with, or trapped in, an anti-Christ rebellion, Christ path alone allows for triumph. Otherwise, the peoples find themselves trapped in a struggle between rebel factions of the same ilk, leading to the inevitable outcome of civilization's self-destruction.

Therefore, population control and wise and intelligent management--among other things--of the natural resources of a territory inhabited by a given people, and of the planet as a whole, play a central role in the Sustainability-Reliability-Viability of a Civilization. Any sensible and reasonable hu-man is expected to incorporate this lesson into any approach to civilization.

It is undeniable that the Terra allows hu-man to establish crop fields and produce the living needs--namely, plant and animal products. It is no secret that the soil itself follows a natural cycle of regeneration that varies depending on the types of seed. That it is only through these farm products that mankind is able to feed the masses is a reality that is not about to change. But the problem is that with a rapidly growing population, there are more mouths to feed, which as a first step leads to extensification in the farm sector, consuming more land. The next stage leads to intensification in this sector, with its abuses involving the use of unnatural chemicals that ultimately deplete and contaminate the soil, just as we are witnessing right before our eyes today. Worse still, we are left with genetically modified organisms (GMOs), among other things, invading our foods and dis-easing people--a direct consequence of the irresponsibility in which humanity wallows, allowing itself to be led by the nose by the Globalist scum.

Furthermore, it should be noted that for things to proceed in harmony with the principle of natural balance, a populated area--or a planet in general--must maintain a certain ratio of populated to natural areas so that both natural elements and humans can fulfill their respective roles without one encroaching on the functions of the other. This is far from the situation we face today. In any case, Nature takes precedence over hu-man, since mankind depends on Nature for his survival, and not the other way round.

Maintaining demographic growth at an optimal, balanced level thus enables a given territorial Life Community to ensure its autonomy and food self-sufficiency, as long as this Natural Law is respected. It is vital that each Life Community be able to produce, without any external input, all it needs in terms of farming, since this lies at the very foundation of People sovereignty. Failure to strictly observe and control these factors leads to overpopulation, that ends up consuming a significant portion of the ecosystem upon which the very survival of the residents depends. The resulting consequence is that demographic pressure negatively impacts the capacity for food self-sufficiency and leads to overcrowding that is difficult to accept in the long term. All of this will lead to a need for territorial expansion and thus the desire to colonize other lands, causing wars, further suffering, and encroachment upon Nature.

Today, despite the obvious challenges caused by an overpopulated planet--which, it is true, is currently more acute on the Asian and European continents--and contrary to all common sense, citizens of certain continents and ethnic groups are officially urged to conceive more children. And all the analyses proudly present projected population growth figures for the next 50 years (2 billion inhabitants for Pe-Esute-Aton, apparently) as if mankind and the Planet itself could survive this monstrous imbalance.

We are in year 2018 and while the world population is estimated at 8 billion people, a UN report (released in 2005, estimate 6,519,636,000 inhabitants) suggests a small increase of 2 billion for 2050. In 68 years, from 1950 to 2018, the population growth figure has more or less tripled, that is to say from 2.5 billion to almost 8 billion upon Terra. In the remaining 32 years the world would have to limit itself to an increase of about 600 million to meet this forecast. A simple and quick calculation proves the improbability of the thing. Clearly, the figures put forth by international institutions are not based on reality. The media is controlled and merely spouts what we are led to believe. The reality can therefore be assessed at a more serious level than the official demographic estimate. Perhaps ten (10) billion inhabitants already reached on Earth.

Thus the world is headed for a disastrous population explosion by any measure. By the very fact that the vast majority of the inhabitants live below the poverty line, and that in these conditions lacking the essentials and trapped in overcrowding, families are conceiving more and more children; added to this that the phenomenon affects more

and more so-called rich Western societies, one can easily get an idea of the hell that it will be in the year 2050.

This civilization must take another route, that of massive and therefore completely free qualitative education policies targeting the people as a whole. These policies must be based on a complete remodeling and refounding of the education system, which must imperatively produce enlightened, responsible and empowered citizens.

**Quality must take precedence over Quantity, since in all cases it is Quality that produces Quantities. It is an immutable Universal Law.**

Therefore, mankind has to determine a demographic threshold beyond which things become unmanageable and commit itself to the path advocated by Law N° 15 of the Universal Laws of Balance, 'You Must Obey The Wisdom of God for the Responsible And Balanced Procreation of You Species.' Our policy must aim for a wise birth control in such a way as to have the joyful support of the Peoples recovered from their subconscious programming trauma by the Dark Brotherhood forces.

**For once the Peoples and their Rulers will be confronted with the redefining of individual and collective Rights and Obligations in the context of a new Civilization more aligned with the Laws of Nature and Creation.**

## 2. The Natural Resources

The relevant question worth asking here to introduce the subject is this:

*Are we asleep to the point of not seeing, even now, the advanced state of rotteness in which our so-called modern Human societies wallow, oblivious ?*

The current global situation cannot be interpreted in any other way than as expressed in the aforementioned issue. To claim otherwise would be nothing but blindness and deafness. Can a normally constituted human being in this world honestly accept the reasoning and belief that our human societies are facing democratic and economic-humanitarian challenges out there on the battlefields of armed conflict? Abandoning the illusion of development, economic and democratic progress as touted in the current global context will spare us serious setbacks that, in reality, have already crossed our doorsteps.

What holds true for the continent of Pe-Esute-Aton holds equally true for the rest of the world, Mankind be molded in the image of THE ONE.

Inseparable from demography are natural resources, of which water is the essential life-giving element. Sustainable water management is linked to demography as is food

self-sufficiency. The more mouths there are to feed, the more complicated and contentious the situation becomes. As for the various mineral resources, there are environmental and moral considerations related to the sustainability of life and the habitability of Mother Earth's surface to take into account. Many have emphasized this point, but they seem to be preaching to deaf ears in the wilderness of human materialism.

What would all the gold, diamonds, copper, uranium, cobalt, and the famous oil and natural gas, etc., in the world be worth if we are unable to sustain ourselves so that we can eventually benefit from them? What would all the precious metals, energy, and technologies be worth if we are unable to access and maintain a viable space and a productive environment whose main elements are WATER, LANDS, THE ATMOSPHERE, AND THE PLANT KINGDOM, which play a major role? These highly prized materials are extracted from our subsoil at a frenetic pace, and most Urantians generally don't even know what they are actually used for.

Under no circumstances are the Planet's mineral and natural resources inexhaustible, and their presence, even in large quantities, on any continent should not serve as an excuse for their overexploitation solely for financial gain, and certainly not for this printed paper-money that has absolutely no value. Paper, nothing but paper.

Has any one ever wondered what purpose these elements produced by Mother Terra serve for her life functions and her own balance ? Because a planet is a living being, and human science is increasingly realizing this, just as it is for human beings or any other being in the relative plant, animal, mineral kingdoms. And if this is the case, then we must perceive all these geological resources, with which we mostly play like immature children with no awareness of the value of things, as vital components playing specific roles in the planetary metabolism. Just as a human being is mortal, so too is a planetary being, physically speaking. This submission to torture of the planetary body produces the same effect as on a human body. It is a matter of seeing things from this perspective and adjusting accordingly.

It goes without saying that Terra is our Mother, and like any normal Mother she will always provide her children with that which they need for their material comfort, at this early stage of life unfoldment. But it must be noted that all this has been systematically done to the detriment of herself so far, since man upon this orb has developed a tendency to systematic devastating grip and stranglehold. We must be in the changing of our behavioral patterns, to have more respect for Terra and ourselves, until we learn to produce these elements on our own through resort to the Advanced Science, that is, the one that Nature uses to create all her needs and ours. And this Science is already available to Urantians, given to humanity by The Creator through Mr. Walter Russell, great scientist of the 1940s. This vital information was confirmed

and extended by the Elders of the Galactic Federation Fleet in the volumes of the series entitled Phoenix Journals between 1987 and 2000.

Therefore, wise and responsible exploitation of these resources must be the rule. We have no idea of the immeasurable amount of time it takes for a Planet, if it ever gets there, to reconstitute its elements that we puncture from its entrails without any regard. The sole trade factor and foreign exchange supply cannot and should no longer be the priority in their exploitation. Actual need and usefulness alone of these materials should prevail, regardless of the field involved. Hence the need for our industries to move towards manufacturing standards that are demanding on the production of sustainable goods and ensuring users autonomy. This has the advantage of reducing use of resources and limiting waste production of all kinds that should, in any case, be systematically recycled.

In the long term, we cannot continue down the same path, one that perpetuates the principles of predation and widespread social injustice that we, as peoples, endure. For a Nation with a strong collective conscience, economic health and strength are only achieved when all its citizens have access to all they need--just what they need, no more--and when their Nurturing Mother remains protected and respected. These resources must therefore be managed responsibly, with constant concern for future generations and a very long-term perspective, spanning hundreds of millions of years.

Therefore, as our civilization progresses toward this balanced and harmonious interdependency among its inhabitants and between them and the Mother, it is really a matter, HERE AND NOW, of wisely controlling the use of lands and water resources, among others, of the planet.

### 3. The Energy

When it comes to energy consumption, humanity relies on resources and methods such as nuclear power plants, hydroelectric power, thermal power plants, oil, natural gas, and so on--all of which are polluting, cumbersome, dangerous, and costly for most users and the environment. These resources are extracted by mining here and there in the depths of Terra and are exhaustible.

Now the question is: what would happen if we continue to frantically drill everywhere we catch a whiff of so-called precious metals or any other raw materials? Are we not risking ending up with giant holes all around that will eventually serve as our graves, since in the end all our habitable and arable lands will be lost as well? The stubbornness with which we continue to drill all around, even into the sea, to extract oil from the entrails of the Mother--even though it plays a crucial role in the balance of the planet, our living dwelling--is staggering and Satanic. Pursuing such a path can

only lead prematurely to the ruin of our Civilization. The vision of a Lighted Civilization as we conceive of it in this treatise on politics and civilization extends over hundreds of thousands, even millions, of years; but if we, as a world, have already so severely jeopardized our own future and choose to continue down the same road, it is clear that there is no point in speaking of future generations who have no chance of ever coming into being.

Take nuclear power, for instance. Proponents and advocates of this technology put forth numerous arguments to justify its continued use, while taking care to omit or downplay the serious problems posed by radioactive nuclear waste, which is harmful to the environment and human life for generations. Furthermore, to date, there is no known technology capable of mitigating, even in the slightest, the disastrous consequences related to this way of proceeding through any process of neutralization and/or recycling; hence the highly criminal attitude of producers of this toxic, unwanted, and cumbersome waste, who bury it wherever as soon as practicable without further consideration.

The most important point about nuclear power is that it is the process most directly opposed to the way electricity is produced by Nature. Life proceeds from the generative-concentrative principle, while death is its counterpart, the degenerative-expansive principle. What is materialized is life in manifestation, generated from the expanding mother-principle, the Outer Space or the Yewe/Yeve. Splitting the atom or the so-called nucleus of the atom to obtain electric power is killing life in order to extract its essence; in other words, halting the process of life in order to incidentally profit from what is discharged and returned to death. As for so-called nuclear (or thermonuclear) fusion, it is said to be a nuclear reaction in which two atomic nuclei combine to form a heavier nucleus. This reaction, it is claimed, occurs naturally in the Sun and most stars in the Universe, where all chemical elements are supposedly created. Except that here we are faced with a statement from scientists of this world who are far from understanding what the true process of Life is. Take a close look at the process by which they carry out this fusion, and you will undeniably see that it will be un-Natural based on a simple, sound understanding of Nature's processes.

In any case, regardless of what is said about nuclear fusion--which is supposedly free of pollution, radioactive waste, and greenhouse gas emissions--both types of electricity are produced through counter-current processes to the ways of Creation. And this is just as true of hydroelectricity, which interferes with--or outright obstructs--the motion of water, the Primal Element of Life, in order to produce same.

Life is motion, motion is electric power, and electricity is Life. As a conclusion : Life Is, therefore Electricity Is. Electric power is not to be produced or created; it is to be captured from the atmosphere using appropriate technological means aligned with

the simple ways of Nature. To proceed otherwise, as we do today, corrupts and destroys life.

As a result of all these human failings, our societies are left with toxic waste that no one wants--at least not officially--and which, more often than not, ends up somewhere in the oceans or on land, often without public knowledge, insidiously and silently ruining people's lives, whether or not with the complicity of government authorities. But who really knows of things we're dragging through the soil of our countries, right next to our residential areas and farmlands, given the zero (0) morality displayed by politicians in the current criminal system that prevails across the planet?

In short, nuclear energy is a technology that inexorably leads to self-destruction due to weapons of mass destruction and toxic waste it produces, which poison humanity. Furthermore, it is a type of technology that, when used for defense, causes severe damage to the DNA of living beings and their environment for generations. This cannot, therefore, be the path of the Civilization, which has fortunately witnessed the serious drift that this so-called scientific and technological progress of the last 80 years has reflected and still reflects.

As for the much-touted biofuels, they are an offence and aberration thrown in the world face, which mankind has embraced--as usual--without any critical sense, in a state of utter absurdity that remains unmatched. To promote them is to serve the same interests of the anti-Christ Globalists and further undermine the future of the Esute-Atonla Peoples, as far as this continent is concerned. And other so-called scientific and technological nonsense are still being introduced into industrial spheres to deepen the imbalance of our so-called modern society. This path is a dangerous dead end, even a heinous crime, toward which we are being led to be distracted while serious issues concerning the very future of the planet are being played out secretly elsewhere in the fields of technology and science, perverted by the Elite few. The lands devoted to crops used for the production of biofuels should be returned to the peoples who are their natural caretakers.

Since the beginning of the 20th century--more than a hundred (100) years ago--advanced scientific discoveries have been made that have made it possible to develop technologies for producing clean energy that is less expensive, or even practically free. And recently, we have seen applications of discoveries in plasma science that are enabling wonderful things for human well-being and respect for nature. These would simply allow us to design engines and other devices that would replace combustion engines and other means of electricity generation, such as nuclear power plants, hydroelectric dams, etc.; this would simply bring an end to oil and natural gas extraction, much to the relief of Mother Terra, not to mention all other sources of

pollution. The impact on lands, waters, environment, and the air we breathe will make a significant difference in the living conditions for people all around the globe.

Resolutions to the energy issue do exist and have been proposed by, among others, innovators such as Nikola Tesla and those who followed in his footsteps. Professor Nikola Tesla led the way in the late 19th and early 20th centuries with remarkable inventions that have long awaited implementation.

This is why our civilization, if it wishes to be enlightened, must intelligently direct scientific and technological research toward human-centered approaches for clean, simple electricity generation aligned with the Laws of Nature--approaches that will provide mankind with more than solar and wind power, as currently conceived and touted. Thus, transportation, factories, public and domestic lighting, and other daily energy needs will be powered by free electricity available for the use of every citizen upon Earth without exception, at no ongoing cost and without harmful consequences for Nature.

