## Foreword

Reading this book is essential for anyone seeking a prompt psycho-behavioral adjustment, for the simple reason that if you do not know where you come from, you are lost, and this undeniably. A path always leads to a destination, and the destination presents a goal, so to speak. The life path has a beginning and an ending, a destiny, and the latter cannot be fulfilled if the starting point is lost sight of, for it is the point that determined the destination.

When we speak of life, we speak of sex, a principle that lies at the beginning and ending of all living things. A misperception of sex messes the whole thing and makes a fool of you and drive you mad. Eagerly, may those with eyes see and with ears hear, for this is the key to salvation, whichever way you look at it.

## Introduction

Sex, as it is currently perceived and practised by the humanity present, is fundamentally perverted and self-destructive in nature, to be more precise, lethal. This factual situation is merely the manifestation of the consequences of a mind control aided by a psycho-emotional mechanism established and controlled by a so-called 'invisible' minority of beings who are fundamentally evil, seeking their supposed 'immortality' and maintaining their ability to fuel their rebellion against God.

The general condition of human society, and more specifically of the family unit through which it all begins so badly, bears ample witness to the immense confusion prevailing regarding the functions of sexuality on this Earth. Yet sex is the one and only principle at the origin of life and all its manifestations. To sexualize is to polarize is to set in motion. And the mental process that polarizes is what is called thought or sexualization.<sup>1</sup> Thus, thought or sexualization consists of taking an idea--the ideal realm being asexual--and setting it in motion through thought, thereby giving it a living thought-form, life being motion. It is at this moment that the invisible becomes manifest.

Consequently, becoming aware of this, understanding it fully, and enhancing oneself into activating and mastering functions of this sublime Divine gift is the only path that enables human being to make higher use of it, from which all its Divine benefits flow. Namely, eternal Health, the desired Longevity, permanent Joy, the perfection of the trine body, and all that one desires most of all: Divine Wisdom. And this necessarily involves the practice of a meditative exercise of pure intent aimed at activating and gaining control of the Life Force.

However, to take the very first step on this most marvelous path of Divine creation, humankind upon the surface of this globe will have to take some radical corrective measures. These consist of using one's sexuality in accordance with the Divine Principles and Commandments given to illuminate his pathway. This is achieved, and will initially be achieved, through the technique of intentional sexual simulation, with the aim of attaining orgasms of ever-higher vibrational frequencies. This has the merit of steering ones away from addictive fornication, which brings nothing but death and premature aging to the physical body. This is the path to Divine Wisdom.

The intent in this writing, therefore, is to humbly offer--based on my experience in the field of sexuality and the high teaching received from the Divine Hierarchy--a contribution susceptible of correcting, as far as possible, the serious deviations

inherited from the intrusion of the anti-God Parasitic Forces of Sexual Energy into the evolutionary path of the human race.

The aim is to highlight certain key stages that must be integrated, as a starting point, before moving on to the proposed practice of meditative techniques which will rapidly align, at all levels of the trine body, daily thought with a higher perception of this Prime Vital Energy.

It is certain that with this readjustment, the individual will fare better, and so will humankind as a whole. The way our societies perceive conjugal relationship, family and the need to procreate will get some higher perspective to the betterment of the whole Earth's civilization.

## Consider The Purpose Of LIFE

The first (1) crucial step on the path to awakening of an individual consciousness is to have knowledge of the true purpose of Life. A sound explanation is provided in the following paragraphs.

Let us consider that the purpose of life is to reach the topmost pinnacle of Human unfoldment. That topmost pinnacle--beyond which no man can go--is the illumination into Cosmic Consciousness and the Consciousness of Christ. There is need, therefore, to help every seeker by efforting to illumine the path to that supreme goal, so that he can become aware of his own immortal divine SELF. Consequently it must be given insight as to HOW to touch and use that which is within us that we can find our own TRUTH.

The divine spark of that Light lies dormant in every human being. As long as that Light does lie dormant, one is aware only of one's mortal body which lives and dies and has physical desires one is forever satisfying. That awareness of physical existence lasts for many centuries after primitive Man emerges from the jungle and before the dawn of his Consciousness begins to awaken a slight awareness of the Light of his divine power.

During that period, he is dominated by his body desires to such an extent that he thinks and believes that his body IS his Self. Out of millions of sensually-dominated humans, however, comes one who awakens that unquenchable divine spark which all inherit from God, and becomes somewhat extraordinary during his human experience for he is given to bear extraordinary knowledge and power. These extraordinary characters are those we refer to as "geniuses" or "prodigy". This is the first step away from the purely physical human toward the Spiritual goal. Every genius prodigy has begun to develop God-awareness within and knows that he is MIND and not body.

All body-dominated human beings think outwardly through their senses. They can hear sounds with the ears of their bodies.

They can see objects with physical eyes and record the memories of such sensations upon their brains.

Every genius thinks INWARDLY toward his Mind instead of outwardly toward his senses. The genius can hear sounds coming out of the silence with his inner ears. He can vision nonexistent forms with his inner eyes and he can feel the rhythms of God's thinking and His knowing--which are a blank slate to the man who believes that he IS his body. When a human rises to the exalted state of genius, he becomes a co-Creator with God. The beginning of creative expression in man is the first evidence of the unfolding Light of his genius, for no man who is purely sense-controlled can create. He can remember and repeat the records which he has imprinted upon his physical brain,

but his brain has no knowledge. Therefore, he cannot create. **Man can create only with his MIND--and the brain is NOT the mind. The brain is merely the seat of sensation and the electric recorder of sensation.**

The Cosmic Hosts have been sent to insure that we are afforded the opportunity of having Truth from which to discern our destiny and divinity. This is important and bears repetition if we are to understand through all the misperceptions given forth to date. We are coming down to a cycle "finish line" and it is the time of becoming enlightened unto how things "really" function and operate and cast aside the lies and misperceptions lest our decisions be indeed costly to our journey.

Humans must think outwardly through the senses in order to live and function in a sense-objective universe, but the genius--who thinks inwardly toward the Light of his Self--can vision or imagine that which spiritually exists and can then think outwardly through his senses and cause his mentally-visioned image to exist physically. That is what Creation is--and what the genius-creator does.

**Substantial summary. Human being is an ascending creature, meaning he is destined to embark on an ascending career at the end of which he will reach a topmost pinnacle beyond which no man can go. But when he begins this journey, he finds himself stuck in a state where he is only aware of his physical body, around which for him everything revolves. During this period of his evolution, he knows no other way than to think externally through his physical senses. Then comes a period when he becomes aware of his true being, and the focus of his thoughts shifts inward, toward his Divine spirit. It is from this point that his rising begins. He becomes a co-creator with His Creator-Father, and his creative potential unfolds until it reaches its culmination, The Purpose of Life.**

### **Transform Thought**

The second (2) step in this journey toward a complete awakening of consciousness involves the individual transforming his thinking -- the way he thinks on a daily basis -- because thoughts form the very foundation of creation; they literally create our realities. The following excerpt sheds light on this subject.

So, what is our first task if we are to attain enlightenment? It is to learn HOW to transform our thinking so that the wondrous genius within us will appear and intensify to that higher state which transforms and transmutes us into the next stage of spiritual unfoldment.

A few great geniuses have given the world its culture in all of the arts, and the great immortals among them are the few whose works will endure as long as there is history. The journey of LIFE is indeed long--and one must come to know that it requires many experiences and manifestations (incarnations) to arrive at the destination in the Light of all-Knowing. Each life, however, is another step toward that goal, and each day of each life can be a greater step than the one before.

Each experience is vastly important. When we arise from each period of sleep with a wholly regenerated body, the seed of all that has transpired in all our lives unfolds within the new cycle of life to bring us still closer to the door of the Immortal Light.

Each step upward toward that Light is a glorious one, for it becomes ever nearer and is worth the effort of its attainment -- while each step the other way toward the dark is ignominious and fraught with cosmic frustration which may take many experiences to overcome. Hence it is that we **MUST** go forward to attain that glory, and these lessons are for the purpose of giving mankind the knowledge which will make it possible for him to go forward toward the Light to any extent that he desires without limitation, **FOR MAN'S LIMITATIONS ARE SET BY HIMSELF.**

Cosmic knowledge can be shared with others who desire to attain it but only those who have attained can "give" it unto another. Of course, the "other", must accept the gift lest it be worthless. God has given that rarest of all gifts to some of us for the purpose of regenerating this decadent age by bringing the Cosmic Age into existence through those higher beings of earth who are ready to receive such knowledge. To all who reach toward the Light, the gift is offered. The knowledge of God's ways are brought forth, likewise the processes and laws governing the construction of matter and electric motion so that other men may, likewise, know how God builds His universe and destroys it in eternally repeated life-death cycles--and also knowledge of how the Creator divides His light-waves of thinking into balanced male-female pairs of sexed opposites to continue the building of His sexed-electric universe.