**Freedom and Self-sufficiency of a Human society must lie in the preservation and protection of its Nurturing MOTHER, its abode.**

## HABITAT AND HOUSING

Habitat and Housing in the lands of Pe-Esute-Aton, operating under the Lighted Atonla (Divine) Popularism system, will have to set a course entirely different from what has been observed for quite some time on the continent. The systematic use of materials--notably cement and corrugated iron--which are unsuited to the warm climate that prevails year-round in our respective countries, as well as rebars and gravel for slabs and other structures, must give way to better approaches based on ancient techniques observed in old indigenous ancestral dwellings and those from the colonial period on the continent and elsewhere in the world in general.

A first step will consist of reviving the use of adobe--possibly combined with cement--and developing construction techniques that focus on building downward, underground, rather than upward, pending the development of other advanced architectural techniques and materials. This will allow to do without coastal sand, the over-exploitation of which has serious consequences in our coastal cities, where most of our capital cities are located. It will enable peoples to have naturally fresh dwellings in the midst of heatwave zone. More than ever, we need advanced skills built upon the best achievements mastered by our forefathers.

Taking into account geometric forms, such as the sphere and the triangle in its many forms, aligned with the sacred geometry of the Universe, is another matter of prime

importance. Those inhabiting these universal architectural forms will undoubtedly find themselves better off and more connected to the energies of Earth and the Cosmos, since we, the Microcosm, are made in the image of the Macrocosm. This conscious alignment restores peoples to Universal Balance.

We must also consider the development and mastery of technologies such as 3D printing, among others, on a large industrial scale, which will make building work easier and less labor-intensive. This is already well underway in some countries.

Homeownership must be an inalienable right of the individual, and therefore of the entire people; this shall be a national priority. Not only should it be firmly enshrined in the Constitution, but, above all, its effectiveness as one of the four Central Pillars of a Free, Dignified, and Enlightened Civilization should not be subject to any restrictions. This is a program that can be completed within a decade, provided the will and the means are made available. And we naturally are in possession of those means.

In most countries on the Continent, we have clinker (cement), adobe in abundance, and many other materials that we have been selling off at rock-bottom prices for decades without making a significant difference in people's daily lives. A policy of large-scale housing construction in the form of self-sufficient Life Communities will make use of all these natural resources and our abundant human resources, and will allow the entire country, in a thrust of solidarity and unity, to reinvent itself in a very short time. The goal will be to achieve a social level wherein each Life Community consists of families and residents who own their homes, thereby restoring to each person their rights and dignity. The tenant citizen, therefore, has no place in the new society, for this, too, is purely and simply another facet of slavery promoted by a civilization of lies and ignorance.

## THE VOLITIONAL SYSTEMIC AUTARCHY

Or

## THE SELF-CENTERED ECONOMIC ENDOGENEITY

Some definitions of the terms to begin with.

**Autarchy:** *The situation of a country which voluntarily tends to be self-sufficient in economic terms. It may result from the will of a State to modify the social and economic structure free from foreign influences, the refusal of any economic dependency as regards foreign countries.*

**Volition (Volitional) :** *Act of will, manifestation of the will.*

**Endogeneity :** *Quality of what is produced by the structure itself without any external input, as opposed to exogenous.*

Today's global economies are intentionally structured in a malicious way, characterized by an unbalanced and destabilizing interdependency, which allows various forms of manipulation to take hold through international mechanisms controlled by the very conspirators and advocates of the system. Manipulation of commodity prices, rating of corporations on a Stock Market designed as yet another tool to promote so-called financial assets that are not truly financial, investment capital accumulated through theft and predation, etc., allow for the unchecked plundering and/or destruction of the real economies of Nations, whichever they may be. The absurdity is so obvious that it is astonishing to see how few people manage to recognize the deception.

What is termed Free Trade, in reality, collides with the fundamental Free Will of Human experience. The excessive, even total, dependency of Western economies--mainly--on foreign markets and resources turns them into paper tigers that will collapse overnight, with severe but ultimately beneficial socioeconomic and political consequences, should the situation be reversed or rebalanced. This severe dependency is veiled under the guise of so-called Free-Trade, which is so highly touted and promoted by obscure, often invisible interests. Multinational corporations and stock markets--instruments of the current predatory economic system--must inevitably and irrevocably disappear if the goal is to build strong, equitable, and sustainable economies.

The pattern as it is structured within the current global economic order is not a free choice made by sovereign states, but rather a perceived constraint that has been normalized in the eyes of the world, one instigated by the system's proponents, yet

whose disastrous consequences fall exclusively on the citizens of the states involved. Thus, this economic road is a choice dictated by others for very specific purposes. And even if we have made it a "conscious" choice, the world economies are in such dire straits that it should have been obvious for quite some time that nations have been misled and led astray from the exercise of the Gift of Reasoning and Free Will to a point of total confusion that leaves the situation the hands of the very architects of the conspiracy, who continue to drag them down even further. And besides, ask yourself how any corporation or economic operator in whatever country--whether developing or not--could freely decide to face unfair competition in its own market from produce that are, moreover, subsidized under the pretext of opening up to another market where it has no chance of thriving. The evidence is right before us.

The mere fact that the clothing worn by Americans and Esute-Atonla, to name but a few, is manufactured in Asia; that the rice and wheat used in baking in many countries in Pe-Esute-Aton are imported from Asia and Europe; that the cotton, coffee, and cocoa grown in Esute-Aton are destined for Western markets; that many staple foods such as bananas and pineapples are almost exclusively intended for export; that all technological and various manufactured goods are supplied by a handful of Western countries essentially under the control of an Evil Globalist Elite, etc., and many other such aberrations, sufficiently demonstrate the inconsistencies and dangers of the system.

All the world's economies produce oversupplies primarily for export purposes, and those that have not yet reached this level of "performance" are, in any case, part of these dynamics. Since the rule is to have a volume and/or cost of imports lower than the volume and/or cost of exports in order to achieve a so-called positive trade balance--which is synonymous with development and performance--it is clear that for some to develop and prosper, others must be constrained in one way or another, or accept the consequences of the dualistic system.

All of these unfair practices have led to a potentially dangerous situation of increased and unbalanced contrived interdependency among the world's economies--a situation that defies all logic--and, above all, to a near-total dependency of these economies on multinational corporations that crush States under the pretext of globalization. This collides with the concept of Freedom and is therefore the antithesis of a fulfilling life community.

A system that is more balanced and more respectful of the Life Principles outlined herein should promptly settle in in lieu of the current one.

The type of economy discussed in this paper is what can and will ensure the Nation's long-term stability and inviolability in this area.

Here is a summary of what this work proposes to Humanity.

Economies built on the principle of Volitional Systemic Autarchy--that is, Self-centered Economic Endogeneity--within large Federal Territories and with an optimal, high-quality Demography under enlightened control.

Contributionism, complementarity, and equality lie at the heart of the concept and presuppose the reasonable pooling of individuals' abilities and skills within Communities to seek resolutions that take into account the needs of each and every one. Beyond this sense of common interests lies the pursuit of an increasingly enlightened Humanity and the promotion of values that make each person a valuable and full-fledged member of society, ensuring harmony and social peace. This is a circular societal modeling underpinned by the principle of Divine Love, which concedes that no link in the circle can be considered weak or deliberately placed in a position of weakness, as every Being is created equal in the image of the Creator. The new perspective offered by this societal modeling will see frustrations and inhibitions fade away, and the individual fully flourish into the balance of his true Being.

Agriculture, infrastructural development (industry, housing, roads, and other sectors), technology, and Science shall be caused to attain a firm Domestic foothold so as not to depend on any external sources or resources. This economy, mindful of the unlimited possibilities of Creation made available by the Advanced Cosmic Science, consciously chooses self-sufficiency in meeting these needs--from raw materials to end-consumer goods--and constantly seeks ways and means to achieve greater progress in Harmony and Balance.

This economic modeling prioritizes respect for and protection of the Planet, as well as fostering a sense of responsibility among citizens. Thus, in the same vein, this same Perception-Sentiment-Thought pattern is naturally directed toward the citizens of other Nations around the World. Not only is each Nation called upon to base its economic fabric on the concept of Self-Centered Endogeneity, but as much as possible, every Life Community must commit to achieving this goal, if not in the short term, then in the medium term.

Here is, thus, the Royal Road (the one that stands far above all others) that mankind must walk and promote in order to achieve a more equitable, stable, and sustainable World Economy. In this way, every individual within every Nation is put to task for the common good; furthermore, this removes any possibility of external influence or economic blackmail and puts an end to fratricidal wars.

## MONEY, BANKING, FINANCE AND LABOR

### 1. Banking And Money

Let it be clearly understood by each one reading this before we proceed any further: the banking and monetary institution is the devil incarnate, sitting upon and feeding on the life force of humanity upon Earth. The very life essence of the human entity within global society has been drained daily ever since we had the misfortune of allowing the establishment of this insidious institution in the West, which, over time, has ended up spreading its tentacles all over the Planet. This domain must be thoroughly deconstructed lest any reform, whatever it may be, fall back under the sway of the same dark forces that are at the root of our hardships as a civilization.

In the following section, we first outline the various facets of the banking and monetary issue. Whereupon it will be proceeded in such a manner so as to ultimately arrive at a system re-devising in accordance with the new civilizational paradigm in projection.

### The Monetary Problem

The very first mandatory step in solving a problem is to analyze it. Every problem is a result, or effect, of a cause. The reason for analyzing a problem is to determine its cause. When the cause of a problem is clearly understood, the solution usually becomes obvious.

Strangely, however, according to our monetary authorities and "experts", bankers, economists, investment brokers, politicians, etc., the subject of money is too mysterious for mere mortals to understand. Such things as the "business cycle", "inflation" and depressions are blamed on everything from consumer, producer and worker "greed" and ALWAYS ON THE PEOPLE AS CAUSE OF WHATEVER FAILURE APPEARS.

"MONEY" is defined as a **medium of exchange and a measure of value**, regardless of the form which it may take. There are two major forms of money: **commodity money** (gold, silver, etc.) and **created or fiat money**. A commodity money system is actually a barter system of trading one commodity with a certain market value for another commodity or service with a certain market value.

Incidentally, no commodity has "intrinsic"<sup>11</sup> value, which only Humans have. All commodity prices in a free market result from the law of "supply and demand". The price of gold, which is probably the most worthless of all metals for human use, is

---

<sup>11</sup> Basic to a thing, being an important part of making it what it is.

artificially established by the "gnomes" of London and Zurich, by which they control the economic health of every Nation.

Created money is the only thing man can create. It is created out of nothing but paper and ink or computer bytes, but represents, or is a claim on, wealth. Created money is *not wealth*. Wealth is that which men produce for human use through the intelligent application of energy to natural resources. Fiat<sup>12</sup> is a French word which means "So be it", and in operation applies to an order or edict by authority. ALL paper money is "fiat" money. However, as part of the Anti-Christ Bankers' semantic subversion to control our thinking, "fiat" is used as a term of approbation, applied to Government issued, debt-free money to obscure and protect their criminal racket of Fed (Federal Reserve Bank) and bank issued fiat debt money.

### Omitted History

In order to understand how the Anti-Christ Bankers acquired their absolute power over the nations, it is necessary to understand some history which has been omitted from our history textbooks dealing with this matter -- for our history books are so devoid of history that we have a myriad of subjects which are left out and buried under the shroud of deceit and lies. Nonetheless, let us consider this subject at hand. This knowledge is also necessary so that we do not repeat it, if we ever get the opportunity of control, AGAIN!

In the beginning, there was no money and there was no civilization. Every man obtained his own necessities of life -- food, shelter and clothing -- through his own efforts in some manner or another. This was probably the only period in history short of that ill-perceived "Eden" that man was truly free and independent. However, this was a very difficult, dangerous and insecure lifestyle at best.

Eventually, there developed a system of exchange of goods and services which we can call barter. In that economic system every man benefitted because he would only trade something he had for something that was of greater value in some manner to himself. For instance, if a person had ten yams and the other ten fish, they could trade five yams for five fish and each would have a complete meal for his family. So there was "light".

It was soon realized that, by specializing, a man could produce a given commodity much more efficiently and trade his surplus with other specialists to obtain all of his needs.

---

<sup>12</sup> An order given by a person in authority.

The value that each man placed on his own produce was primarily a function of the time he spent to produce it, what he spent for raw materials and tools -- AND MARKET DEMAND FOR HIS PRODUCT.

Money is the life-blood of society and performs the same function as blood does in our body, carrying food and oxygen to every cell and carrying away the waste products to sustain life.

Thus, the new engine, of proven design, must be a debt-free money system similar to the tally system of England, and barter practiced by the Ancients.

There is an imperative need to move our Peoples away from the contemptuous Absolute Centralized Government, from the Satanized Religion and Banking.

A STANDARD OF VALUE for money must be established as a reference so that any deviation from it may be quickly detected and corrected. *THERE HAS NEVER BEEN A STANDARD OF VALUE ESTABLISHED FOR MONEY IN THE HISTORY OF MAN!*

After all, every man values every thing differently from every other man and also differently at other times and places. Therefore, the first thing necessary to establish a "Standard of Value" is to determine what the general requirements for ALL "standards" are:

**First**, a standard must have similitude. That is, it must be similar to that which it measures. A standard of weight must have weight, a standard of length must have length, etc.

**Second**, a standard must have stability. That is, its value must remain constant under all conditions throughout the system which it serves. An inch is exactly the same length whenever and wherever it is used.

**Third**, a standard must have commonality. That is, everyone in the system must understand and have, or have easy access to, the standard unit.

### Gold Fails As Standard

If we compare any commodity, and most especially gold, against these criteria for a **monetary standard** with which to measure **wealth**, we find them to be woefully inadequate.

With respect to the first criterion, **similitude**, there is no relationship whatsoever. The value of gold is determined by its weight and purity. While the price of many commodities (coal, wheat, meat, fruit etc...) is determined by weight, the price of

manufactured goods bears little, if any, relationship to their weight, the major cost factor being that of "labor".

With respect to the second criterion, **stability**, we find that gold is only chemically stable, that is, durable. As a commodity in a free market its price would vary in accordance with the law of "supply and demand". As a controlled commodity, its price has been less stable than that of the stock market, and for the very same reasons.

With respect to the third criterion, **commonality**, while many people have gold wedding rings and some have gold fillings, very few have any gold coins which could be used as money.

Thus, it is obvious that of these three criteria for ALL standards of measurement, gold and silver meet none of them as a monetary standard.

Incidentally, the "gold bugs" insist that money, in addition to serving as a medium of exchange and **measure** of value, must also be a **store** of value, which most of them erroneously refer to as "intrinsic" value. **But these are contradictory requirements.** Money, in order to serve its function as a medium of exchange, must be kept in circulation and the faster it circulates, the better it serves that function. If it is "saved" or hoarded, it cannot function as a medium of exchange.