But this one portion of knowledge is not enough to bridge the chasm which Man has presented as blockage between himself and God. Therefore, we must consider a balanced living philosophy which conforms with God's ways, processes and laws. If we have the **WHOLE** we will be able to grasp the peace, happiness and prosperity which conformity with God's Laws can alone bring to warring fear-ridden man who unknowingly defies God's Laws, or blatantly knowingly defies them.

Man has not yet realized in the building of his individual or collective destiny that God will work **WITH** him in the unfolding of his destiny, but He most certainly will not work **FOR** him. We must **KNOWINGLY** create ourselves and our destiny **WITH** Him and in accordance with His law of balanced interchange in all transactions.

TO WORK WITH GOD KNOWINGLY, WE MUST KNOW GOD AND HIS WAYS. WE CAN KNOW GOD ONLY BY KNOWING OURSELVES AS MIND INSTEAD OF THINKING OF OURSELVES AS SENSED BODY.

The transition from sensed-body awareness to God-Mind awareness comes to the human race very slowly. Man can think only what he knows in his Mind, or senses through his body. Likewise, the same principle applies to nations. Men and nations become what they think, and we witness this happening before our eyes--the point is, however, that the perception is being placed there by others to manipulate for very human physical reasons. Standards are determined by what people and nations come to think. High standards are attained through Mind-determined controlled thinking, and low standards are attained through sensed thinking.

The PHYSICAL world of Man could easily disappear into another period of dark centuries (whether on this planet or another)--for half the world is already in the dark ages of understanding while mired in the dark ignorance. But MAN'S SPIRITUAL WORLD CANNOT DISAPPEAR--THE DIVINE LIGHT IN MAN CANNOT BE QUENCHED!

CIVILIZATION WILL SURVIVE AND GROW TOWARD THE LIGHT ONLY IN THE MEASURE IN WHICH MANKIND KNOWS THE LIGHT--that means a lot of tedious lessons to be learned and practiced. So, we are receiving an increase of the measure of our knowing in order that we may become consciously aware of our Source to such an extent that we can knowingly say, "I and my Father are ONE", and have FULL COMPREHENSION OF ITS PROFOUND MEANING.

The oldest communion known between God and Man is through "meditation" and yet, mankind has all but destroyed the beauty of the meaning of the communion through his misuse and implicit toying and game playing. That is always the thrust of the adversary to draw people from their Lighted Path via disappointment and lack of success in communion. If we fail, we will discount the next who comes and offers information by the same label. All one can do is offer the cup and if one drinks not, so be it.

The connection to God is INSTANT--the perception of the connection is elusive. We work so hard at that which we think we need to do to make contact--that we actually miss it. First, we must KNOW that which we are efforting to accomplish--not simply play a game at "location", "dress", "food intake", etc., for all of these things are of the physical senses and have naught to do with the Mind-thought of God. There are physical sensual methods to assist in "focus" of energy--but that is the only connection of ritual--only as a focus of thought-energy.

So be it. God grants that which is petitioned for in sincere Truth--THE CALL COMPELS THE ANSWER.

Substantial summary. In order to liberate oneself and attain enlightenment within the higher Divine consciousness, human being must undergo a process of transforming his thinking. And only this metamorphosis has the power to free him from his self-perpetuating psycho-emotional shackles. Nevertheless, this inevitably requires maintaining a conscious connection with the Divine Presence within oneself for a conscious, intentional work in this direction, for God alone, the One Reality, guides and adjusts our thoughts. This Divine communion is what we achieve through the practice of transcendental meditation.

### What Is Meditation

The third (3) step on the path to authentic spiritual awakening lies in gaining a deep understanding of what meditation is, and in practicing it intentionally every day to achieve an ever clearer and more powerful communion with the Divine. For it is through this path alone that creation-man effectively communes with its Creator. The following excerpts will clarify the picture for the reader.

### Define Meditation

Meditation is man's desire to know God within himself and to manifest his Divine consciousness by extending his knowledge--through his thought--to the production of material bodies created by him in the image of his inspired conception.

Let us put it more simply by saying that MEDITATION IS A DESIRE TO BE ALONE WITH GOD TO SPEAK TO HIM. MEDITATION IS TRULY A CONVERSATION BETWEEN YOUR SOUL AND THE UNIVERSAL SOUL. To be One with God means to desire His knowledge and His power. The Spirit of God is your Spirit; which is why you possess all the knowledge and power that God has, to the extent of your awareness of God within you and your understanding of your oneness with Him. If the knowledge of God lies dormant within you, it must be awakened so that you may become aware of it. Once you are aware of it, you can utilise it to the extent of your ability to understand it. The entirety of the Universal Law works with you at your command.

## Scientific Explanation of Meditation

THE FOLLOWING INFORMATION IS A PRESENTATION OF THE PHILOSOPHY OF LIFE, PRESENTATION OF THE UNIVERSAL LAW AND FRANKLY, NATURAL SCIENCE AS IT AFFECTS THE UNIVERSE AND MAN IN HIS PHYSICAL ENVIRONMENT. IN OTHER WORDS, ONCE MAN UNDERSTANDS AND APPLIES THE PRINCIPLES SET FORTH BELOW TO HIS LIVE, RADICAL CHANGES WILL SOON BEGIN TO TAKE PLACE IN HIS DAILY LIVING.

Now once again to "meditation" for that which it REALLY is.

Meditation is the MOST IMPORTANT of all the functions of human life which advance human progress. So little is known of it even by the greatest of the world's geniuses who constantly practice it in a "knowing" state--but cannot explain it--that it now seems necessary to define and explain that divine function. With sufficient explanation, everyone can KNOWINGLY practice meditation and thus knowingly command his achievements to be masterly. The concept is universal and works toward both goodness and evil so the use thereof rests solely in the individual personality utilizing the information.

WE CAN LEARN TO COMMAND ACHIEVEMENTS, COMMAND THE BODY INTO PERFECTION, OR OUR LIFE TO BE FULL TO OVERFLOWING--FOR THROUGH MEDITATION EVERY MAN CAN BECOME WHATEVER HE WISHES TO BECOME. But, of course, we speak of TRUE meditation and not the games of gurus and "new-age groupies" who do not fully understand a thing they are practicing.

*Meditation is communing with GOD for the purpose of working knowingly with GOD. This is the definition with which we will exclusively work. If you do not practice in perfection, you will most likely commune with the evil resources and never make it to communion with the GOD OF LIGHT! The physical representatives of your "senses" of the physical manifestation will ALWAYS show up first and lie, lie and lie to you--furthermore, it is up to you to cause and demand they remove themselves for they are permitted to remain and deceive until YOU DEMAND THEY DEPART AND YOU ASK IN THE LIGHT AND ONLY THE LIGHT OF GOD BROTHERHOOD.*

**MEDITATION MEANS TO THINK INWARDLY TOWARD THE MIND-SOUL RATHER THAN OUTWARDLY THROUGH THE SENSES.**

At any rate, you recall that "Christ" told Man to seek the "kingdom of heaven" WITHIN HIMSELF, NOT OUTSIDE OF HIMSELF. By that He meant that God dwelt within man, and that God-awareness will come to any man who communes with God through inner thinking.

There are but two kinds of thinkers in the world--those who think outwardly through the brain and those who think inwardly toward the Soul. Outward thinking develops the physical qualities and desires of men, while inward thinking unfolds the spiritual qualities which await unfoldment for long ages of man's slow journey to the Light of his own Divinity.

### Working Knowingly With GOD

Finally, the fourth (4) step on this wonderful path to enlightenment consists of putting all the previous steps into practice and using it to move forward, every day, every minute of life, in all our endeavours, as ONE with the Creator, the Divine Presence within. To become a co-Creator with God within. Further clarification is provided in the following texts, which should be of great assistance to the reader.

When we KNOW that God's Mind and ours are one, and we are consciously aware of His presence every working moment, our work could not be other than masterly. ONE CAN KNOW AT ANY MOMENT WHEN ONE'S WORK IS NOT MASTERLY. To work knowingly with God constantly, never ceasing, is to be inspired constantly with the ecstasy of His nature. One can also recognize this instant where one's work is NOT MASTERLY and is again only outwardly through the "senses". All who are projected as humans in the physical world will function through these "senses" because IT IS human to do so. It requires training and desire to come into the KNOWING OF FUNCTIONING WITHIN THE MIND-SOUL.

To work knowingly with God constantly, never ceasing, is to be inspired constantly with the ecstasy of His nature, as it has just been said. God is our teacher in actuality and we need no other. He is always with us, as Soul, and lifts us all to great heights. Some have walked and talked and worked KNOWINGLY with God throughout our human experience--but it is rare indeed that they did so in TRUTH for usually the evil deceiver gets there first and pulls the human into the worldliness of "things" and "fleshly desires" and God is pushed aside. There have, however, been the blessed ones who have not been pulled into the trap, or once out of the trap, are not again ensnared. You will find these ones neither foolishly pious in presentation nor "simply BEING". They are very human in presentation, often functioning within the human aspect WITHOUT and through those human "senses" and always "busy"--not "just being". For it is through our actions that we are judged--not our sitting on our assets "being" nothing. For if we are doing "nothing"-- we have made our decision as to whose side we are on, already, and we but fool of self--the biggest fool of all!

HOWEVER, AS WE MOVE ALONG IN APPOINTED TASKS--WE MUST BE ABLE TO DEMONSTRATE BY OUR OWN LIVES THAT WHICH WE MUST TEACH TO OTHERS. WE MUST LIVE IN A MANNER WORTHY TO MANIFEST THE POWER WHICH GOD GIVES TO EVERY MAN FOR THE MERE ASKING, AND TO IMMUNIZE SELVES FROM ALL THAT IS UNLOVELY IN ORDER THAT WE COULD FOREVER CREATE WITH HIM THAT BEAUTY OF BALANCED RHYTHMIC THINKING WHICH IS HIS UNIVERSE.

Before we move into the steps of How and What, etc., let us visit a bit about ego self. This IS the manifestation of greatest sensing in the human being. It IS that which causes the separation and to simply "override" that ego is totally an incapability for it IS our humanness! We will never override it, but will train it to willingly give access to higher influence. We will mold it to set aside of itself to allow and welcome God within. It is the ego which stands at the door of the soul and allows or disallows passage within.

There are methods of causing that ego to step aside--that human consciousness to bow to higher input, to negate self unto higher knowledge, but it requires knowing the "how-to". But a hint -- this is WHY the orthodox doctrines of religions will deny use and pronounce hypnosis as EVIL. It is the ONLY route to accomplish the setting aside of that ego through YOUR OWN POWER. Again, man has ruined the very term and caused something which is THE TOOL of God to be pronounced evil and to be avoided at all costs. Again, so that the "would-be rulers of our destiny" can remain in total control of our physical aspect and likewise keep our soul entrapped in the lie.

**IF MAN CAN KEEP US FROM COMMUNION WITH GOD, HE CAN CONTROL US!**

If we are ever to find God and be WITH HIM, WE MUST COME INTO COMMUNION WITH GOD AND BYPASS THE INPUT OF MAN.

Since our time as man is short indeed and our time with God is long, infinite, would it not be worthy to learn to talk with God and get His instructions for passage and cease and desist listening to the misguided and misguiding ones from the pulpits and thrones of "authority" and "expert blatherings"? IT IS THE CONTENT OF THE MESSAGE WHICH IS TRUTH OR FALSE AND ONE WILL DISCERN THAT FOR SELF, NOT ACCORDING TO WHAT OUR NEIGHBOR TELLS US -- FOR THAT IS ONLY WHAT OUR NEIGHBOR PROJECTS.

IN REALITY, IN THIS PHYSICAL WORLD, CONTRARY TO WHAT WE MAY BELIEVE, WE CAN HAVE THE MATERIAL AND SPIRITUAL ASPECT OF WHAT IS DIVINE ABUNDANCE. INDEED, WE MUST KNOW THAT WE MUST BECAUSE GOD IS EVERYTHING. BUT, WE MUST FIRST HAVE GOD -- THEN,

AND ONLY THEN, CAN WE RECEIVE IN "VALUE" APPROPRIATE THE "SUBSTANCE". IF WE "TAKE/RECEIVE" FROM GOD IN ABUNDANCE AND THEN REFUSE TO GIVING IT TO GOD FOR HIS USE, THEN THERE IS NO MEANS BY WHICH GOD CAN "REGIVE" UNTO US AS WE HAVE LOCKED OUR HANDS AND HEART TO RECEIVE MORE! REFLECT THAT, BECAUSE IT IS A VERY IMPORTANT LESSON.

TO THE EXTENT THAT WE CHOOSE, ALL THINGS OF THE PHYSICAL ARE OF USELESSNESS FROM THE TIME WE LEAVE THE PHYSICAL PLAN -- AND ALL GOES THROUGH THIS FINAL CYCLE!

God is not mystical, strange, pious, foolish, or preposterous. HE is a very practical resource and it is best that we separate all the nonsense from the focus, and look at God as the reality of the manifestation that is represented herein. We do not need all this religious indoctrination because it only keeps us in prison. We'd better put aside all the absurdities and get on with that which is REAL because our illusion is killing us!

Substantial summary. When a human being has finally integrated all the transformation stages leading to the necessity of a permanent communion with the Creator-God within, the inevitable outcome of this entire process is the dedication of one's daily work to co-creation with Him. To put it more plainly, every thought, deed, and action of the being must pass through and/or seek the approval and guidance of the inner Thought Adjuster, the Divine Presence. In other words, the awakened human is led to seek first and foremost the Kingdom of Heaven--that is, unity with the Father--since materiality will surely fade away, while the benefits derived from life's experiences remain in eternity with the spirit-soul. Above all, seek God, and all else shall be added unto you in abundance.

## Noble Sexuality & Its Function

### What Is The Sex Principle

In order to help the reader better grasp the unfolding in the table of key concepts that follows, there is need to lay the groundwork regarding the Sex Principle in its Cosmic Creational reality. What follows will help set the record straight regarding this creative principle of all life that is sexuality; in other words, polarity, the father-mother/male-female principle. All of this is directly linked to the Thought Process, which is another term for the Sex Principle at the

foundation of manifested life. Hence the imperative for thought transformation highlighted in chapter two of this work.

Quoting.

It is commonplace knowledge that everything which comes out of the earth, both vegetable and animal, issues from seed. You know that the fathers of man place their seed in the mothers to produce both fathers and mothers of the human race. So it is, also, with animal life. In vegetable life, the seed is inserted in other ways such as pollen being carried by bees from one flower to another, but you do not refer to that process as being the work of fathers and mothers due to the failure of science to give recognition to the fact that the DIVIDED universe of pairs of opposites, which issues from the zero UNDIVIDED stillness of space, is the sex principle of all Creation.

The sex principle is the most basic fact of Creation.

It may be that the inability to recognize the sex principle in the mineral world was the stumbling block which caused that to happen. We say to you, however, that the mineral kingdom also comes into existence through the seed of fathers and mothers interchanging.

Invisible gases also have fathers and mothers. These are of still lower potential, for they issue from the unknown and uncharted inert gases below helium. The Russell charts show these gases. They have been given prior to this but should be entered into these last books also for quick reference.

It is commonplace knowledge that all vegetable and animal life unfold from their seed and return into it. Everyone is familiar with the many acorns of the oak, the many seeds of the maple, the flower and of man himself, but he is not familiar with the fact that every gas and mineral, likewise, refolds into its inert gas-based seed. They all do, however. To prove it, pass a high voltage current through a tungsten filament enclosed in an electric bulb or, better still, through an evacuated tube. The residue will be helium.

End quoting.

Thus, here is what is essential to retain about sex. The principle of what we call Sex is the fundamental tool of creation, of all created things. Man is sexual, meaning that both his soul essence and his physical body are manifestations made possible by polarization--the sexual division, of pairs of opposites, fathers and mothers, males and females. The same is true for women. Only the spirit--their spirit--is asexual. Everything that is manifest is in motion, and therefore vibrates. At spirit, there is no vibration. Our spirit, in the image of that of the Creator-God,

is the creative source of that which is in motion, both immaterial--namely, that which eye cannot see--and material.