### Time And Money

Since no commodity has all of the criteria to serve as a monetary Standard of Value, what in the world does?

A clue to what this might be is given in Revelation 18:12, 13, which lists the treasures of end-time Babylon in descending order of value. The first are "cargoes of gold and silver" and the last are "slaves and human lives". Yes, the lives of men are the least valuable thing in Babylon. This does prove that we live under Khazarian/Babylonian rule today, when we allow a small club of unbalanced individuals to create paper-money with or without the support of anything to buy and reign over our lives with our consent; when we leave homeless and careless our fellow men under the pretext of lack of income; and send our finest young men to fight, suffer and die in the Anti-Christ Bankers' no-win wars and, even worse, permit helpless, unborn babies to be murdered (abortion) by the millions.

If the Khazarian/Babylonian system is to be overthrown, then its value system must be reversed. Instead of everything being measured by gold or silver, the proper standard should be the **lives of Humans**. And how are the lives of Humans measured? By "TIME"! Yes, there comes to the forefront the **FACT** that the only **REAL MEASURE** of

value is somehow established based upon the time of Humans' lives, or **working hours, etc.**

The price of all things can be, and frequently is, based upon the working hours required to make them and market them. The price of something is often quoted in terms of the average working hours required to purchase it, especially in comparisons between different nations or time periods. In fact, this is the conscious or unconscious means by which everyone determines the value of anything to himself; how much of his life "time" must he exchange for it? Most everyone is already aware of the fact that "TIME IS MONEY". This certainly would clear out financial middlemen and predators right away. As well, politicians who spend their time running after material wealth, for example, would not be able to do that anymore. Everyone would find themselves at the same level, in labor area.

### Standard Of Value

We could arbitrarily establish our monetary standard as one average man-hour of Labor. This new standard of monetary value would be called "Ki"<sup>13</sup> and its 1% division "Kilia" (one cent of Ki), for obvious reasons.

How well does a Ki meet the requirements for a standard ? Let us compare and see.

First, **similitude**. Labor time is the primary factor in determining the price of everything and also the value of everything to each person, as already mentioned.

Second, **stability**. There is nothing more stable than time, which remains fixed through all generations and Nations.

Third, **commonality**. Nothing is more common among men than time, which is distributed to all men equally; 24 hours a day and you can't take it with you when you leave.

Everyone understands time and virtually everyone has its standard of measurement on his wrist or kitchen wall. We measure and regulate our lives by "time". It is, in attachment to "space", the only separation of the species within the third dimension which is ours, so it seems logical to measure progress through that third dimension by our primary commodity -- "**perceived time**". For many things in our dimension, there is no other means of measurement. There is no value in money (Dollar, Naira, Cedi, Euro etc..) which we can place on the work required to produce a lengthy document, nor on the experience, discipline, communications, etc., required to study, research, analyze, understand, and solve a problem. The only cost that can be placed on the

---

<sup>13</sup> Ki: Monetary unit corresponding to one (1) hour of work provided. Life force in terms of lifespan.

effort is the TIME involved to accomplish the final product. Thus, we will find that the KI not only meets all of the requirements for standards in general, but uniquely serves as a monetary **Standard of Value**.

### Function

Ki only refers to the lifetime (life force) of Human. Kilia refers to 1%, one cent of Ki.

The Ki monetary system may be instituted by any governmental authority anywhere in the world and trade could be conducted with any other Ki-based economy at par, since all Ki would be issued against the same standard.

The Administration and money-issuing authority would print, **with a one year expiration date**, as many Ki as necessary to meet its authorized expenditures. These would be paid into circulation as wages to workers-servants of the Administration and to contractors for goods and services. The average wage paid would be maintained at the rate of one (1) Ki/hr.

All products and services are also valued at the rate of one (1) Ki per hour worked or spent and on this basis are carried out the exchanges between the individuals, the various community groups and between the latter and the Administrations.

With the Ki system, taxation to **PAY FOR GOVERNMENT EXPENDITURES WOULD NOT BE NECESSARY**, since the Administration would print all the money necessary according to the Constitution. As previously stated, the Ki would be issued with a one-year expiration period, after which they would become useless. **The ideal situation targeted here is a non-money society, which cannot be trapped in a hoarding dynamic, accumulation of false wealth, so that commodities can rather be stored and exchanged on the basis of this standard of value.**

Adoption of the Ki-Kilia monetary system would produce numerous benefits:

A stable money system based on a Standard of Value which everyone understands.

Elimination of the present legalized system of organized crime, theft and slavery through usury.

Elimination of the tax burden by suppressing of taxes such as PIT (Personal Income Tax), VAT (Value Added Tax) and Corporate Tax, etc.

Elimination of unemployment, since ample money would be available to ensure the employment of each individual member of the Nation as contributors and servants-workers of Administrations, Industry and Life Communities.

The three economic factors which are inflation, deflation and depression, the definitions of which follow, will no longer be possible in such a system.

**Inflation:** refers to a long-term, general, and self-sustaining increase in the prices of goods and services. Inflation is also characterized by the increase in the circulation of money (money supply).

**Deflation:** a general decline in prices observed over a sufficiently long period of several quarters. It is the result of aggregate demand that is not enough to absorb the amount of goods and services produced by the economy.

**Depression (economic):** refers to a serious form of crisis that is characterized by a significant and lasting slowdown in economic activity: production, investment, consumption. Depression is associated with lower prices and a sharp rise in unemployment.

## 2. Finance And Labor

### The Finance

A little definition of the term. **Finance** covers an area of activity that consists of providing the money needed to carry out an economic transaction. This area concerns individuals, households as well as public or private corporations, but also States.

Entirely in line with what has been substantially afore-explained, it must be obvious to the discerning observer that current operating mode in the field of international finance is diametrically opposed to that which Life truly is about—a fulfilling, evolving life, both individual and collective. This specific domain, it makes perfect sense, requires a complete overturn; otherwise, any reorganization and/or refounding of other facets of society in the spirit of the Lighted Divine Popularism is doomed to failure. Remember, the nature of the banking system and its corollary, international finance, represents the central stronghold of the Kabbalah through which world nations are led astray and enslaved. These prevalent practices must, therefore, be thoroughly reviewed and restructured to clear the way for the rapid and sustainable rooting of the life wisdom advocated by the new global system.

Since the Nation's assets and resources belong equally to all, there can be no question of such despicable practices as granting bank loans of any kind to citizens for whatever purpose. The role of Banking-Finance shall therefore be limited to providing a medium of exchange and ensuring security and regulation of transactions between individuals, the Life Communities, and the State.

A currency that has no intrinsic value, the issuing institution--be it nationalist/state-run or internationalist--cannot and should not be allowed to grant itself the right to issue such medium in order to lend sums of money to be repaid with or without interest. (And a well-informed people is expected to ensure that this does not happen or is prevented from happening again.) And this is true regardless of any economic rationale that may be put forth, since there is no basis for explaining the various interest-bearing bank loans solely through the issuance of paper money, which relies solely on deception. In other words, it is a massive scam coupled with an internationalist scheme carried out with States collusion.

As there is no taxation or sell-off of underground resources for the sake of foreign currency earnings, nor the risk of inflation-deflation-depression, the state is empowered to issue as much money as needed for its operating budget, inter alia for the payment of servants-workers of the Administration and workers-contributors of public corporations and industries.

Funding is made available to all Life Communities and Cities through the allocation of National funds or resources based on actual needs expressed. This will consist rather in an inalienable Divine right. There will no longer be any need to borrow money--or to be unable to do so--in order to fund any legitimate project. With everything secured at all levels, it will suffice to pool the workforce for the Community and the Nation.

The entire goods production being provided by the Communities throughout the National territory through a self-sufficient system of contributionism, each worker-contributor will have access to all he needs for a dignified and fulfilling life. Any shortages or additional needs will be met through the barter system among the Life Communities. As for the Administrations' workers-servants and contributors, they are taken care of by the latter in the same manner.

The banking-financial system is therefore another area that plays a key role in the overall structuring, making it possible to swiftly and successfully establish the Autarchic System. The Ki/Kilia scriptural money system, combined with a barter-based exchange mechanism, the autarchic troc-economy, between Life Communities, is the most suitable resolution.

### External Exchanges

As mentioned earlier, the interdependency of economies upon this Terra poses a major mutual risk of instability, in that all it takes is a "little sneeze" somewhere along the economic chain for everything else to be affected. And it all has been skillfully and patiently engineered precisely for this purpose: covert control and manipulation.

Economies, such as those in the making upon the Pe-Esute-Aton Continent, where everything is built on the export of cash crops and other commodities, are destined for ruin--either through the depletion of resources or by falling victim to an economic war waged by structures representing shady interests.

Furthermore, in the field of foreign trade, transactions must be reduced to the strict minimum during the transition from the current to the new self-sufficient economy. They must be based solely on a barter-based economic system through bilateral negotiations. If this proves impossible, the financial mechanism of the current money system would be utilized by engaging the services of the OITC, or whatever body serves in its stead--the sole entity authorized to deal with World Nations regarding finance and investment, in lieu of the IMF, the World Bank, and other Paris, Rome, and similar clubs, completely illegal and criminal.

An economy well-built on sound new foundations, based on the principle of Volitional Systemic Autarchy of the Lighted Divine Popularism and all the prerequisites previously unfolded in the preceding chapters, will always stand firm regardless of external contingencies, since its very strength derives from its strong self-sufficiency, independency from that very external world.

### The Office of International Treasury Control

Access to foreign investment and credit, if applicable, during the initial phase of the Autarchic System would be provided exclusively through the OITC, a sovereign institution officially in charge for several decades of the Combined International Collateral Accounts of the Global Debt Facility. An organization intended to play the true and noble role of global financier for nations, whose management entrusted at the end of World War II for 50 years by the Nations of the World--certainly those with a say in the matter--to the three countries comprising France, the United Kingdom, and the United States of America through the Trillennium Tripartite Gold Commission, has proven disastrous. And the bleak state of the world's economies speaks volumes.

Since the organization has been, and continues to be, under constant attack by the criminal, usurping institutions stemming from the so-called Bretton Woods Agreements of 1944, few people have been aware of it, despite the fact that a website was online where all the information was available. Given that the accessibility and integrity of the website--currently victim of repeated attacks by Luciferian Globalists--are unreliable with regard to the majority of the world's population, no links will be provided in this treatise as a precaution, except for this brief introduction. This is because a forgery has been substituted in its place to deceive those unaware of the geopolitical issues at stake.

This is, therefore, indeed a Divine entity whose guiding principles stand in stark contrast to the criminal techniques of IMF, World Bank, and others--institutions that were founded from the outset as outlaw organizations in direct opposition to their stated objectives. It possesses the real assets and wealth of this world, giving it the ability to play the rightful role in lieu of the current predatory system and to restore some balance and fairness to the world of banking and finance. All countries that freely and sovereignly request it, depending on their statutes, are supported in the funding of all strategic projects and those of common interest through refundable short-, medium-, and long-term loans; loans that are converted into domestic debt and local currency regardless of the investment amount. Furthermore, the funds invested will, as a matter of principle, never be repatriated and will therefore continue to benefit the countries for generations. Take a look at the situation summarized here, and you will see that everything is in place and functional for any state whose authorities are capable of exercising political willpower and boldness. The only thing preventing this dynamic from taking hold is the criminal network of Satanic Internationalist Bankers, which maintains its stranglehold on people and state institutions of our poor nations, in the North as well as in the South.

What is needed, therefore, are only far-sighted political leaders who think outside the narrow box imposed by the malevolent Globalist Elite and who summon the audacity and sense of responsibility required by history to bring about the necessary change for the good of our Nations as a whole.

## The Labor

### 1. Wage-Earning (Salary) And Taxation Slavery

The widespread welfarist government model, the Welfare State, under which nations are burdened upon this planet, primarily in the West, is a parasitic offshoot of the current contemptuous system of human livestock management used, in conjunction with the monetary economy and wage-earning labor, to manage and control humankind in the interests of those who claim to "own" both our humanity and the Planet. A factual situation compounded by the State absolutism, as discussed previously. It is on the basis of this supposed welfarism that labor has been turned into a drudgery in our so-called human societies, for the benefit of a handful of utterly unbalanced individuals, in a state of constant rebellion. Labor, which is supposed to contribute to personal fulfillment and to social and individual well-being, has become a burden in this extremely materialistic world wherein God has become a misunderstood term, misused at every turn in an almost exclusively egocentric and external perception of separation.

The wages of these so-called workers are arbitrarily limited and capped, even as they are exploited to the extreme by the system's proponents, who award themselves vast sums of banknotes as wages, among other benefits. When you think that it is these very exploited workers who do the bulk of the work required in every business segment. Working five (5) or six (6) days a week without respite, 8 to 10 hours a day, for a meager monthly salary, and doing so for nearly the entire most vitalizing part of one's life while waiting for a hypothetical pension during the remainder of one's declining years, is nothing short of abject slavery and an unworthy resignation on the part of humanity. People do not even have time to enjoy the rewards of their labor, much less Life in its primal reality. Even so-called high earners are nothing more than the product of a system built around the ego, trapped in a mold of greed and pathological stupidity. This latter category is by no means spared the brutality and malice of this system within which they believe themselves to be privileged.

Moreover, this political welfarism has given rise to a series of taxes and levies purportedly intended to finance the operating budgets of States, Regions, and Municipalities through a parasitic system that is both infantilizing and insulting. These should unequivocally be classified as abuses and crimes against citizens and must simply be purposely abolished from state practices. As instances, it will be mentioned herein the two specific cases of VAT (Value Added Tax) and PIT (Personal Income Tax). The logical reasons for this are that VAT, which is supposed to tax the value added to a given product or service, instead penalizes the poor, already underpaid consumer rather than the producer. In fact, VAT does not even tax the value added as claimed, but rather the entire purchase price of the good--thus another lie that goes unnoticed in plain sight. Citizens should not have to pay a tax for consuming--that is, for spending their own meager earnings, earned by the sweat of their brow. As for the Personal Income Tax, it heavily and unjustly taxes citizens' wages under the fallacious pretext of social security. A salary is not a profit earned--quite the opposite of so-called "value added"--and therefore should not be concerned. And we are talking about the current predatory system.

In fact, VAT and PIT constitute a double scam in that citizens' earned income is subject to a withholding tax on the one hand, and indirectly via this so-called value-added tax on the other. It is imperative that, within a State that seeks to promote and secure prosperity and well-being of its people, these abominations be suppressed. Comfort and prosperity among the People would ensure well-being and social justice and, thusly, less--or even no--welfare-state government prone to authoritarian drift.

Life is much more than that. This state of affairs can only disappear if our ideal is to be higher.