We must also understand that there are several levels of density in the material world and just as many in the immaterial one. Physical manifestation, as humanity currently experiences it upon this world, can thus be seen as one of the densest levels of embodied consciousness.

### The Living of LIFE and The Thought Process (Sex Principle)

In this chapter, the living of life in relation to the thought process--also known as the sex principle--will be highlighted. My comments are provided for clarification and are in blue, as in the previous sections.

The purpose of your whole life's experiences is to find and KNOW your Creator. The laws of Creation are inviolate laws which man can only know through a basic understanding of the Creator's ways and processes. The principle which underlies all Cosmic Law is LOVE--and this, perhaps, would be better understood if we used the three dynamic words "RHYTHMIC BALANCED INTERCHANGE" (Now, you knew you would hear about this again!).

The meaning of RHYTHMIC BALANCED INTERCHANGE is equal giving for equal regiving--and not equal receiving--because every pair of opposites in Nature is balanced equally, even unto life and death. What goes into the ground must equal that which comes out of the ground. BALANCE is the fulcrum of this lever of equal giving and regiving.

The ways and processes of the Creator are, in short, those that operate through thought, namely the dividing of the One Creation-Idea into multiple ideas in order to give them form in His imaginations. Man has inherited this power from his Creator.

Love means equality between all things. It means equal division of all interchange in industry instead of bargaining so one group gets the better of another. These principles are as important to the meaning of love in industry as the balance of love and sex is between man and woman.

There is an old expression which says: "Tis love which makes the world go round". No more appropriate expression could be devised to express the real meaning of "balance" in the interchange of all things--nor its lack thereof to express the total unbalance. It

is a well-known fact that geniuses and Illuminates understand this principle of love for they give all they have without expecting material reward.

The living of life on a lighted path therefore depends on the individual's mastery of every moment's thoughts, thoughts that create the reality of our lives, for human beings are made in the image of their Creator, the Thinker of Life. As long as everything proceeds according to the Natural Law of balanced rhythmic interchange--namely, equal giving for equal regiving--the love we so desperately desire will fill our beings. Otherwise, we create only imbalance, resulting in suffering, conflict and frustration, which happen to be the lot of present humanity. Thus, the living conditions depend entirely on the quality of thoughts emitted and nurtured throughout our life's journey.

We can truthfully state that the greatest crime that man has committed against civilization's strong growth is that of refusing to recognize woman's mentality as being equal to his own, and the only time you can get your world in balance is when man realizes that there must be EQUAL INTERCHANGE between man and woman--and all other created things, both mineral and vegetable, animate and inanimate. You can see the unbalance now swing in greater measure as woman overstretches to TAKE that balance--which only creates more unbalance.

Thus, man-woman, male-female, relationship lies at the core of all manifested things and is the unique key to resolving the problems of Earth humanity, and indeed of all creation-humanity within the whole of Creation. As the thought process is based on sex, thought is thus sexed, and sexuality refers to polarity. Furthermore, thought-sexuality-polarity are expressing the same and one thing, the same single mechanism at the foundation of Creation, of all creations. Whilst the physical (incarnate) male and female each present the two (2) opposing, divided poles of the Creator's manifested idea of creation-man, the male-female pair of this physical manifestation is also the embodied division of this very same idea of creation-man. Both man and woman are products of sexualization-polarization, tool used by the Creator in the process of creation.

Therefore, understanding the inner workings of this process within the individual being--which gives birth to and sustains life in perpetual balance, as the Creator-God does--remains the one road that will ultimately enable the mated man-woman pair to reproduce the perfect functioning in the flesh, aligned with that of Nature, the Universe. Consequently, the individual human being is led to begin at the beginning, that is to say with oneself, this work of realignment before any desire to mate.

## Nature of Light and Expression of Love

Now, let us connect what is commonly referred to as Love, in its Divine expression, with the concept of Light in its true Divine nature, since God is the One Reality. The following quote from Phoenix Journals N° 37, Science of the Cosmos, has the merit of explaining this better.

Quoting.

Is the nature of light to perpetually give of itself to every other light in all the universe, visible or invisible. This is why you "of the Light" are described in that manner--for you are as God--GIVING. The darkness (or "evil") "ONLY TAKES". That which is forever "taking" cannot merge with the universe which is made up of only Light. Therefore, you find that evil is, by necessity, a "thing" of only the physical expression for it is derived from the physical consciousness (ego) of the physical human species. That is why, further, evil is only present IN THE HUMAN SPECIES. It is also the nature of all light, visible or invisible, to REGIVE that light to every other light in all this universe. Light does not TAKE other light; nor does anything in NATURE TAKE. TAKING IS NOT KNOWN IN NATURE'S PROCESSES. All bodies in Nature are composed of light, whether they are incandescent like suns or cool like planets and all growing things upon them. Light given to these bodies continues their visibility by divided light-waves pulsing within them. While they are able to sustain their pulsing motion, it is said that they LIVE. When they are no longer able to continue their pulsing, it is said that they DIE.

Living is expressing that light which has been given. Dying is but regiving back to the ONE SOURCE that which has been given. All light comes from that one Source and is regiven to that one Source. That one Source is the CREATOR, the THINKER and KNOWER of the universe, the Father-Mother of the universe--omnipresent, omnipotent and omniscient. That is clearly descriptive of our Creator, for omnipresent means everywhere, omnipotent means the Father-Mother who has all-power, and omniscient means all-knowledge.

God, therefore, extends power to all things to create all things by that process which we call growth.

The totality of the meaning of knowledge is IDEA. God has but ONE IDEA and that Idea IS CREATION. God divides His Idea into many ideas and gives them form by the thinking process. Man is but one idea and man also divides his idea into many ideas and gives them form by man's thinking process. The Knower thinks LOVE and gives only love to all creatures of God's creations. Man's supreme desire is to love and to be loved, but in this present state of his knowledge he often creates fear and evil, and this fear and evil will destroy him until he realizes that love is all there is.

All created things have sufficient knowledge or instinct for their survival as idea. Animals can reason to some extent. Instinct fulfills the balance of their necessities. Vegetable life has its own way of protecting its body from being destroyed by its ability to grow. Although it has no means of protecting itself from destruction by defending itself as animals do with their claws and teeth, and as man does with his armaments, it knows how to become strong by resisting winds and refolding itself in winter weather to again unfold by the warmth of God's light. Mineral life has no such protection but to freeze itself in the light which created it and again melt through the heat of that very same light.

It will surprise the deepest thinker and knower among men to be told that God creates only two things, WATER AND FIRE. Just as two curvatures have been created as the only tools for creating the universe so, also, have only these two substances been created. Cold wetness and hot dryness constitute the bodies of all created substances we call "matter". Cold wetness surrounds our suns and prevents them from disappearing by the heat of their own fires even though millions of miles of cold space are needed to stop them from self-destruction.

End quoting.

As the perspective reader will no doubt have already realized, every particle, every atom, cell and so on, is a projection into life in the form of sexed pairs fathers and mothers which make life possible. The division of the one into a pair that is inversely conditioned creates a tension that triggers motion, motion being what we call vibration. There is life only when there is motion, and perpetual life only when there is perpetual motion; and when motion ceases, life ceases. And since perpetuity exists only in balanced/equal giving and regiving, and since the equality-balance in point only occurs at the level of sexuality, the basic principle of all life, humankind has a great need reviewing his perception of life and the things of life, placing sex at the centre, viewed from the perspective of what it truly is.

### **God's Law About Sexuality**

"YOU must OBEY THE WISDOM OF GOD FOR THE RESPONSIBLE AND BALANCED PROCREATION OF YOUR SPECIES".

Quoting :

The Commitment of Marriage by A MAN and A WOMAN To God is one of the necessary components to also becoming a PARENT for God, which means procreating the species.

"The DIVINE and SACRED act" called "sexual union" was created by GOD for the procreation of the species, that is, its perpetuation. THIS DIVINE UNION to be performed between ONE man and ONE woman specifically, God created it to maintain the balanced level of the species for each given planetary system. Now the "fallen" beings or the adversaries of GODNESS have completely perverted and defiled this once "sacred" and "divine" act which at one time, WAS DONE WITH COMPLETE LOVE and DEVOTION TO THE FATHER within each partner. In this way, sex is now called a "birthright" to be done often, with impunity and with many partners of either sex and without consideration of LOVE or responsible procreation. This ONE abuse of God's creation has nearly destroyed the species!

A quote from Phoenix Journals N° 2 entitled "AND THEY CALL HIS NAME IMMANUEL. I AM SANANDA:

"The act of marriage and procreation must have the highest degree of pure intent and preparation, for upon these bonds and restrictions will rest the preservation of mankind as a species upon the planet. If everything is done and adhered to, justice and peace will come to all mankind, and life in the human form can be preserved.

"If man continues his selfish and imprudent behavior, he will sound his own death tariff. There reaches a point beyond which a planet cannot support the unbalanced system perpetrated by mankind. And yet, so shall it come to pass that man will not listen and bring destruction upon his own species. It will come about in some two millennium that man will have reached the point of self-destruction. And so is it projected by the prophets and shall it come to pass in its time of fulfillment and in my time of fulfillment".

End quote.

Let's start with God's directive about marriage and Pro-creation between A MAN and A WOMAN. It is very clear THAT THIS DOES NOT SAY that marriage and "sexual intercourse" are OK between a man and a man, or a woman and a woman, or TWO men and ONE woman or THREE women and ONE man, or etc. The Laws of Balance are LOGICAL, meaning they were created specifically to maintain BALANCE within The Creation.

"The sexual act" was specifically designed to be performed by ONE man and ONE woman who had committed THEIR DIVINE LOVE AS ONE in the union of marriage, ordained by GOD. Through this union OF LOVE, the act of sexual intercourse between a husband and his wife for pro-creation was a most sacred and honored responsibility, an extension of their LOVE and COMMITMENT TO GOD in their service as PARENTS of His Children. .

In relation to the Law of Cause and Effect, the EFFECTS of breaking this one directive of GOD are all about our human society today. Overpopulation and spread of deadly venereal and blood-borne diseases, such as Syphilis and AIDS, has turned out to be OUR self-punishment to the point of creating the nearly complete destruction of our human species on Earth.

So let there is NO misunderstanding. The following BEHAVIORS are specifically and undeniably AGAINST OR CONTRARY TO THE LAWS OF GOD AND CREATION:

1. Any Homosexual sexual activity between two men or more is strictly prohibited.
2. Any Homosexual sexual activity between two or more women is strictly prohibited.
3. Any Bi-Sexual sexual activity between two or more men and women is strictly prohibited.

LET'S KEEP IN MIND THAT THIS SPECIFICALLY REFERS TO "SEXUAL" ACTIVITIES, NOT LOVE, INTIMACY, COHABITATION, AND FRIENDSHIP BETWEEN MEMBERS OF THE SAME SEX. MEANING THAT IT IS THE OBSCENE, LUSTFUL AND IRRESPONSIBLE "SEXUAL ACT" THAT IS SPECIFICALLY AND STRICTLY AGAINST GOD AND LIFE!

4. Any Anal (sodomy) sexual intercourse performed between any persons, male or female, is strictly forbidden.
5. Any sexual activities performed with ANIMALS (Bestiality) by any human being are strictly forbidden.
6. Any sexual activity performed by ones closely related within the same family line (incest). For example: are strictly forbidden brother and sister, father and daughter, uncle and niece, aunt and nephew, cousin and cousin, mother and son, father and granddaughter.
7. Any sexual activity performed by any adult (male or female) upon or with any child is strictly forbidden.
8. Prostitution -- the act of offering oneself, male or female, to another for sexual relations in exchange FOR PAYMENT -- is strictly forbidden.
9. Any Sadistic or Masochistic sexual practices performed by anyone or ones upon self or others are strictly forbidden. Sadistic: "1. A tendency to take delight in being cruel. Masochistic: 1. A condition in which sexual gratification depends largely on undergoing physical pain or humiliation. 2. A tendency to derive pleasure from one's own suffering".

10. Any voyeuristic (one who is sexually gratified by looking at sexual objects or acts) activity or any participation in pornographic (sexually explicit and obscene) materials, ie, movies, magazines, books, "artwork" and objects are strictly forbidden.

Let us understand that it is this PREOCCUPATION with behavior of lewd and lascivious physical pleasure that WE must each CHOOSE to avoid and rise above spiritually. Corruption and preoccupation with thoughts, words and sexual actions have become hypnotizingly OBSESSIVE and also terribly degrading to THE SPIRIT OF LIFE OF THE ONE! THIS IS NOT LOVE EVERYTHING BY ANY DEFINITION.

Can we not see this TRUTH before us and within us? Our sexual obsession MUST STOP if we have to go reach beyond our mortal body and into THE KINGDOM OF GOD!

Many of us, in these days, are probably wondering about the act of masturbation: "Stimulation of sexual organs by oneself". Masturbation is a sexual act of self-pleasure on SELF AND it is also what most couples do when they have "sex" together and call it "making love". The only difference is that it is about the "sharing" of MUTUAL Masturbation with the partner. Mutual Masturbation IS NOT THE DIVINE SEXUAL UNION FOR CELEBRATING PROCREATION. When one is an "adult" and does not wish to have children, the seeking of sexual pleasure by self or with others is a transgression on SELF simply BECAUSE WE ARE DENYING AND LIMITING OUR SPIRITUAL CREATIVE POTENTIAL WITHIN US.

Sexual desire, in this time of extreme sexual preoccupation on Earth, begins for many youngsters at puberty. Many will have sexual release or dreams while they sleep. With the CAREFUL and LOVING guidance of the parents well before and during this time, the child will not be frightened by the changes in his/her body and will most likely occasionally indulge in masturbation for either curious exploration or the relief of the physical body. Moderate or occasional masturbation done in intimacy, by the child or the adult, is not harmful to or AGAINST life UNTIL it becomes an obsessive preoccupation. Masturbation can also be a means of self-punishment and this is the most harmful to GOD'S SPIRIT WITHIN US.

Parents should be aware that this can also be very harmful to a child if through his/her "training" he/she is taught to fear or despise his/her genitals or be made to feel guilty about self-exploration or masturbation. He must learn more about his personal responsibility and must understand ALL THE LAWS OF GOD including those that govern procreation. But if the child is made to feel fearful, ashamed or guilty about his or her own sexual exploration, one may actually be creating for him/her OBSESSIVE PRE-OCCUPATION with sexuality. If the child is not constantly exposed to the "sexually stimulating" media, he will quickly lose interest after initial self-exploration

IF HIS CREATIVE potential is encouraged, nurtured and supported by HIS PARENTS and TEACHERS. Children and adults who are more spiritually aware will not be very interested or will gradually lose interest in sexual exploration of any kind. It is much healthier for the spirit if this process of becoming detached from sexual feelings is natural and BY choice because of true spiritual UNDERSTANDING and awareness.

What ones have labeled "SEXUAL ENERGY/LIBIDO" IS IN REALITY A CORRUPTION OF THE CREATIVE AND NURTURING POTENTIAL OF THE SPIRIT OF GOD WITHIN!

Definition of Libido in the dictionary: "1. Sexual desire or impulse. 2. The instinctual craving or drive behind all human activities". INSTINCTUAL CRAVING OR DRIVE BEHIND ALL HUMAN ACTIVITIES! The downside is that SEX is not the INSTINCTUAL craving or impulse that was created by GOD, THIS was our CREATIVE, nurturing drive TO KNOW and CELEBRATE GOD WITHIN US, TO CO-CREATE THE EVER-UNFOLDING EXPANSION AND THE ADVENTURE OF LIFE!

The truly loving DIVINE UNION, that of the male/female experiencing their creative potential through the sexual act for PROCREATION, was created to be a UNION OF DIVINE LOVING DEVOTION AND CELEBRATION OF THE GIFTS OF ONENESS SHARED... AND the NEW CREATED LIFE OF GOD. People rarely feel TRUE LOVE, caring friendship, affection and intimacy towards their mates on this planet. Most have simply forgotten about LOVE. You think perhaps you and your mates are one of the "rare" exceptions? Here is a test for you. How long would your marriage and commitment last if today you STOPPED completely sexual activity with one another? Do you truly give of yourself to your mate sexually and otherwise because you wish to please him? To please both of you?