## 2. The Labor Organization

The Life Communities, DUSHIKA, must be responsible for financing and providing their own essential facilities and services—such as roads and local transportation, schools, healthcare, local police services, etc.—rather than relying on a central authority to decide both the resources to be allocated to them and choices regarding their own productivity, operations, and the infrastructure to be put in place. It is true that the broad outlines of policy are to be determined by the Central Administration, but a clear and substantial margin must be left for the local Coordination to operate, all under the informed State supervision.

Currently in our countries, a centralized system diverts significant resources away from communities for the benefit of virtually unaccountable and highly inefficient national bureaucracies, military activities, and so on. Corruption, mismanagement, and misallocation of resources create a sense of dependency and injustice within the communities thus subjected to this system, as well as among the individuals comprising those communities.

Therefore, the selected road for organizing labor within this Volitional Systemic Autarchy is projected differently and is presented as follows.

At the level of the Federal Administration and the General Administrations of the Federate States, the following two (2) occupational categories will be instituted :

- Workers-servants of the Administrations.
- Workers-contributors of public corporations and industry.

Within each Community, there will be the following two (2) socio-occupational categories :

- Community workers-servants of Administrations
- Workers-contributors of Life Communities

It is far more natural and by far preferable to bring about a reality that is literally heavenly on Terra Earth through this Lighted Atonla Popularism (NE DUKEKELE SUTE-ATON), manifested by means of this Volitional Systemic Self-Sufficiency. The entire Nation, at the level of each Life Community, is put to task, while respecting abilities and aspirations of every citizen. It is here that Communitarianism and Individualism are expressed in balance and harmony in alignment with the Universe.

The Labor Organization within the Community is the key to the success of this model of society, wherein unemployment is a concept that does not exist.

In the four key areas of Housing, Health, Agriculture, and Education, communities must develop substantial self-sufficiency and involve all members in the production and provision of the goods and services required for their sustenance. This self-sufficiency is coordinated and supported by the State under Federal oversight.

The remodeling of the socioeconomic system in an orientation of serving Life and fulfillment of the Divine creature, that human being is, is intended to allow for such a thing. Since the economy has been restructured to serve solely national interests and depend exclusively on its own material and human resources, there is no reason why all citizens should not be involved, each within his own Community. Material subsistence is ensured without the infantilizing, controlling, and degrading (financial) assistance of the State, as observed today in welfare states around the world--and far more sophisticated in the West, above all--with this so-called **ABSOLUTE STATE** reducing citizens to the slavery of **WAGE LABOR AND TAXATION**, among other things.

It is more rewarding to have a civilization wherein people are involved in every stage of goods and services production on an equal footing--in other words, in a state of **Egalitarian Interdependency**.

An investment of four (4) hours per day, four (4) days out of seven (7) days a week, should be more than sufficient to provide for livelihood of Life Communities. The other half of the available time is devoted to various leisure activities, family, and above all to Nurturing of the Soul Evolution, the primary goal of the Spirit-Soul's Incarnational Experience. In this way, it can be said of a Community of Souls that it is finally aligned with this goal rather than the insane scramble toward this obscure and unbalancing form of materialistic hedonism.

### 3. The Forms of Corporation

#### The Community Sector

The operating mode for corporations and industries must be based exclusively on common ownership. Every corporation must operate as a branch of the Life Community, that is, on the basis of community shareholding; there is thus no employer-employee relationship.

Common ownership and responsibility must be observed in all sectors of economic activity.

A sole proprietorship may exist when a citizen has the capacity to operate his or her business entirely on his own, without assistance, from start to finish.

## The Public Sector

The operating mode for state-run corporations and industries is based exclusively on public ownership. All workers-contributors in the sector are partners with the State in the management of public entities. The specific approach to be adopted here still needs to be designed to ensure it is well-suited to the new structuring.

### 4. The Public Maintenance Service

Certain community-based tasks or services, such as cleaning and maintaining streets and public restrooms--which are generally considered degrading--are not reserved for any specific occupational class. These tasks are carried out by all members of the community alternately. At all levels of the Federal and Federate States Administrations, this system should be in effect, for what's at stake is the Divine Principle of the equality of all things, Respect, and Empowerment of each and every individual.

The raising of the Perception-Sentiment-Thought pattern within the Collective Consciousness is essential to the foundation and sustainability of an enlightened civilization based on The Divine Lighted Popularism.

## THE AGRARIAN AND LAND REFORM

*"We know it: earth does not belong to Human, it's Human who belongs to earth, we know it: all things are connected, everything that happens to earth happens to the sons of earth. Human has not woven the web of life, he is just a thread of fabric, everything it does to the web, he does it to himself".*

*Seattle, Indian Chief Suquamish*

The other prerequisite for the realization of the NE DUKEKELE SUTE-ATON, The Lighted Divine Popularism, is a profound land reform, followed by agrarian reform. Since the planet belongs to everyone and has not been created by any particular individual or group of individuals, there will no longer be any system of property claims or sales of plots of land or land parcels by a community of first settlers, a family, or an individual. The Peoples as a whole will retain only the title of custodians of the lands, and the State will be the Grand Custodian.

Without Land, there is no Society or Human Civilization. It is therefore of the utmost (vital) importance that peoples return to the enlightened ancestral approach of welcoming and sharing with newcomers in a spirit of brotherhood. Better yet, Earth must once again become the communal property of the resident peoples, for which

purpose it was intended from the very beginning. In other words, the buying and selling of Lands/Parcels for any purpose must be formally banned as a practice and enshrined in the Constitution. This concept of all being commercial and profit-driven is therefore to be abandoned without fail, particularly as it pertains to the Terra, the very foundation of physical Life.

The equitable allocation of land for the benefit of the Peoples and its management by them within the Life Communities is one of the prerequisites of this new enlightened policy.

## SCIENCE, INDUSTRY AND TECHNOLOGY

### 1. The Science

The following is an Open Letter to the Scientific Community written by Walter Russell. To get acquainted with its contents will certainly help enlighten people's minds--and scientists in particular--about the shortcomings of science in this world.

*"This Open Letter to the World of Science, accompanied by a Treatise on The Russell Cosmogony, is being sent to approximately 350 members of our National Academy of Science and Royal Society of London. 100 Universities, and 300 leading newspapers.*

*This announcement with its new concept of Light, Matter, Energy, Electricity and Magnetism is a simple yet complete, consistent and workable cosmogony which will enable future scientists to visualize the universe as ONE WHOLE, and will open the door to the New Age of Transmutation.*

*Recalling the important contributions I have already made to science, such as my work in completing the hydrogen octave and my prior discovery of the existence of the two Atom bomb elements given to the scientific world in my two Periodic Tables of the Elements, assures me that you will give serious thought and attention to these documents.*

*Present threatening world conditions make it imperative that science disclose the way whereby the weakest of nations can protect itself from the strongest of them and render attack by land, sea and air impotent.*

**This new knowledge will give science this power.**

*England could have been rendered immune from her devastating bombardment had the world been receptive to these new scientific discoveries which I endeavored to give to it when World War II started. Science, however, did make use of the two atom bomb elements mentioned above, which I charted and copyrighted in 1926.*

*The world needs new metals. Many new rustless metals of greater density, malleability and conductivity await division in vast quantities from carbon and silicon. These will be found when science discards its concept of matter as being substance, and becomes aware of the gyroscopic control of motion which will split the carbon tone into isotopes as a musical tone is split into sharps and flats.*

*In the chemical elements, the sharps and flats are isotopes. These can be produced by man in greater numbers than Nature has produced them, for Nature does not begin to split her tones until she has passed two octaves beyond carbon. There is a tremendous opportunity for the metallurgist of tomorrow to create new metals in the carbon and silicon octaves.*

*Of even greater importance to the world in this crucial period is the production of unlimited quantities of free hydrogen. This ideal weightless fuel could be transmuted from the atmosphere while in transit without the necessity of storage capacity.*

*These are the important things which might now be known if Kepler's discovery had divulged the facts of geometric symmetry and dual curvature within the wave field.*

**His law of elliptical orbits evidences that he was on the verge of discovering that four--not two--magnetic poles control the dual opposed balance of this two-way universe. With but two magnetic poles a three-dimensional radial universe of time intervals and sequences would be impossible. A balanced universe must have two poles to control centripetal, genero-active force, and two compensating poles to control centrifugal, radioactive force.**

*By means of such knowledge, science could rid the earth of fear of attack by any nation no matter how the attack might come, whether by land, sea or air.*

*This new knowledge will give to science the **cause** of all the **effects** which have for centuries of research deceived the senses of scientific observers.*

*Man has a **Mind** as well as having senses, but he has given preference to the evidence of his senses in the building of his cosmogony. Man can **reason** with his senses but he cannot **know** with them. Reasoning is sense-thinking--not Mind-knowing. He has also produced **effects** without knowing their **cause**.*

*The senses have not revealed to man that this is a substanceless universe of motion only. Neither have they told him the principle of polarity which divides the universal equilibrium into pairs of oppositely-conditioned mates to create a sex-divided electric two-way universe.*

The time has come in the history of man when *knowledge* alone can save the human race. Man has for too long left The Creator out of His Creation, thinking He cannot be proven in the laboratory.

God not only can be proven in the laboratory, but because of the facts of that proof man can solve many heretofore hidden mysteries of the universe--such as that of the seed and growth--life and death cycles--the purpose of the inert gases as electric recorders of all repetitive effects--and the true process of atomic structure.

You might reasonably ask why I have withheld this knowledge for so many years. I have not withheld it. I tried in vain to give it from 1926 when I first published charts of the complete periodic tables herewith attached, up to the beginning of World War II when I tried to organize a laboratory group to save England from its unnecessary bombardment.

I also accepted and held the Presidency of The Society of Arts and Sciences in New York for seven years for the sole purpose of giving to the world this new cosmogony based upon a two-way continuous, balanced universe to replace the one-way discontinuous, unbalanced universe which is presumably expanding to a heat death.

During this period, I lectured upon the misconceived idea that hydrogen is the basic number one atom of the periodic table. I explained that there are twenty-one other elements which precede it and that hydrogen itself is not a single element but a whole complex octave. I also explained the impossibility of there being any element without an inert gas as its source. At that time I distributed my periodic charts to approximately 800 scientists and universities.

Further than inciting research which yielded so-called isotopes of hydrogen and heavy water, nothing came of my effort, nor did I receive the credit due me. Incidentally, those so-called isotopes are not isotopes but full-toned elements of an orderly octave group series. Isotopes do not occur in Nature until they reach the octave following the silicon octave. The reasons for this are fully explained in our Study Course.

I wrote two books, gave many lectures and set up a demonstration laboratory in a university to prove that the elements are not different substances but are differently-conditioned pressures of motion--and that the structure of the atom is based upon the gyroscopic principle.

As one after another of my discoveries appeared under other names, I acted on the advice of a friendly science editor to withhold any more of my new cosmogony until it was fully completed in words and diagrams, and again copyrighted.

It has taken many years to so complete it that it is invulnerable to attack, but this has now been done, and this present treatise is as complete in brief as the whole cosmogony is complete in detail.

*I do not look for immediate acceptance of this revolutionary new knowledge.*

*I do hope and expect, however, that the seed of it will grow within the consciousness of science, and as I am nearing 82 years of age I feel it incumbent to announce the fact to science through this open letter and treatise that *The Russell Cosmogony*, which my gifted wife, Lao, and I have together written into a year's Study Course of 935 uncontradictable pages, and 182 diagrams, is now complete.*

*This course is now being studied all over the world and, through our students as seed, this new knowledge will ultimately transform the world.*

*It is with the deep desire that a higher civilization shall arise that I send forth this message to mankind. The day is here when Science and Religion must marry, or through ignorance of God's Universal Laws man will perish from the earth.*

*Hoping that the world of science will recognize that this treatise has within it the answer to basic **cause** for which it has been so long and tirelessly searching, I am".*

Walter Russell

*Excerpt from A New Concept of the Universe*

The science of this world, led astray onto paths unGodly, has been largely responsible for the misfortunes of its civilization. Most of the conclusions drawn from scientific discoveries have been and remain erroneous, leading the world into misconceptions raised up as so-called scientific truths, taught and passed down from generation to generation. Worse still, the applications of this perverted knowledge have led to the creation of deadly technologies and devices, while the best ones have been withdrawn and hidden away from public knowledge. This is the legacy we still carry from Human science to this day. And this is all that all so-called developing nations are led to duplicate or imitate. This is where the catch lies. Moving in this direction perpetuates a dynamic and a competition among powers that cannot improve Life on Mother Terra.

Atomic, Nuclear, Hydrogen, and other bombs are nothing more than weapons of destruction--whether on a massive scale or not--regardless of whether they are considered defensive or deterrent. For if mankind continues down this path, our civilization can be certain of but one thing: mutual assured destruction.

When it comes to Deterrent or potentially Preventive Defense, technology, and other necessities for Life easing, Human genius, aided by Universal and Natural Science, must constantly aim for respect and preservation of Life. Therefore, we must turn to this Higher Creative Thought, which alone can show mankind the road of the Wisdom of the Universal Laws of Creation. This has been amply demonstrated in the

New Concept of the Universe (A Brief Treatise on Russell Cosmogony). This is the PATH OF THE FUTURE for Hu-mankind.

With this Science, which is more closely aligned with the ways of the Universe created in accordance with the Perfect Laws of the Supreme Father-Mother, it has been sufficiently proven that mankind can obtain all raw materials, precious metals, and other potential products, regardless of any perceived disadvantage in a people's geographical location, without coveting the riches of other territories or seeking to dominate their peoples. Furthermore, for countries naturally endowed with these resources, it would be wise and imperative to develop skills through mastery of this Science in order to leave Mother Terra in peace and finally show her Love and Respect she so richly deserves.

Such a Science shall be at the heart of the development projects of any enlightened Nation or those who wish to embark on the path of an enlightened civilization; and with it, this Earth will once again become the jewel it was destined to be in this Universe, within the Galactic Brotherhood of Light of Higher Humanities.

The role played by Advanced Science will swiftly enable the achievement of the objectives of the Volitional Systemic Self-Sufficiency--namely, the capacity to produce all goods necessary for the proper functioning of the Nation without resorting to binding and destabilizing foreign trade.

*"Once in a while, in long century periods, some vast new knowledge comes to the slowly unfolding race of man through cosmically-inspired geniuses, or men of super-vision who have an awareness of the **reality** which lies beyond this universe of illusion.*

*This new knowledge is of such a revolutionary nature in its time of coming that whole systems of thought, even unto entire cosmogonies, are rendered obsolete.*

*When each cosmic messenger gives such new inspired knowledge to the world, the whole human race rises one step higher on that long ladder of unfolding which reaches from the jungle of man's beginnings unto the high heavens of ultimate complete Cosmic Consciousness and awareness of unity with God.*

*Thus it is that man has ever been transformed by the "renewing of his mind" with new knowledge given to him since his early beginnings, through the Mahabharata and Bhagavad-Gita of the early Brahmic days, through such ancient mystics as Laotze, Confucius, Zoroaster, Buddha, Plato, Aristotle, Socrates, Epictetus, Euclid, Mohammed, Moses, Isaiah, and Jesus, whose cosmic knowledge utterly transformed the practice of human relations of their day.*

*Then dawned a new day of the gathering of so-called "empirical knowledge," which is gained through the senses by research and observation of effects of matter-in-motion rather than through*

*the Consciousness of inspired Mind in meditation, which is the way that mystics and geniuses acquire their knowledge.*

*Since the days of Galileo this undependable method of gaining knowledge through the senses has served to multiply man's reasoning powers by teaching him HOW to do marvelous things with electricity and the elements of matter, but not one great savant of science can tell the WHY--or the CAUSE--of his familiar effects.*

*If asked what electricity, light, magnetism, matter or energy is, he frankly answers: "I do not know".*

*If science actually does not know the WHY -- or WHAT -- or CAUSE -- of these essentials, it necessarily follows that it is, admittedly, without knowledge.*

*It is merely informed--but information gathered through the senses is not knowledge. The senses sense only EFFECTS. Knowledge is confined to the CAUSE of EFFECTS.*

*The senses are limited to but a small range of perception of the EFFECTS which they sense, and even that small range is saturated with the deceptions and distortions created by the illusion of motion.*

*It is impossible for the senses to penetrate any EFFECT to ascertain its CAUSE for the cause of illusion is not within effect. For this reason the entire mass of so-called empirical knowledge which science has gained by reasoning through the senses is invalid".*

Walter Russell

Excerpt from *A New Concept of the Universe*

## 2. Technology & Industry

Technology is, naturally, the offspring of Science. But even if this is not the case in the Earthly perception of the matter, it must become so that every invention stems from an understanding of this Science of Nature and aligns with it. A scientific education aligned with the ways of Nature will produce researchers and innovators in the field of aligned technology. The Advanced Science will thus produce technology inventors whose work will be utilized by industry at large.

Logic lying in consistency, the industry, thus led to be based upon this new Science, gift from Creator Father to nascent new Humanity through the Great Scientist Walter Russell, must proceed doing it all emphasizing the sustainability of industrial creations, and focus on Human in general, rather than the pursuit of profit at any cost through the programming of rapid degradation--a reality we are currently enduring as a completely unbalanced global civilization. This will dramatically reduce the

production of various types of waste. In the same vein, industrial production respecting the values of Light and Life must turn away from produce such as tobacco/cigarettes and alcohol, among others, which are harmful to the human body, a Divine temple.

In this context, nations need to set up industrial structures aimed at processing our raw materials--used responsibly--for the domestic consumer, and the domestic consumer alone, while enabling or assisting others, as needed, to do same, until new Scientific advancements allow mankind to do better. There should never be a matter of positioning oneself to invest in and take hostage whole sectors of foreign economy/economies. Knowledge must be shared in Brotherhood, in alignment with the Law of Giving and Regiving of the Balanced Rhythmic Interchange of Creation.

Just as the Creator gives one, so must one regive in kind. When one is in the giving from Him, no material price is demanded; therefore, one has a duty to regive to the other individual or community without demanding any price or seeking control. Only in this way is a Balance maintained that allows for the perpetuation and advancement of a Humanity-Civilization in the Light of Knowledge of Its Creator. For thus one comes full circle, and the Sacred Circle of Infinity becomes manifest in every facet of all things, which can but move toward and into greater Divine Light.

This achievement lays the foundation for a liberated nation on the path to sovereignty and independence within the Natural Interdependency of Terra-Urantia Ecosystem.

Industry shall be operated jointly by the Community, the State, and the Federation under strict regulations that allow for no deviation from the Divine Laws and subsequent provisions incorporated into the Federal Constitution and adopted by the States.

## GLOBAL BODILY HARMONY, PHILOSOPHY OF LIFE AND EDUCATION OF WHOLENESS

### 1. The Global Bodily Harmony

In this system of the Divine Popularism, this new Volitional Systemic Autarchy, Global Bodily Harmony (Health), the Philosophy of Life, and the Education of Wholeness must be brought together as the central pillar of the global structure. There can be no separation between them, as they are all interconnected. Failing to understand this distorts the situation from the onset. A Sound Mind-Soul in a Healthy Body, as they say, and rightly so. Since Mind creates reality, restoring the Mind to soundness and its rightful position undeniably projects a sound manifestation into the

physical realm. And the soundness/sanity or strength of the Mind comes from the quality of its nourishment : the indispensable teachings of Truth.

These three aforementioned spheres, in the same vein, account for the matrix that shapes, preserves, and sustains the Whole. They are fundamental and highly crucial domains whose unfoldment should not be hindered by any of the excuses often invoked in the name of so-called economic growth and development. This much-touted development can only be the result of sound, well-off, and well-educated citizens. It is therefore illogical to deprive the people of education, good health, and proper nutrition under any pretext whatsoever.

In this regard, great Minds have already paved the way--an enlightened path--toward a society free from disease and many other ills that plague mankind. These individuals were systematically opposed, ridiculed, and often murdered during their sojourn upon Terra-Urantia. It's only by following in their footsteps will the new Civilization be able to create a literal Earthly Paradise--that is, eliminate all diseases, harmonize the body, and prolong life.

Excerpts from their works are included below to provide an illuminating glimpse of how this is already within reach, if only Mankind is willing to reach out daringly and seize of it.

### Royal Raymond Rife, Great Inventor

*"In the years between your mid-twenties and say, 1945, R. Royal Rife<sup>14</sup> had developed a method whereby he could irradiate the little crystalline viruses with the specifically proper radio sound wave, and disrupt them without disrupting human tissue.*

*Orthodox doctors promptly say that is, of course, hogwash (or worse). Well, the next question for the "nonsense" crowd is to inquire as to whether or not they think you can destroy viruses with light or shake them to death? Ah so--next ask them what method do they use in the laboratories when "critters" are blown out their hoods when they are experimenting. WHAT THEY USE IS ULTRA VIOLET LIGHT WHICH IS NOTHING MORE THAN ELECTROMAGNETIC RADIATION OF A PROPER WAVE LENGTH.*

*Even on dense Earth, it is proven beyond anyone's misrepresentation, that electromagnetic radiation of a proper form can and will kill viruses.*

---

<sup>14</sup> Royal R. Rife, an independent researcher, was born on May 16, 1888 in Elkhorn, Nebraska and died at age 83 on August 5, 1971, at Grossmont Hospital. He has authored a breakthrough discovery for the cure of viral diseases among others.

Right out of the aforementioned Baylor University, came the public information that they had taken blood which was contaminated with herpes virus, with cytomegalovirus (which is a deadly thing in an organ transplant patient), and with AIDS virus. They irradiated the blood with laser light and showed that they could kill the virus without killing the cells. The cells were still viable but the viruses had been destroyed.

Now would that not somehow broach the very topic of electromagnetic cure of viral diseases? THIS, READERS, IS FROM WHENCE THE AIDS CURE WILL COME.

A simple machine, much more simple than your accepted x-ray equipment, can be utilized which will identify, based upon readings determining what kind of virus is present, and treat the human being with a frequency beam jolt which will destroy the virus contained within, not only his blood but throughout his entire body. It must be throughout the body to preclude reinvasion.

You can then eradicate, not only AIDS, but all other human retroviruses as well. They are nothing more than animal retroviruses running in humans. Persons can be cured individually and the diseases eradicated worldwide. You sure could clean up your animal herds as well.

The virus is a very, very minute little beastie that is very hard to see by any means whatsoever. Dr. Rife devised a method whereby he could visualize the viruses. Rife was a most gifted machinist and invented a microscope with which he could actually view viruses in the living state. The microscope had a magnification of 70 to 100,000 times in living tissue. These machines existed in fact, and two or three are still around today just awaiting eager minds and hands to bring back into perfection. It requires a whole concept change of thought acceptance, however, from your scientific community -- you see, things have not politically nor egotistically changed in mankind in those ensuing years.

Rife actually invented this machine and could view viruses in living tissue and also was able to determine the mortal oscillatory rate, which is the frequency with which he would irradiate the viruses in order to kill them.

Dr. Rife called the mortal oscillatory rate the MOR. He found that he could bombard the cell, devisualize all atoms save the virus and irradiate it with basically monochromatic light, which today you would refer to as laser light, the virus would "illuminate", would absorb energy and emit energy allowing visualization, and then by increasing the amplitude of the energy input into the virus he could cause the virus to disrupt.

This is not only feasible, it is absolutely credible and workable.

Royal Rife's work clearly demonstrated specific frequencies associated with particular viruses and disease organisms. In addition, his universal microscope, using evanescent waves, or waves with only hyperdimensional components, had no wave length limitations on its resolution. Consequently, it could

see directly into the virtuous state past the limit of the photon. Indeed, it could not only see the exceedingly small point cells that lie between ordinary cells and are just barely visible to the "best" orthodox light microscope, but it allowed visualization of some sixteen interested, deeper and smaller levels of structures within the point cell. Nothing before or since has achieved such a penetration. There are two or three of these scopes around that can be brought into repair

Using this microscope he could see virtual state energy forces functioning and moving. The biology his microscope revealed was far beyond the state of biology today. It was unorthodox in conception and presented a great threat to your orthodox medical and scientific communities. If you are going to create and spread an incurable disease to fit your purposes you most certainly do not desire the cure to get there prior to the infection. Oh yes, that is exactly what occurred, little dreamers. With his scope, Rife could not only "see" the little varmints but he learned to manipulate and control the living internal structure of living electricity. Now please refer to the Nobel prize this past week for the ability to isolate a single unit of electricity and stabilize it. Honors be to that one. Learn what you can from that researcher-- you are going to find that electricity units are living structures.

Since interested levels of virtual state are also "higher" spaces, or hyperdimensional, Rife's microscope was the first and only instrument to allow vision directly into higher dimensions and observe the higher dimensional living forms.

In Rife's time such a thing was unthinkable to medical science, yet today with substantial evanescent wave technology already utilized in wave guides<sup>15</sup> and with a well-developed body of evanescent wave theory, you could prove that Rife's microscope was capable of doing precisely what he and other scientists reported. But what happens? It is further hidden to cover the lack of interest and ridicule of the past actions. Perhaps nothing in history ever changes except the names and places.

It is important to note here for the less sophisticated reader: "evanescent" means to dissipate like vapor -- tending to vanish like a vapor.

Included in those exceedingly complex modulations and spectrums, every cell has a complicated electromagnetic radiation spectrum. An abnormal cell has an abnormal change to that spectrum. If you subtract the normal cell spectrum from the abnormal cell spectrum you have a specific delta that then, introduced into a normal cell, will convert that kind of abnormal cell.

When you have such a single pattern for cancer conversion, for example, you can irradiate a normal cell with it and turn that cell into a cancer cell. However, suppose you phase conjugate that cancer conversion single pattern. The phase conjugate<sup>16</sup> replica will be the pattern that precisely converts that

---

<sup>15</sup> A waveguide is a structure that guides waves, such as electromagnetic waves or sound, with minimal loss of energy by restricting expansion to one dimension or two.

<sup>16</sup> Phase conjugation is a physical transformation of a wave field where the resulting field has a reversed propagation direction but keeps its amplitudes and phases.

sort of cancer cell back to a normal status. With phase conjugate replicas of cancer cells specific delta<sup>17</sup> frequencies are fed into the cells of a body having that cancer, the cancer cell's master cellular control system will modulate with these time reverse specific signals. That will return the cancer cells within the body to the proper master cellular control system of the animal.

Thusly, the cancerous cells will be immediately destroyed or reverted back to a normal cell. A very similar process exists for just about every disease bacteria and infectious agent, including the viruses of AIDS. As a matter of fact, the viruses are more easily disrupted due to their crystalline formation.

In the Soviet Union it has been proven that any cellular death and disease pattern can be induced by a specific pattern carried on an electromagnetic signal. If the target cells are bombarded with the pattern carrying carrier signals for enough length of time.

In Australia these experiments have been fully replicated and extended. These documents should be easily obtained, say by Cathie of New Zealand, and nab onto the researchers. In Australia they have induced cellular death and diseases between cell cultures at a distance of over a hundred feet -- a most convenient distance indeed. Unfortunately, these experiments, thousands of them, were done in military institutes; but I see no particular problem in obtaining them.

Scientists in West Germany have also replicated these cellular experiments. However, the important missing link is that these experiments have some unpublished data to be gathered; that portion was the corresponding Soviet work showing electromagnetic REVERSAL of cellular death and diseases conditioned by irradiation by phase conjugate replicas of the pattern carrying induction signal. Briefly: If an action in forward time induces a condition then the time reversal of that action will reverse the condition. (YOU SEE, YOU ARE DEALING IN HIGHER DIMENSIONS WHERE THERE IS NO SUCH THING AS TIME AND SPACE!) The concept is so laughably simple that it eludes you ones. The time reversal of an electromagnetic disease process is a specific electromagnetic healing process for that particular disease.

Rife's microscope could easily allow visualization of viruses for it could easily defeat the wave length limitation of the light frequency utilized.

It has now been proven, in your own physics studies, that the wave length limit in optical instruments can be violated by utilizing evanescence complex waves. Rife's microscope utilized such waves and thusly, normal light wave length was not a limitation.

When an instrument is utilized to make complex waves, it can also be utilized to make phase conjugate waves. Rife's microscope could also be utilized to determine the exact color frequency pattern

---

<sup>17</sup> Variation

associated with specific disease organisms. There is great knowledge herein for it allows for the exact matching of frequency patterns.

Well, Rife got the usual warm treatment by his fellow man in payment for his services. He was bound over into prison and when he was later released he was a broken and discouraged man. He lived out his remaining life in retreat and his death was hardly noted".

### Master Cellular Communication System

"The intrinsic virtual state of cellular control has already been discovered and pointed out. This massive communication system controls all cells in a body and all the functions thereof. This is a "life electromagnetic" system. Your new researchers wish to call this system "Scalar", we have no objections, therefore, I will refer to this as SEM since you ones do enjoy your alphabet.

The SEM conductivity pattern is not through the electron shells of the atoms but is directly through the nuclei SEM pathways. The SEM pattern's organized signals, non-specific vector electromagnetic (EM) waves, which externally sum the zero vector on already existing waves, can be constructed for virtually any specific purpose. This includes the ability to destroy a particle such as a virus, cancer cell, leukemia, bacteria--anything within or without individual cells--these frequencies can be created which will actually alter the very DNA/RNA. Through this approach the immune system and repair system of the body or cell, itself, can be reached and manipulated selectively. Thus, the entire biochemistry and functioning of a cell, including its genetics, is totally engineerable.