MANKIND THINKS THAT HIS SEXUAL ORGASM IS ECSTASY. THIS PERCEPTION IS A LIMITATION ON THE VERY THING.

We are not our desires or our emotions. We are GOD'S SPIRIT of LIFE, and our Spirit IS the MASTER above our desires and emotions. In our illusion of ignorance and confusion, we have simply chosen TO MAKE our emotions and desires the MASTER above our SPIRIT ... OUR GODNESS!

THIS CORRUPTION OF OUR CREATIVE POTENTIAL HAS BEEN CREATED, CONDITIONED AND MOLDED BY THE ANTI-CHRIST. WE SIMPLY BOUGHT THE LIES AS TRUTH AND HAVE BECOME ADDICTED TO OUR DESIRE FOR "SEX".

The next time you have a "sexual" drive, look around, what have you been watching, reading, or participating in which created that desire? Men, when you see a physically "beautiful" woman, is your **FIRST thought admiration and appreciation of this GIFT of loveliness and do you wonder about the loveliness and beauty of HER SPIRIT?** OR, instead, do you first wonder about the pleasure you would receive if you could have a "sexual union" with her? And the same is true for women who call themselves "liberated" which, usually, first means "sexually" liberated and same "rights" as men to have many "casual" sexual encounters.

This does not mean that GOD expects us to STOP all sexual activity NOW. ONLY if it is OUR choice made with the JOY of TRULY understanding and thus having the freedom of detachment from this "ADDICTION" and no desire to procreate. For most of us, especially adults, "sexual behavior" has now become addictive, so we need to treat it as such.

LET'S RECOGNIZE simply without punishing ourselves with guilt and shame that it is a transgression against the Creative spirit of life within us. For a while let's accept that we'll have desire because we are "addicted" and many of us understand it as an "extension" of their love.

End quoting

This, then, is the state of play as lay out in the very words of the Creator Father-Mother in the excerpt quoted in full above, with all the obvious consequences that any sensed person cannot fail to recognize all around and within himself. This well-drawn conclusion and the recommendations made are certainly likely to awaken in everyone the innate sense of reason which, put into practice, will brighten horizons been clogged for too long. This will open up a path toward adjustment to Noble Natural Sexuality, leading to a Life Wisdom at last balanced and harmonious.

### **Sexual Drive (Libido) and Lust What Is This All About ?**

Let's recall, once again, the meanings of these terms as defined in standard dictionaries, so that the reader may better understand the unfolding of elements that follows. **Lust:** "1. Physical sexual desire. 2. Excessive sexual desire, particularly the relentless pursuit of immediate gratification. 3. An overwhelming desire: a thirst for power. 4. To have a passionate or immoderate desire. **Fornication:** A simple sin of the flesh; carnal relations between two people who are neither married nor bound by any vow. **Libido:** '1. Sexual desire or impulse. 2.

The instinctual craving or drive behind all human activities". 3. Energy underpinning life instincts and, in particular, sexual instincts.

*One thing I feel a strong need to clarify at this point, for the reader's attention, according to my belief, is that every thing created by God has a useful function and a specific purpose. Carnal pleasure is a sin only when confined to the flesh through ignorance, and ignorance is the mother of all sins, as we know. The Creator Father would not have endowed humankind with this capacity to experience pleasure in the flesh whilst forbidding the enjoying of it. Remember, Creator alone can create, and Satan does not possess this ability. All he knows is taking that which already exists and pervert it. Also, know that carnal pleasure is not satanic in itself; quite the opposite. It is when one acts whilst leaving out the Divine spirit within self, that is the creator of it all in the first place, that there it becomes anti-Christ, self-destructive.*

Now, let's consider the sexual drive, the libido, for what it truly IS. First of all, let's become aware of the presence of the life/sexual force, the Shika/Tsheka/Kundalini, coiled at the base of the spinal column of every Divinely created entity, and let's bear in mind that the function of this most marvelous force is to sustain life at the request of the individual being. The sexual drive is a call to rising of life for the benefit of the trine body--body-soul-spirit--of the incarnate being.

Now, let's shed further light on the situation through a few excerpts, with comments included, from the quoting highlighted in the previous chapter, relating to Law N° 15 of the Laws of Creation, taken from the Phoenix Journal N° 27, which states the following:

**YOU MUST OBEY THE WISDOM OF GOD FOR THE RESPONSIBLE AND BALANCED PROCREATION OF YOUR SPECIES.**

Quoting (my comments in blue) :

What you ones have labeled "sexual energy" or "libido" is actually a corruption of the creative and nurturing potential of The Spirit of GOD within YOU.

LET US REPEAT THIS: YOUR "SEXUAL ENERGY/LIBIDO" IS ACTUALLY A CORRUPTION OF THE CREATIVE AND NURTURING POTENTIAL OF THE SPIRIT OF GOD WITHIN YOU!

Let us see how your Dictionaries define Libido: "1. Sexual desire or impulse. 2. The instinctual craving or drive behind all human activities." Did you read that clearly, friends? INSTINCTUAL CRAVING OR DRIVE BEHIND ALL HUMAN ACTIVITIES! The catch is, precious ones, SEX is not the INSTINCTUAL craving or drive that was created by GOD, THIS was your CREATIVE, nurturing drive TO KNOW and

CELEBRATE GOD WITHIN YOU, TO CO-CREATE THE EVER-UNFOLDING EXPANSION AND ADVENTURE OF LIFE! The truly loving DIVINE UNION, that of male/female experiencing their creative potential through the sexual act for PROCREATION, was created to be a UNION OF DIVINE LOVING DEVOTION and CELEBRATION OF THE GIFTS OF ONENESS SHARED...AND OF NEW LIFE CREATED FROM GOD. Rarely do ones feel TRUE LOVE, caring friendship, affection and intimacy toward their mates on your plane. Most have simply forgotten what LOVE is. You think perhaps you and your mate are one of the "rare" exceptions? Here is a test for you. How long would your marriage and commitment last if today you completely STOPPED all sexual activity with one another? Think about this carefully. Do you truly give of yourself to your mate sexually and otherwise because you wish to please them? To please both of you?

In essence, Sex is not the libido, and therefore the libido is not, and cannot be, a sexual drive, given that sexuality is synonymous with creating thought. Since the term Drive is defined as a psychic force that propels a person toward a goal, speaking of libido as a sexual drive would imply that this phenomenon is oriented toward creation and sustenance of life. However, libido, taken as it stands, is a corruption, a perversion of the creative principle-process that is sex. For when one responds to what is termed "sexual desire or impulse", the approach--whether through individual or mutual masturbation--is similar to unconscious self-de-creation rather than conscious creation. To be more precise, this undermines life rather than serving it, bringing death rather than renewed and strengthened life. Libido would be better described as a **sexual repulsion**. Repulsion defined: 1. A force by virtue of which certain bodies repel one another; 2. A strong physical or psychological aversion to someone or something.

Sex, when properly understood and mastered, leads to true love and makes possible sustainability of life in its material thought-form in a constantly renewed balance.

HUMANS BELIEVE THAT THEIR SEXUAL ORGASM IS ECSTASY. THIS PERCEPTION IS A LIMITATION IMPOSED ON THE THING ITSELF. YOU ARE EVEN LIMITING ECSTASY ITSELF! Let us define the term. Ecstasy: 1. A privileged mystical state in which the soul unites directly with God. 2. (Literary) The state of someone who feels as though removed from the material world: A feeling of ecstasy.

As you can see, none of the definitions of the term Ecstasy corresponds to this more than fleeting state attained by human at this level of carnal pleasure within this sexual intercourse pattern in which humankind generally finds itself trapped. Neither the mystical state in which the soul is supposed to unite with its Creator, nor the state in which a person finds himself as removed from the sensed

world. This because, literally, withdrawing from the sensed world actually means nothing other than being in a state of fusion-communion with the Creator-God, the Thought Adjuster (the Divine spark) within oneself.

You see, you are not your desires, you are not your emotions. YOU are THE SPIRIT of LIFE of GOD, and your spirit IS the MASTER over your desires and emotions. Don't you see that you have simply chosen, in your illusion of ignorance and confusion, TO MAKE your emotions and desires the MASTER over your SPIRIT...YOUR GODNESS!?