Further, a specific "charge pattern" can be designed and utilized to charge up the nuclei of the biosystem to fabricate specific immunity response. This charge, once established, is then maintained by the "master" system to allow for permanent immunity--in other words, you change the master computer to include the new and reject the old data.

To understand this just stated concept, you need to know something about brain, mind and thought basic functioning. It has been isolated and described on your plane sufficiently to scientifically organize it. It, of course, is crude in isolation for it is the etheric aspect of life itself and you ones are not given to understand it in actuality. The concept is sufficient for this discourse".

The scientific demonstration that has just been made in the previous excerpts proves that many doors are already open but hidden from public knowledge and especially whose concrete applications are not allowed for the benefit of the Peoples of Terra-Urantia. We continue.

## Antoine Priore "Machine"

Priore constructed an electromagnetic treatment machine and demonstrated a close to 100 percent "kill" (cure) of all kinds of carcinomas, leukemias, etc., in thousands of laboratory tests utilizing animal forms. These tests were openly shared with American scientists as early as your 1960's. At the time of the research, the French government funded several millions of dollars for Dr. Priore's research.

Into a tube containing a plasma of mercury and neon gas (hold this combination in your hearts for Sir Russell will expand on this subject later), a pulsed 9.4 gigacycles wave modulated carrier frequency of 17 megacycles was introduced. These waves were produced by radio emitters and magnetrons in the presence of a 1,000 Gauss (the cgs 'centimeter-gram-second' unit of magnetic induction equal to the magnetic flux density that will induce an electromotive force of one one-hundred millionth of a volt in each linear centimeter per second at right angles to a magnetic flux) magnetic field.

Dr. Priore exposed experimental animals to this magnetic field during irradiation and a mixture of waves, some seventeen or so, coming from the plasma tube and modulating and riding the magnetic field, passed through the animal's body. Among other things, as plasma can convert a transverse wave to a longitudinal wave, also phase conjugate, time reversal waves can be produced.

Phase conjugated electromagnetic waves carry negative energy and negative time. They exhibit negentropy<sup>18</sup> and move from disorder back to order. The proof is already in the hundreds of technical papers in non-linear phase conjugate optics in the orthodox scientific literature but ones continue to misinterpret the true definitions of terminology. Dr. Priore's apparatus produced a SEM signal with deliberately constructed, unfolded components including phase and conjugated electromagnetic waves.

Further, keep in mind that just to send out waves is inconsequential unless you have a correctly tuned receiver crystal for exacting frequency. You must integrate the information into a single functioning apparatus.

In his device, Priore internally structured the carrier photons themselves, making them vacuum engines. This structure contained the dynamic delta for the disease. By introducing these spectrum to a giant rotating plasma he then phase conjugated his vacuum engines and then passed these time reversed vacuum engines down and through a strong magnetic field which thoroughly penetrated all cells of the biological organism being treated. The scalar components that are the structured photons representing the time reversal of the disease were absorbed and re-radiated in all cells, charging up the nuclei of the atoms and organisms to some potential level of that exact healing and reversing pattern.

---

<sup>18</sup> Negentropy is reverse entropy. It means things becoming more in order. By 'order' is meant organization, structure and function: the opposite of randomness or chaos.

*In that way he passed a specific cancer reversal phase conjugate replica into every cell of the body, charging the cellular biopotential and producing a permanent healing delta onto the body's cellular master control system. In the process that cancels that in leukemia pattern, charging the nuclei was cancelled and discharged. The new time reverse charge also destroyed the cancer cells or converted them back into normal cells. That, my friends, cured the disease even in terminal instances--- all of them. Yes, I said ALL OF THEM!*

*Further, for the disbeliever; he could cure sleeping sickness and any viral disease, et cetera, et cetera. In other words, the process represented a severe stress against any cellular control system delta encountered. This caused a return to the normal cell's and master cell's cellular control system of the body.*

### **But What Happens To The Normal Cell Who Happens To Be There?**

Encountering the normal control system in normal cells there was no delta-- therefore there was zero stress. Encountering the abnormal control system in tumor cells it produced great and specific stress on it and reverted it to the normal control system of the body's normal cell. If the cancer cell could not withstand the stress it died promptly. Thus, to a normal cell the Priore signal pattern acted somewhat soothingly as a stroking to normal cell structures and no interference occurred with the normal cell---that is, one whose scalar control pattern is locked to the body's master cellular control system and in phase with it.

The Priore signal stimulated and stroked the normal cell but did not injure it in any manner. On the other hand, the scalar potential pattern in and of an abnormal, say cancerous cell, is out of phase with the body's master cellular control system and is not phase locked to it. Hence the Priore signal causes direct interference with the abnormal cell's independent scalar control system. The interference pattern constituted the reconstruction of normal energy directed to the cancer cell and also jammed its abnormal scalar life signals. This destroyed the cancerous cell by two mechanisms:

1. Physical energy was channeled directly into the abnormal cells causing direct mechanical damage, and,
2. The cancer cell, being an independent living "critter", had its scalar life-channel connected to his primitive mind which connected his primitive mind to his body, jammed and terminated.

## Abnormal Returned To Normal

If the cancer cell was reverted to a normal cell by the Priore stress before being destroyed, it became just a normal cell and the Priore stress had no further effect upon it. Any disease with cellular, biochemical or genetic basis can be cured in like manner. Priore's method, for example, was clearly shown to be able to completely reverse fatty deposit clogged arteries and further, lowered cholesterol levels to normal even in the occurrence of abnormally high cholesterol diets.

Every cell of the body, however, even the hair must be irradiated and treated, that is, charged up with the signal for the disease pattern is located in every body cell. The master cellular control system is holographic. The pattern that is substructured and potential with its dynamic and oscillating component is in each component, that is, in each atomic nucleus, hence is in each and every cell. Every structural level of the body larger than a cell also has its own correlated pattern of modulation on the overall. The biological organism can regenerate lost limbs, for example, if it can utilize its natural recovery process in a Priore manner. Even though Priore's work was presented to the French Academy of Sciences, it was far beyond the group's ability to understand the device or its function.

I do speak here of the 1970s. The academicians knew nothing of scalar electromagnetics and phase conjugation and that is exactly what the Priore device was. More the medical world saw a phasing out of their very expensive services--a dual motivation to squash this unsettling crazy man.

Sad for mankind, in 1974 the funding was withdrawn just as Priore was completing a device which could irradiate an entire human body. It would have been capable of curing almost all human diseases. Ah, but then, you might not have been able to enjoy this plague and tribulation and the cycle ending would undoubtedly have been postponed. Man, unfortunately, rarely changes the probabilities in a positive way--just runs headlong into disaster faster and faster.

In that particular machine Priore utilized a lamp, in which 17 specific frequencies were mixed and modulated upon a 9.4 gigacycles carrier. The machine was large enough to irradiate humans over their whole body. It should have been capable of curing cancer, leukemia and AIDS in two, five minute irradiations -- a week apart.

While Priore was still in your dimension (physically alive), a major thrust was made to bring the device to market and into medical research and into utilization. The devices were to be assembled in France and then shipped to purchasers, who would be large research and development laboratories where they could be

brought into local specifications. I think it is sufficient to note that "big brother" put a stop to the funding for the project and the work had to be shelved

It is a fact that such signals can reverse nearly every cellular illness or condition of the body. The program to produce the cure for AIDS in this manner only requires the necessary funding and the assembling of the persons (left un-named for obvious reasons) to do the job.

*Aton Micaël, The Christ;  
Excerpt From The Phoenix Journals N° 8*

Now, it may be evident, based on the unfolding provided in the preceding writings, that mankind is dealing with a system of iniquity in which no importance is attached to Life other than contempt and profit at any cost, against a backdrop of deliberate and sustained rapacity.

Not only does so-called Modern Medicine fail to heal, but it kills the individual at his own expense. People pay to be murdered by the drugs and poisons of the pharma industry.

Scientific researches have yielded marvelous results, enabling the production of high-performance devices to simplify lives in terms of bodily harmony (holistic health)--far removed from this Satanic commercial medical mess that benefits globalists and to the great detriment of mankind.

The mere introduction of these simple and efficient curative treatments, described above--which are currently subject to an informal and malevolent political and economic censorship--will provide Earth Man with immense opportunities for healing and fulfillment, free from drug addiction. People will even witness that traditional treatments using medicinal plants will become a thing of the past, thanks to these advanced technological capabilities.

Along with advanced public education on sound and balanced nutrition, this will lead to the eradication of most infectious and nutritional diseases, and thus to a rapid and drastic reduction in mortality and an increase in life expectancy. In that respect, our reformed medical institutions can be reoriented toward specializations for the management of specific severe cases until total harmony prevails. In any case, every effort should be made to ensure that the development of these proven and simple curative treatments is prioritized and made available to the entire population.

Taken as part of a holistic approach, this route must inevitably lead human civilization toward the use of efficient tools such as Hypnotherapy,<sup>19</sup> Naturopathy,<sup>20</sup> Chromotherapy,<sup>21</sup> Radionics (sound therapy), etc. Combined with the applications of Plasma Science, these wonderful, simple, and readily available tools will enable holistic healing, for every individual on Earth and rid our societies of pathogens created primarily by humans for the evil purpose of control and depopulation. The path to global harmony lies in treating the entity on the subtle and dense planes-- Body, Soul, Spirit--which allows for a return to life and service to Life in Harmony and Balance through the liberation of the Soul from within. This is the Trine Bodily Harmony, with the subconscious playing a crucial role in this process.

Once again, the New Science has a crucial role to play in this New Civilization of the emerging Cosmic Age.

The Soul is in dire need of a massive healing from the millennia-old erring ways fostered through the misleading teachings with which it has been fed for so long as to lose the thread leading to Truth and the true Reality of the Nature of Life.

Extensive recourse to the works of Walter Russell, Antoine Priore, Royal R. Rife, and Nikola Tesla, to name just a few, is essential. Fortunately, there is no need to start from scratch.

### The Philosophy of Life

Here, once again, we will draw upon high sources of teachings of indisputable truth to lay the foundations for the philo-spiritual orientation recommended for the Enlightened, Free, and Sovereign Civilization envisioned by and for the NE DUKEKELE SUTE-ATON, this Lighted Atonla Popularist System.

In this context, Religion, Philosophy, Freedom/Liberty, and Sovereignty must find a common foundation rooted in Divinity, outside the web of anti-Christ lies shoved down the throats of the Peoples upon Mother Terra.

The following writings simply illustrate and demonstrate the absurdities in which Hu-mankind has been wallowing for far too long.

*"ESU talked of Nature and of the God who clothed the lilies of the fields and valued the smallest sparrow. He denounced the law and the prophets and, ignoring the imaginary Khazar "god" who was*

---

<sup>19</sup> Hypno-therapy is the use of hypnosis for therapeutic purposes.

<sup>20</sup> Naturopathy is an unconventional medicine that aims to balance the functioning of the body by means considered "natural": diet, aromatherapy, lifestyle, herbal medicine, manual techniques, exercises, etc.

<sup>21</sup> Chromotherapy is a method of harmonizing and helping to cure certain disorders, physical or emotional, through the use of colors. Management is based on sensory organs, including sight.

presented as being external to his creations, Esu talked of a different God who was within and Father to His creations. The message of Esu was that perceptive people would realize they were of the Father. He said, **"I am in the Father and the Father is in me"**. He told people they could go against the law and that was not important, they could go against what they called "god" and that was not important, but if they did not heed the Holy Spirit that was **WITHIN** them, they would be eternally damned.

In simple, bare, inexact human words, there has never been a clearer statement of individual sovereignty. But Esu was placed at the weather front of masses looking for a messiah--looking for a leader of manipulated masses, a new spokesman for the imaginary "god" they had invented. They thought only of fighting the Roman culture of manipulated masses with their own, even more extreme, culture of manipulated masses. Human words were inadequate for something as important as Esu wanted to say.

When He had said all that could be said by using inexact human words, He had to accept the bitter cup that words alone do not establish a culture. With courageous resignation He faced the fact that, even though the people around Him would not accept a culture opposite to the one that was leading them to damnation, He could still make a full statement to the whole world regarding that which came from the Holy Spirit, or Father, within Him in the language of the **REAL GOD--in the language of Nature's God**.

He told his disciples that His time was approaching but that their time was yet to come. He planned to precipitate a battle in which they could take sides. He said to them, "Sell your coat and buy a sword."

Then in the language of Nature and Nature's God, He spoke. As one who had violated no specific law of the mass manipulators--but as one who had denounced their total culture -- He openly confronted the mass manipulators with full knowledge of what would happen. Having publicly proclaimed the sovereignty of an individual, He placed himself so that as an individual He conspicuously stood against the most clearly defined culture of manipulated masses that existed anywhere in the world, a culture that will tolerate no one who rejects the law and the prophets, a culture that will tolerate no one who obeys only the Holy Spirit within.

Esu deliberately walked into a situation where He foresaw that his crucifixion would clearly show the mortal opposition which exists -- unreconcilably -- between the two cultures. In the language of Nature and Nature's God, His crucifixion proclaimed to all the world that the opposition between the two cultures is mortal and eternal, that compromise cannot be made, that one of the diametrically opposing directions must be chosen.

*Crude, inexact human words do not pass the boundaries of different peoples and are seldom fully understood. In the universal language of Nature and Nature's God, Esu made the most significant and most eloquent statement ever made to the whole Human species.*

*The Khazars tried to ignore that statement. When they discovered that they could not simply ignore it, they tried to kill off everyone who tried to point out the significance of it. The Romans saw its significance and gave the Khazarian gangs license to exterminate Christians -- no more and no less.*

*Then one of the Khazarian butchers, Saul of Tarsus, came up with the idea of twisting the story backwards and actually making it support the Khazarian culture of mass manipulation. Each now takes active roles in setting to straight the historical errors of experience and some will fail -- again; but ones of Godly intent shall surely succeed.*

*The imaginary primitive "god" which the Khazars had invented purportedly demanded bloody sacrifices of the first born and finest before he would forgive their "sins". Everyone had heard Esu say, "I am in the Father, and the Father in me". Many had said that Esu was claiming to be a god. Saul conceived the idea that people could be made to accept Esu as the son of the imaginary "god" the Khazars had invented, and accept his crucifixion as a sacrifice that the imaginary god's law demanded for the salvation of all who had not obeyed that law".*

*Esu Immanuel Sananda  
Excerpt from The Phoenix Journals N° 28*

And the following:

*"The religions in your world are man-made and find their premise on age old renditions of those who came before as divine emissaries to teach and reveal the word of God. God sent many of his ones to bring enlightenment through the spoken word yet seldom were the teachings recorded accurately; and have been tampered with by those responsible for its translations and dissemination. The words are barely recognizable to the ones who gave them initially. Always was the word given in a way to inspire understanding yet seldom were they understood. God therefore continues to send his messengers to repeat the word and to render further truths through various projections so man's understanding might be reached in measure to grasp the truth.*

*Thus throughout the ages men of authority took it upon themselves to distill doctrines from what was taught and convert them into teachings to be religiously followed by those who became followers. Religions therefore have become manifestations of beliefs and doctrines crystallized in records which bear not the original thoughts or natural words but condensed and re interpreted versions.*

*Man-made religions are 'tradition based', finding their credibility in those who hold themselves out as authority for the beliefs and teachings espoused by the religion. They are sectarian in nature and appeal to the minds of men through the use of symbols, ceremony and established creeds.*

*Those who subscribe to the religions of tradition find security in the chosen system of beliefs which provide directives for living. Religion plays a supportive and crucial role in the lives of these ones whose experience in mortal form is underpinned by the dated beliefs and doctrines taught to them. It has become a safety net for many who wholeheartedly accept them as truth without any personal input or experience of what they tend to follow.*

*There exist truth in the some of the teachings espoused by each religion and you may even find some common ground amongst them; yet they do not represent the whole truth. God often spoke to the readiness of the mind of the receivers. As messenger after messenger was sent, greater truths were revealed to accord with the receptivity of man and his abilities to comprehend; and what was taught before was projected in new and revealing ways.*

*The reality is that traditional religion has capsulated truth of what is recalled and projects it as a Gospel. I say to you that the gospel as given is incomplete and erroneous in many ways. Those who seek truth will not find it wholeheartedly in the realms of traditional religion but must seek it elsewhere. Man's understanding of religion has become an inherited one, as he assents to what is placed before him as a bestowal of truth.*

*Those born into religious families will be conditioned by the precepts of that particular religion without a choice. Those who are independent minded will however grow in awareness and be led to seek beyond the mainstream to find his truth.*

*What really is religion? Your religion should be your way of life. Religion should therefore be a way of life or living. Where does life exist? Is it not in the spirit which is eternal? If religion is a way of life and there exist life only in spirit; then should not man's religion be the way of spirit instead of a proliferation of sects espousing various dogmas without knowledge of truth of spirit.*

*If man is to find God through 'a religion' and God is pure spirit, then surely the way to God is through the knowledge and experience of spirit. Religion should be a way of life founded on spiritual truths discovered by each individual on his/her mortal journey. The revelations of spirit through the temporal experience enable man to discover and know the presence of God within himself and to feel the divine presence within him and as part of him. The religion of spirit will reveal to man his oneness with God whilst the traditional religion teaches of a God who is over, beyond and above his children.*

*A new religion has been dawning for some time now and many have found their religion in spirit and in so doing have discovered God within themselves and many are choosing to exercise their free will choice to manifest the presence of God through their mortal journey.*

*It is the discovery of God within and the choice to manifest HIM that will initiate the career of the ascending mortal. The spirit of God within inspires man to a higher understanding and will provide insight into realities of the life and ways of spirit. Man is then able to express God's ways in his living as the fruits of the spirit become the values by which his life is moulded. He will come to know and grow into his moral worthiness as he embraces the light of God within himself and became drawn to all that light offers instead of being motivated by guilt and fear to uphold the values of God.*

*The religion of spirit is revelatory in character. One of its greatest revelations is the existence of God's love in man's immortal soul. Man will come to know God's love and will know love as God and God as love; and eventually know God as himself and himself as love. He will, in his search for truth, discover that love is all there is and God being love means that God is all there is and in that knowing there will flow awareness that man and God are one. In spite of what man's senses perceive, man will discover that there is no separation. As he begins to know God and feel HIS presence within himself, he will eventually know the wholeness of love and he will develop the ability to manifest God's love.*

*Inherited or traditional religion may teach about love and even provide directives on how man should love but this will be no more than an intellectual understanding based on mind awareness rather than spirit awareness. To know, to understand, to experience, to have, to hold, to retain, to live and to express love you must feel unified with God's love that dwells within. It is only through the experiences you have on your mortal journey that this unfolding can occur.*

*True religion therefore cannot be taught but must be discovered through the mortal experience combined with the motivation to seek truth. It is only then that man will come into remembrance of who he is, as this awareness must dawn from within, so that he may be bonded to the experience and know the revealed truth and remain unmoved by what others tell him is truth, whether or not it be so.*

*Man has taken this mortal journey to have an experience through which he will discover himself and in so doing experience a release of his faith. This faith shall be the rope which leads him to the pinnacle of himself, should he be able to retain hold of it. Faith when discovered through experience will become the inevitable accessory that will facilitate attainment. What man begins to know through spirit revelation must be anchored in his faith lest he falters when the exigencies of life threatens the foundation of his knowledge.*

*The religion of spirit will always work through inner discovery; and this perpetuates a feeling of certainty and allows for that feeling of security that within you lies all that you seek.*

*The religions of your times are outdated and static in many ways. It preempts the fresh winds from passing through the minds of its followers that real discoveries and revelations of spirit may be enjoyed. It numbs the minds of followers and curtails their freedom to question and explore beyond the projected 'Gospel'. It holds on to what has been rewritten from generation to generation as truth. It*

*seeks to convert and dominate through authority rather than liberate. It keeps its followers stuck in paradigms and practices that do not field spiritual growth. It breeds differences between sects and superiority of one's belief or doctrines over another. It teaches love and tolerance yet is marked by division and disunity.*

*It deals in the finite; being that which is recorded as Gospel from cover to cover of a 'book' without an appreciation that God in HIS infiniteness cannot be limited by words on paper and cannot be experienced through the written word. The existence of God, the goodness of God the reality of God cannot be derived from what someone else tells you or what is recorded. It is to be discovered through myriad, vibrant mortal experiences.*

**Indeed man must intellectually comprehend God's processes and the science of creation but to know God in spirit man must experience him from within. Man cannot experience God through his outer senses but through his inner faculties that bear knowing.**

*The religion of spirit offers freedom, the ability to retain one's sovereignty, control over one's life, impetus to seek truth of God and self and the ecstasy in discovering the depth and breadth of spirit's knowledge.*

*A religion based on spirit will unify the hearts of men through the love of God and provide the knowing that God is individualized within each and therefore each has identical God presence within. It does not dictate or decide what one should believe for it thrives on progressive revelations. It allows for experiential insights whilst it leads to a shared or common understanding of the oneness and brotherhood of all, the sole destiny of the ascending mortal, the reality of the ONE will, a determination to accede to that will and the realization of self through service.*

*The barriers that have long held MY children in bondage will be dissolved in the wake of the ascension; for it is through this process that the spirit presence within each will find its resurrection in truth.*

*Welcome home MY little ones for the spirit of truth within each of you will be awakened and in this you will find your new religion".*

*The Creator Source*

Here are a few additional Divine Principles to keep in mind as we journey along our evolutionary path, our life journey.

*"To bring blessings upon yourself, bless your neighbor.*

*To enrich yourself, enrich your neighbor.*

*Honor your neighbor and the world will honor you.*

*To sorely hurt yourself, hurt your neighbor.*

*He who seeks love will find it by giving it.*

*The measure of a Man's wealth is the measure of wealth he has given.*

*To enrich yourself with many friends, enrich your friends with yourself.*

*That which you take away from any man, the world will take away from you.*

*When you take the first step to give yourself to that which you want, it will also take its first step to give itself to you.*

*Peace and happiness do not come to you from your horizon; they spread from you out to infinity beyond your horizon.*

*The whole universe is a mirror which reflects back to you that which you reflect into it.*

*Love is like unto the ascent of a mountain. It comes ever nearer to you as you ever come nearer to it".*

The conclusions to be drawn from what is set forth in the aforementioned are therefore indisputable, given the state of our world and the fundamentally criminal and misleading role played by so-called religions, whatever they may be. A paradigm shift, as is becoming clear, is imperative for our civilization, lest we lose all control of ourselves to the point of no return.

A new Philosophy of Life for a civilization that follows a lighted path in Harmony with the Laws of Creation must be founded on the discerning sorting of truths drawn from ancient teachings contained in all religions upon Terra, purged of their corruptions and merged into the higher teachings that will show mankind the way back to its lost freedom.

To the term "religion" we prefer "Philosophy of Life" because this path will see both the clergy and the entire organized religious structure give way to the integration, within the educational system, community and family circles, of the Universal Laws and High Teachings highest ideals that lead to wholeness in the fulfillment of the Self.

THE FREEDOM and SOVEREIGNTY for which we all yearn will become manifest when we, as creatures, finally begin to identify with the Creator--that is, when we come to know ourselves as God and God as ourselves--and act accordingly, in keeping with the Universal Laws of which mankind is the embodiment. In this regard, religious and spiritual practices--whether traditional or not--are in great need of being set right; and with the new knowledge of Truth, some adjustments will be made to

theories and precepts that have been corrupted and undermined by millennia of the reign of darkness in Human consciousness.

The only approach that is truly aligned with the Universe is, therefore, the returning to the Self--to the Divine within. That which constitutes and IS the Unity of Creation and all creatures, and which dwells in ALL. Since Mankind is fundamentally made up of three levels of being : the Conscious Self, the Subconscious Self, and the Supraconscious Self, to put it simply, understanding their roles and interactions is essential for proper functioning within the clarity of a deep comprehension of the Laws of the Universe, within which we exist and by which we evolve.

**This is literally a RE-EVOLUTION.**

No one Community, no one People can speak of Freedom, Self-Knowledge, and Sovereignty if its individual members are unable to recognize and embody these attributes.

### 3. The Education of Wholeness

This field, as previously emphasized, is one of the three (3) essential foundations--indeed, the central and crucial keystone--of Sovereignty and Freedom above all else. The reason is simply that the Mind-Spirit is the creator of reality, whose primary tool is thought process, and thus the Mind's ability to think clearly and appropriately depends on the quality of the information instilled not being such as to undermine its natural, innate foundations. It is these deviant practices, related to this area of paramount importance and fueled by a civilization of darkness, that confront mankind upon this Terra and giving peoples the runaround, setting the stage for repeated failures.

On the one hand, education must become free, open to all, and natural, and financially supported by the Federal State, the Federate States, and Life Communities that make up the Nation. Free because everyone should have access without conditions; free of charge because no fees whatsoever should be required of learners ; natural since care must be taken to ensure that the subjects taught align uncompromisingly with Natural and Cosmic Reality. On the other hand, a profound reform in terms of Quality must be carried out at the level of content, form, and organization. This means a 'cleanup' and a sorting process to be carried out in the educational curricula, as well as a reorientation and reorganization to provide a service tailored to the National and Civilizational Cause, along with improvements to the infrastructure--in terms of cleanliness and aesthetics--of the facilities intended to host learners. Classrooms and

school buildings should be built to maintain an optimal ambient temperature conducive to mental focus during learning, especially in areas prone to heatwaves.

Since it is individuals who make up Communities and Nations, it goes without saying that the values we instill in our children--progenitors of future generations--through the formal educational system, as well as social and spiritual beliefs, must be reviewed and corrected to ensure they take root in both individual and collective consciousness in an enlightening way. By integrating new positive values, we can and will raise Peoples' Soul.

Alongside the introduction of new, more appropriate, and simplified curricula, a new system for training and evaluating the Being will need to take root in lieu of the current jumble of nonsense and intellectual garbage that has ultimately rendered people sterile and completely disoriented. Souls in incarnation are each on specific paths, often paths of specialization, and the purpose of their presence on this plane is that which must be identified and served, after or alongside the acquisition of a required common foundation.

The scholar cannot survive without the manual worker. But the reverse is far more than evident. The scholar without the Divine is merely a machine entangled in mental combinations devoid of Light. Moreover, both the scholar and the manual worker, without the Divine Presence within them, are nothing more than human robots, aimless and without intelligence. If all individuals were to simultaneously manifest these two facets of intelligence and each take care of all their needs autonomously from the first stage to the final stage, there would be more respect and thus fewer issues of egotistical perception. But since this certainly cannot be the case in general, given that there are multiple stages and processes in every discipline and domain of human life, the Divine Order and intelligence itself would require that tasks be distributed. We must succeed in reintegrating these simple values of social life into our curriculum and re-inject respect into them.

In this new direction taken by the Esute-Atonla Peoples' Educational System, schooling institutions and infrastructure must get closer to citizens; to this end, they should be established and managed by the Life Communities, under shared oversight with the State. This means that primary, secondary, technical, and university education should be restructured and integrated into a single structure designed to train and educate students on the same campus, or at most two campuses. One campus would house all pre-academic disciplines, and the other all academic disciplines.

Establishing a study schedule that sets aside mornings for purely intellectual activities and afternoons for artistic and sporting activities would be more effective. This would help moving toward a balanced model that is essential for a sound development of the

individual. Less pointless brainwashing, in favor of higher quality in material, educational, and philosophical terms.

Formal graduating programs and trainings should be set aside in favor of **Effective Practical Knowledge**. Particular attention must be paid to the instructors' quality, since here, more than anywhere else, lies the future of entire Nations. Education itself must combine pleasure, joy, and discipline, and emphasize the restored history and values of civilizations, the philosophy of life (spirituality), physical education, the arts, scientific and technological research, and other subjects of Cosmic significance. Furthermore, the selection of instructors must meet requirements of competence--this goes without saying--and aptitude far more than any other consideration of acquired intellectual knowledge. The ability to impart knowledge with love and passion must take precedence.

## THE TERRITORIAL DEFENSE

### 1. The Regular Armed Forces

The military institution will now finally be able to truly fulfill its key role in defending and safeguarding the interests of Nations. Neglecting territorial defense--as many countries on the continent have done since their so-called independence--or demilitarizing the nation, given current and past abuses, in order to supposedly devote resources to development would be a monumental mistake. This could in no way constitute a wise resolution, nor even an option, given the aggressive and insidious nature of interstate relations in this world and the gangs of international criminals operating openly and roaming the corridors of powers.

It is of the utmost importance to quickly build professional armies composed of valiant citizens committed by vocation and conviction, and equipped with the adequate resources to carry out their mission. Without a strong, well-equipped, and well-trained Army imbued with a strong sense of national identity, of humanness, and loyalty--capable of effectively defending the territory against the most common threats--any national or continental reform and renaissance politics will be in constant peril of being thwarted by powerful, external dark forces seeking global control. Consistent and well-balanced institutions, along with a powerful army that is well-equipped and adequately supplied in terms of both quality and quantity to ensure that any external or internal enemy is rendered harmless, will be one of the main facets of the keystone of this colossal endeavor.

In the same spirit, we should seek selective, intelligent, and practical cooperation with States that are more advanced scientifically and technologically--militarily speaking,

of course--to the extent possible, capable of providing the nation with the necessary assistance to rapidly enhance its ability to mount an adequate defense against the Continent's age-old predators. Certain nations stand apart from the Axis of Evil that plagues our world, and they should be considered not with false pride but with caution. But most importantly, these new Nations must initiate a new type of weapons research and development structure that would render their Armed forces far more humane--both defensively and offensively--than is currently the case worldwide. The information provided in the works of Nikola Tesla, Walter Russell, the Phoenix Journals series, and others of the same ilk is available and awaits only our decision to make the best use of it. Above all, the Esute-Atonla States must quickly unite their military forces within a **Continental Confederal Political** structure in a spirit of unity and defense of the continent's territorial integrity, free from any harmful influence.