The Creator Source is creator of all life; God Spirit is the Master-Thinker of the Universal Reality within which all things exist. As the human spirit originates from the Source, THE ONE, it is of the same nature and is in fact doing exactly that, even though in most cases mankind does so without realizing it. We are the creators of our desires and emotions, for the mind alone can create. And the Divinely created human being is endowed with this power, since it must also be made clear that amongst the societies of global human civilization there exist human simulacra, inhuman mindless beings, devoid of the Divine Presence. The logical conclusion is that everything that occurs in our lives is merely the result of our thoughts, and that if our creations have become the Master over our minds, it is simply because we have surrendered our powers into the hands of our enemy, the inner and outer anti-Christ. All creative power is also de-creative, meaning that at any moment, any awakening mind that chooses to take back the reins of its powers can do so easily and, in the process, de-create--in other words, deconstruct--all undesirable circumstances in its life to create new ones far more in tune with the Laws of Creation.

This corruption of your creative potential WAS CREATED, CONDITIONED AND MOLDED BY THE ANTI-CHRIST. YOU SIMPLY BOUGHT THE LIE AS TRUTH AND HAVE BECOME ADDICTED TO YOUR DESIRE FOR "SEX". You don't believe your "sexual" desire is created? Look around you today. Your Advertising Media as well as your Magazines, Television and Movies ARE CREATING YOUR DESIRES FOR YOU by conditioning and molding you through false "IMAGES" of what is beauty, what is "sex appeal"--in other words, by directing your attention constantly to "how" you look physically, your athletic prowess, your sex appeal and attractiveness.

Why does and has this "desire"-creating worked? Because the Anti-Christ first molds the "false images" and then plays upon your FEAR of being too unattractive, unworthy, unpopular and simply rejected BY OTHERS who YOU allow TO JUDGE YOU AS A HUMAN BEING! The ANTI-Christ keeps you BOUND by the "false" promises created by your desire TO BE WORTHY of LIFE so you are too busy trying to fit the "false" mold and therefore do not develop your creative spiritual potential

within! How dare YOU feel UNWORTHY because of believing the nonsense of false "IMAGES"! PLEASE REMEMBER THIS TRUTH! YOU ARE GOD'S TEMPLE!

It is an undeniable truth nowadays that the media and the movie industry have been established and hijacked for precisely this purpose, shaping public opinion and manipulate people's perception-feeling-thought into deviant behavioral patterns with regard to sex. However, we must recognize that these patterns in point predate the conspiracy that organized itself into making things definitively more depraved and self-destructive. Bear in mind that this is a world of rebellion, essentially filled with hardened galactic rebels whose evil, anti-Christ practices date back to their beginnings upon their home worlds within our Galaxy.

Virtually all of what serves as our leadership in the world today is woven into and by these tangled webs. Logically, the course never has been the right one as far as our customs and traditions are concerned; it only has come to worsen due to a leading group having gained the upper hand over the whole of humanity. Do bear always in mind that none of this would have been possible without the cooperation of men wallowing in the mire of apathy, intellectual and spiritual laziness, and the pursuit of a false sense of ease.

Advertisers are always selling "their image" of what you ones call "romance" and you are encouraged to think it means passionate "sexual" fulfillment. Your dictionary describes romance as: "1. A love affair. 2. A kind of love between the sexes, characterized by high ideals of devotion, and strong ardor. 3. Adventurous, heroic, or exotic nature: romance of far away places." When you crave romance, whether you know it or not, it does not mean "sexual" affair, dear ones, it means LOVE AFFAIR, you are craving to experience within you GOD'S LOVE OF LIFE, you crave to feel "ALIVE", ie., warm and intense feelings, eagerness and zeal. WHY? Because you are bored and spiritually unfulfilled with the self-created "limits" of your life. (Limits which the "controlled" media has set you up for in the first place.) You are out of balance and you are seeking to ignite your CREATIVE POTENTIAL WITHIN. ROMANCE is the promise of ADVENTURE and JOY for experiencing THE SPIRIT OF LIFE, OF GOD, within you. You see, ROMANCE is not sexual adventure or a place to go; it is your desire to feel and KNOW GOD within you. You can experience romance through the sharing of devoted and adventurous LOVE of LIFE with your mate. Regardless of what your media "hype" tells you, remember this, your desire for romance is your desire for CHANGE from a limited and spiritually unfulfilling existence, to recognizing and EXPERIENCING your UNLIMITED Creative Spiritual Potential within.

The next time you have a "sexual" urge, look around you, what have you been watching, reading or participating in which created this desire? Men, when you see a

physically "beautiful" woman, is your FIRST thought admiration and appreciation of this GIFT of loveliness and do you wonder about the loveliness and beauty of HER SPIRIT? OR, instead, do you first wonder about the pleasure you would receive if you could have "sexual union" with her? And the same holds true for you women who call yourselves "liberated" which usually first means, "sexually" liberated and same equal "rights" as men to have many "casual" sexual encounters.

All these behaviors are the result of the damage wrought upon the human mind, which is entangled in a form of materialism that is shrouded in darkness, and which is encouraged and promoted by the various branches of our global educational system. As these same attitudes are evident throughout nations across the globe, this explains why people can speak of God at every turn whilst effectively excluding Him from every thought, word and deed of their daily lives. The perception of sex lies at the heart of the entire civilizational issue, which is a total failure. And when we know that Sex Principle lies at the foundation of Creation, a misperception of this principle reveals, in reality and beyond any shadow of a doubt, the misperception that humans have of the ways and processes of Creator/Creation, and thus, of the true nature of His Creator-God Himself.

Recognize that this "sexual urge" is really your UNFULFILLED creative potential screaming to be released from the self-imposed "limit" or boundary of THE physical sexual ACT. Act: "1. To play the part of; impersonate. 2. To serve temporarily or as a substitute. To PRETEND." The sexual act is limiting, substituting and impersonating YOUR CREATIVE AND SPIRITUAL UNFOLDMENT TO KNOW GOD. When you truly understand and recognize this truth, your creative spiritual unfoldment can no longer BE FRUSTRATED AND LIMITED to the repetition of a silly and truly spiritually unfulfilling "sexual act".

We now come to the key points summary of the entire unfolding that has just been laid out. The sexual impulse, the true one, is a call to life rising for the benefit of the trine body, body-soul-spirit, of the incarnate entity. It is a cry, a call or reminder from one's spiritual creative potential, urging him to free self from self-imposed patterns of enslavement. Up to this point, it's all happening naturally, except that the corrupt human mind no longer knows how to correctly interpret the stimuli of this life command. As a result, sexual debauchery takes over, pulling the being downward-outward into an energetic mess rather than upward-inward toward a qualitative energetic nurturing of life. The more intense and frequent the urge, the more debauchery there is, in a devitalizing pattern. Here, one falls into **Lust** : Excessive physical sexual appetite, a particular quest for immediate or relentless satisfaction, an all-consuming desire, which happens to be the true nature of what man perceive and practice as sexuality.

Furthermore, it must be made clear here that regardless of the rhythm or frequency involved in this exclusively carnal, unnatural act in which the individual (human) consciousness finds itself enchained, it remains within the realm of lust-lewdness-lasciviousness, underpinned by spiritual frustration. Note that even those who take refuge in so-called abstinence are merely the result of this spiritual frustration, seeds of inner and surrounding darkness, since this supposed sexual abstinence is only apparent and often manifests as more or less regular masturbation out of sight. And it cannot be otherwise, for the call of the life force will never cease, unless it be completely silenced by some means or other.

Now, given that the purpose of life is to rise up in a joyful and endless unfolding in co-creation with The Creator within Creation, this joyful and powerful call of life for life is a perpetual process by nature, and the response given is meant to be part of the same perpetuity in an equal giving-regiving. At this stage, the phenomenon of lust, as currently defined in negative terms--and rightly so--can and should be viewed from another, more positive, adjusting/rectifying perspective in reality, insofar as the perception-feeling-thought of the individual involved is reshaped to align with the natural Cosmic order of LIFE functioning.

**Lust**, that excessive bodily sexual appetite in a quest for immediate or relentless satisfaction, is then transmuted into a trine bodily sexual appetite, namely one involving mind-soul-body, which at that moment cannot be described as excessive in a pejorative sense, given that excessiveness itself becomes, at this level, a lesser measure than what permanence with the eternal Creation--of which we are an integral part--must be. This quest for immortality within a high-frequency material body (Cosmic Christ Consciousness), as far as is possible, is why life experience was created in the first place. If humankind can find an answer to the issue of the appropriate approach to sexuality in the material realm, he will have found the way out of the vibrational underworld of morbid, deleterious practices that keep him trapped in the vicious circle of the downward spiral of involution and denial of life.