It is therefore imperative and undeniable that our Armies will have to rid themselves of the Paternalism, or rather--one might say--of the foreign military Occupation and thus of the colonial Army's secret agents, disguised as development workers and infiltrated throughout the workings of the state apparatus. For the so-called Francophone states in particular, it is absolutely crucial to cut ties and minimize relations with France for a time in order to heal the wounds and have a free rein in the reconstruction of Great Transnational Federations. And this certainly applies as well to all other states on the continent and across the entire globe.

The military organization needs to be reviewed and restructured--that is, streamlined to achieve greater efficiency through simplicity, free from the psychological and bureaucratic confusion of so-called modern times. Not only must the plethora of ranks distributed with or without merit give way to a clearer and simpler hierarchy, but the level of intellectual and technical operational knowledge must be raised, broadly speaking.

We could return to a military hierarchy consisting of a single class of officers : Generals. Their specialization would determine their function. The command of troops and various military posts would be assumed by Generals holding the rank of Commanders.

## 2. The Paramilitary Civil Defense

In parallel with the aforementioned reorganization of the military, a Civil Defense system must be instituted that involves the entire Nation to the greatest extent possible. This will differ in nature from the mandatory military service commonly observed. The National Paramilitary Civil Defense will transform all able-bodied,

trained, and prepared citizens into active defenders of the nation on a daily basis wherever they may be located, complementing the standing Army.

The various national security forces currently serving as Police, Gendarmerie, and Customs offices should be merged into this single, coordinated Paramilitary Civil Defense force under a dedicated General Staff that will assume the dual roles of customs police and internal public police.

This strategy will enable the nation to effectively respond to situations of war and destabilization of any kind, as well as to subversive infiltrations where regular Armed forces are quickly overwhelmed. Ultimately, this involves citizens' responsibility and the process of empowering them in this field.

### **LIGHT BEARERS : ORIENTATION & STABILIZATION**

At this stage, we reach the culmination of the entire organizational unfoldment. This involves the often-overlooked necessity for the emergence of a group of servants who are conscious of the Divine and walking with the Divine--as discussed previously in Chapter 3--taking on the role of ANCHORS OF LIGHT within Nations. This will involve anchoring, on a daily basis within the grid of the Collective Consciousness of Terra-Urantia--with a focus on the national territory involved--the cosmic energies emanating from the Central Source of Creation, the Universal Father-Mother. And this has to be done from various locations, physically or spiritually intentionally in unison.

With this in mind, networks must be formed through which global meditation sessions are scheduled at specific times to be agreed upon, in order to direct a concentrated and nourished beam of Light within and all around the globe as a whole, specifically toward places known to be negatively charged, the key institutions on a planetary scale where the dirty work against global life is planned and carried out. Everyone can also do this individually at his own pace, but on a daily basis as a duty toward Mother Earth, his fellow human beings, and all of Creation.

We, the people, will have to collectively redefine the global strategy for spiritual warfare without any form of separation, hierarchy, or supremacy over any (material) level whatsoever, all things being intimately intertwined. We must turn our gaze toward the power of the Divine Presence dwelling within our beings through daily meditation and communion with the Father-Mother within. Our various daily or weekly prayers must be transformed into conscious meditations in intentional communion with THE ONE, who is within, during which we send Light, positive thought-forms with the pure intent of healing, boosting, and raising the collective

consciousness of the People so that they may regain sufficient inner clarity, unity, and wisdom to stand up and hold their ground against the reign of terror imposed upon them, and shift the balance of power in their favor.

Once this is set in motion, it will finally bring forth the Ability to adequately Respond to the evil we face, by finally making use of our powers as creators coordinated on both the subtle and material planes of reality, and will activate substantial Divine assistance--which alone can help peoples pull themselves out of this evil abyss. Otherwise, the civilization will surely self-destruct.

### A LIGHTED LEADERSHIP MOVED BY SERVICE ALONE

*As we know, even the finest Human organization or institution conveying the most grandiose ideology is only worth the soundness of the representatives who are the driving forces behind it.*

Therefore, the leadership soundness is of paramount significance to the successful establishment of the Divine Enlightened System discussed herein, which aims to liberate hu-mankind from the yoke of oppression and enslavement by other humans in minority comfortably entrenched in their egos. Just as the world's current leaders are almost all distinguished by their membership in obscure secret organizations of Luciferian allegiance--despite the outwardly skillfully maintained pretense of divisions and differences between left, right, center, center-right, and center-left, opposition and power--the new leaders who truly embody change and a total break with the old established order must be in the knowing of that which they are actually fighting for and against, and focus on the common interest, the real targets, and the education of the People toward a keener sense of political issues and the PURPOSE of LIFE. Amateurism, selfishness (going it alone), and pride (arrogance) must give way to something far more professional, impersonal, and truly timeless.

Some have to step aside to make way for others more up to the task of steering the People's Boat from the outside, since there is also a colossal amount of inner work to be done. The within even takes precedence over the without in every sense. One does not serve a Nation to reap personal material or immaterial benefits. One does so out of love and devotion. And if this is truly the case, what one should seek above all is the support and allegiance of the People--and the People alone--before any other political or economic considerations. This is what gives weight and authority to the leaders standing for People aspirations, commanding respect and fear from the usurpers who will eventually surrender, having run out of tricks and resources, drained by the constant waves of Love and Light that never cease to surge into the collective consciousness, bringing about awakenings and transformations for the good of all.

Once a clear political line and strategy are adopted and followed in the interest of the People--who may not always be aware of or convinced by the relevance of certain measures and actions taken, given their confusion--the events, the task coordinated by the Divine Father-Mother will eventually overcome their reluctance and uncertainty, leading to their full support. The path is therefore clearly laid out for those who make a conscious choice to go along.

## A MONOPOLAR POLITICAL DYNAMIC

This dynamic is succinctly well summarized in the following terms:

**What is accomplished and successful locally is what is nurtured and projected on a global scale.**

Foreign and Diplomatic Relations must therefore be reviewed to achieve this goal.

The independence of the individual leads to total dependency on the SELF, THE DIVINE SELF within. And this is the foundation upon which Nations must be built as a Matrix of Interdependency which is called THE Enlightened Civilization, since what applies to the Individual applies to the Nation. The concepts of independency and dependency--and thus of Interdependency--cannot therefore be mutually exclusive.

Such a Civilization founded under the authority of the Creator God cannot take any path other than that of a Fraternal Unity embracing all Peoples upon Terra Urantia. This chosen path will be defined in the various political fields in a coherent and consistent logic as follows.

### 1. The Sub-Regional Field

In the Subregional Field, the inescapable approach is that of establishing large, powerful Federations that are sustainable, viable, and reliable. The eventual progression of these already consistent and well-structured Federations toward a grand Confederation of the United Peoples of Pe-Esute-Aton can then take place through a simpler--and thus easier--process. The model of Volitional Systemic Self-sufficiency (Autarchy) must then be systematically observed within all established Federations upon the continent, and this is what is advisable and recommended for the entire Planet.

The process must imperatively be driven by the initiative of the first countries that have the political willpower to take this step without waiting for others to join in in a collective decision. To hope that nations can all together move forth in this widespread sociopolitical imbroglio, purposely maintained by invisible hands, amounts to political irresponsibility, immaturity, and blindness, if not outright conscious sabotage. It cannot possibly be envisioned a genuine Re-Evolution toward Self-Sufficient Sovereignty in Pe-Esute-Aton outside of an integrated and sufficiently vast transnational territorial space. It is not imperative to achieve this all at once on a continental scale--quite the opposite.

We are still grappling with the heavy consequences of the psycho-military-political schemes set up by those so-called colonial powers prior to so-called independences, which have systematically undermined all endeavors of some of the countries of the Continent to move toward more substantial and viable forms of union. Three countries or so, preferably with territorial continuum, moving in this direction would break the deadlock of the insidiously imposed inertia.

## 2. The Continental Field

In the Continental Field of Pe-Esute-Aton, the building of large and powerful Subregional Federations, once completed, will lead to a balanced Esute-Atonla Continental Federal Government that effectively represents the peoples. The evolution will proceed toward a great Peoples Confederation in a first stage, before reaching the Ultimate form of FEDERATION OF THE UNITED PEOPLES OF PE-ESUTE-ATON. This is the model envisioned for Planet Terra at this stage of our vision of the LIFE journey. This will make LIFE easier and more oriented toward SERVICE in LOVE and LIGHT, thereby distancing people from the ignorant herding mindset and amateurism observed thus far in all initiatives upon the Continent.

## 3. The International Field

As for the International Field, in line with the prescribed Monopolar Political Dynamic, need be to form alliance with and lend support to all Nations grappling with the dark forces that sow division and desolation all around under the pretext of democratization, globalization, and freedom, and coordinate our actions and efforts with those of other nations in favor of dismantling or re-establishing the UN, which has been a Satanic tool from the very beginning. The League of Nations was nothing more than a precursor to this failed attempt to establish an instrument prelude to a World Government/New World Order.

The new International Organization will have to be a high place for ongoing interactions and research leading to a Harmonic Convergence of the Nations that dwell upon the surface of Terra Earth.

The UN and all its affiliated organizations--the IMF, the World Bank, the WHO, etc.--will have to be dismantled.

#### 4. The Globalization

Globalization or World Government. It's all the same. That's the trendy refrain that echoes through every speech by the politically and intellectually correct. And the media all are having a field day, parroting these concepts in unison--practically every day, without any critical sense--that ordinary citizens have ended up accepting them without really understanding what they're all about.

In reality, the secret agenda is the establishment of a Global Regime of Interdependency over which the World Government would sit enthroned.

In fact, globalization is to be welcomed from a very specific perspective: the institution of a culture of brotherhood and unity, custodian of lasting Harmony and Balance in the relationships between Communities, Nations, and Races that dwell upon Urantia. But what we have been witnessing for a much longer time than people realize is a farce that is part of the implementation of a decisive phase in the agenda of the proponents of the Satanic World Government to establish a global monopoly over world economies while maintaining the current evil order of things, that is, billions of slave laborers serving a numerically insignificant Elite that concentrates in its hands all the wealth and technologies on Terra.

There is an alternative to this ambush in which we have been ensnared for far too long, and the awakened and dignified peoples of Urantia must become the torchbearers of this new worldview--one that is more respectful of Life and places at the center of every endeavor HU-MANKIND AND NATURE, in which and through which HE lives. The people of Urantia must get organized and demand that the following reforms be implemented on their respective continents and exert influence on the international stage in the same direction :

1. Dismantling of large monopolistic structures that threaten citizens' freedom and States sovereignty, and denunciation and withdrawal from all imbalanced international agreements, conventions, and treaties--such as the ICC,<sup>22</sup> IMF,

---

<sup>22</sup> International Criminal Court

World Bank, UN, etc.--which have never been anything other than tools of predation, repression, and blackmail for the use of a small club of internationalists.

2. Dismantling and abolishing of the Fractional Reserve Banking and International Finance System, and replacing it with a more equitable and balanced one. A system that would put an end to and render impossible monetary, financial, and stock market manipulations and speculations, and that would prioritize the internal needs of communities in a dynamic of Volitional Systemic Autarchy.

3. Setting in motion a process toward the establishment of a Planetary Governmental structure operating on the principles of respect, equality, and consultation among all Urantian Nations without exception, which will be the culmination of the new enlightened formula of Planetary Union and Brotherhood.

4. Active and direct solidarity among all nations of the world for a rapid and effective eradication of hunger, disease, drugs, and ghettos upon the surface of Terra-Urantia, which will finally restore a Hu-man face to this global Civilization.

## EPILOG

The rise and fall of a civilization always revolve as follows:

*From bondage comes spiritual faith, and from spiritual faith comes courage.*

*From courage comes Liberty, and from Liberty comes Abundance.*

*From Abundance comes Complacency, and from Complacency comes Apathy.*

*From Apathy comes Dependency.*

In life, we all choose to be born in a specific place and within a specific community for a mission agreed upon in advance, even though the amnesia caused by the process of descending into a matter vehicle (birth into a physical body) --exacerbated by the false teachings of this world--leads mankind, most of the time, to claim the opposite. Our primary role, when descended here below on Earth, is about being in the recalling so as to avoid the distractions and missteps that have, rightly, become the lot of our Humanity. And this, so that people may fully embrace the task that is theirs: the transformation of this pre-human civilization into a Human (Higher Universal Man) Civilization of Light wherein Peace, Harmony, and Balance reign.

The fact remains that there are psychocultural and spiritual impediments that many will have to overcome in order to eventually attain this state of being--this point from which one decides to become spiritually grown-up and emotionally mature so as to take control of one's reality. But this proves to be a necessary step if mankind truly wishes ability to mold the future of his Nations--without exhausting and frustrating setbacks--into a state of Stability, authentic Freedom, and ever-renewed Harmony.

It seems so obvious that, given the tangible outcomes of various sociopolitical events around the world over the past decades, the peoples can no longer expect anything from the 'traditional' dead-end paths of popular conquest or re-conquest of political power. We will go from disappointment to disappointment, from recapture to recapture, and will eventually disappear from the face of this Terra, stuck at the same level of darkness and stupidity we were when descended into the physical plane of manifestation.

No society can truly claim service to Light and Life if decision-making power is taken away from the People, who are its true holders, despite the illusion that the current global system confusingly perpetuates in our muddled minds. There is a need for constant public vigilance and accountability so that the People may retain control over their Nation's affairs; and for this to be effective, the Political and Civilizational Play must be redefined on the basis of DIVINE TRUTH AND WISDOM.

It is clear that by considering a genuine reorganization of the mechanisms through which political power is exercised--so that ordinary citizens truly take the helm and ensure that representatives and those in power feel they are under constant scrutiny and can be easily removed from office in the event of corruption or betrayal--this would place a permanent responsibility in the hands of the individual entity, who would see it as an obligation and/or a duty to keep a watchful eye on the functioning of the Nation at various levels and thus truly assume its role as custodian of the Civilization.

The conscious and responsible involvement of every individual is the key, and this must be highly sought and demanded. And once the state of abundance is reached, we have the duty to ensure that complacency, which ultimately ends up leading to apathy, causing civilizations to sink back into dependency, that is, to collapse--is banished from our minds.

The collective consciousness will thus no longer have time to grow complacent or to rely on a minority to dictate that which it should do and believe. It is imperative that we break free from old, flawed, and ineffective patterns so that we may surprise ourselves by venturing into uncharted or long-forgotten territory.

To Your Courage, Peoples of Terra-Urantia !