### **Prerequisites of Marriage For Harmony In The Relationship**

Once one has fully grasped all the insights laid out in the previous chapters, the state of play of the civilization becomes crystal clear, and the new resurrectional path to be taken emerges before him. The next question to be raised would be the following :

At what point are a man and a woman supposed to be ready to found a family in harmony with life based on love, and capable of procreating the human species in accordance with the wisdom of God and Creation commandments, for the delight of Mother-Earth's civilization ? For, once again, survival of mankind depends on this adjustment.

We highlight an excerpt from the quoting from Esu (Jesus) Sananda referenced in this paper.

Quoting :

Because of the various degrees of deliberate, systematic and malevolently lewd and lascivious sexual behaviors, which are the corruption of this DIVINE UNION, and which have been and are practiced by most on your plane, the WARNING given above by our beloved Jesus Immanuel is transpiring before your very eyes in this time frame!

The sexual "act" was specifically designed to be performed by ONE man and ONE woman who had committed THEIR DIVINE LOVE AS ONE in the union of marriage, ordained by GOD. Through this union OF LOVE, the act of sexual intercourse between a husband and his wife for pro-creation was a most sacred and honored responsibility, an extension of their LOVE and COMMITMENT TO GOD in his service as PARENTS of HIS Children.

Now remember the law of "Cause and Effect". The EFFECTS of breaking this one directive of GOD are all about you today. Over-Population and the spread of fatal venereal and blood-borne diseases, such as Syphilis and AIDS, are proving to be YOUR self-punishment to the point of creating the nearly complete destruction of your human species on Earth.

End quoting.

We now have to draw the obvious lessons that mankind on Earth should learn regarding this particularly sensitive area. Relying upon man's misperception of sexuality and all habits that have stemmed from it, human societies have taken a course that carries within the seeds of the destruction of their own civilization and repeatedly so. If present humanity fails, it will not be the first time, nor will it be surprising, in the event that our ways do not change. The warning has been clear and the alarm bell has been, once again, sounded over two thousand (2000) years ago by the one mentioned above. The overpopulation of our mother planet, the reality of which many deny and will continue to deny, and most of the evils that beset earth peoples are direct repercussions from this course of events.

To get back on track, need be to make it clear and comprehensible to every single player of our civilization the necessity of a swift and radical return to the rules of wisdom laid down by The Creator, Ruler of the Human Races :

**YOU MUST OBEY THE WISDOM OF GOD FOR THE RESPONSIBLE AND BALANCED PROCREATION OF YOUR SPECIES.**

And to that end, need be to set up material and spiritual prerequisites for peoples re-education across the Earth. Re-education in the knowledge of Universal Truth and the embodiment of Natural/Cosmic Laws, which alone are capable of restoring order, balance and harmony amongst and between the races of Man. It's when, and only when, these conditions are met by individual members of a nation or civilization that can one be assured that marital couples eventually formed and deemed fit to procreate for the preservation of the human species will ensure the success of the endeavor.

Under these conditions, each member of the mated couple has already completed his essential transformation, possessing a profound understanding of the sex principle and the appropriate ascending approach within physicality. This realization not only establishes a mated pair in true, lasting love, but the home becomes stable, viable and reliable for raising of offspring. Offspring raised in such a model, balanced environment will ensure a bright and promising future for community, nation, race and humanity as a whole. This is the route, the only route, that will save this world, our world.

### **About Sex and Racial Commingling**

Sex, it's worth the reminder, lies at the very foundation of life in all its forms. It is the Sex Principle that founds the Universal Living Being in its myriad visible and invisible dimensions. The self-destructive perversion of sexuality as glorified upon this world is a severe mongrelization (corruption) of its true Divine nature. Even within its various races, considered separately and in relative purity, humankind faces a terrible genetic burden due to the prevailing confusion in this crucial area. When faced with a problem already difficult to manage, wisdom would suggest not adding to it, thereby further complicating the whole situation.

Let's bring to light another wonderful excerpt from the Phoenix Journals, to set the stage more effectively.

Quoting :

When you mix races, creeds and colors of humans you are playing with two separate situations--you are basically confusing -- culture and -- traditions which can cause great pain to one or another of the pair and/or offspring and what you do not realize is that those differences come from outside your planet for when the races were introduced onto the planet they were from different origins and cosmic placements of great variations in experiences but all HUMAN.

Therefore, all are identical in the sight of God for there is only one color in God's vision of creation--light. You perceive light to be white for it has no color at all but is made up of all colors. The darker race chooses to call itself -- black -- no, that is grossly incorrect for the -- black is not -- black which means the total absence of color. The so-called blacks are the most beautiful hues of bronzes and tans of your planet, followed by your brown race of golden browns and earth hues of superb spectrum-- then the golden race stemming from the so-called Orientals and the wondrous projection of the red-bronze hue of the native cultures -- of all, the white is the most colorless and quite frankly, the most -- adulterated and wimpish of all races, having no superiority in most instances and therefore utilizing self-proclaimed POWER BY CIRCUMSTANCE!

If persons wish to cross color/creed barriers then so be it. The problem grows greater for you as ones come forth to retrieve species to return to home base -- all galactic placements are not as wondrously giving and accepting as is Pleiades and even there, there will be planets wherein cross-over is unacceptable. Not from mean perception but for preservation of a species.

End quoting.

In this world, it is undeniable that hu-men have the unfortunate habit of perceiving things that are often highly detrimental to people's living conditions as cultural and biological beauty and riches to be preserved and, even more so, nurtured. Verily, racial adulteration and its result, cultural and traditional confusion, precisely lie at the heart of the civilizational issue.

First of all, let us clarify a number of points that escape the understanding of man in general, and so-called man of science in particular.

*First point.* Note that no race begets another or others, racial colors being a birthright bestowed upon the evolutionary races of ascending beings<sup>2</sup> of the material worlds. None of the theories elaborated on this subject by men, whether scientists or not, of our still primitive wild civilization holds water and never will, whatever arguments are put forward.

---

<sup>2</sup> In The Urantia Book, the term "ascending creatures" refers to mortal beings, such as the humans of Earth (Urantia), who embark on a long evolutionary journey through the universe to attain divine perfection.

*Second point.* Racial attributes are characteristics of the collective personality of a given race. They are to be regarded in the same way as the inherent personality traits of any given individual. Personalities do not mix; they are destined to evolve within the evolutionary dynamics of life, namely through the social and environmental interactions of multiple incarnations, whilst remaining individual to the very end.

*Third point.* Racial commingling is a form of adulteration; in other words, it is a corruption induced into the races in the same way that adultery/infidelity injects foreign impurity into the already compromised genetic makeup shared by a family. The term 'adulteration' stems from the fact that intent behind the act is impure and thus generates and imprints this impurity in the genes of the adulterous person, who then transmits it to the partner victim of the act.

*As the Laws of Creation are immutable, what applies to the immaterial applies to the material. Wherever this immutability is not observed, hu-men must understand that they are on the wrong path. Races are not meant to be crossbred, and certainly not at such a childish and precarious level of consciousness as that at which human beings of this civilization tend to do.*

The living of life--all experiences undergone by individual, group, community, nation, race, humanity, etc.--is recorded in the individual and collective Akasha (memory) and, whilst the entity is incarnate, in the DNA/RNA, the RNA being the gateway through which information is entered into the DNA. And it is this that, over time, molds individual character and determines even the physical appearance of all things. Our strengths and weaknesses are merely the manifestation of our clouded and lighted areas, resulting from the height and extent of our individual/collective consciousness.

Now, physical sexual union is supposed to simulate the Divine Union for the procreation of a vehicle for the use of one of God's children--creations. However, the truly Divine Union is above all sexual--immaterial and takes place within one, and it is this inner process, triggered by intent, that allows the being to be reborn, to give birth to self anew, in ever--improving versions of self. That said, when two persons of different races have sexual relations that result in a child conception, they pass on their genetic heritage to the unborn child. The DNA, given the current state of the mental, emotional and behavioral patterns of the races--essentially comprising subconscious and conscious clouded areas, in this case unresolved racial conflicts and neuroses--these parents, in so doing, have quite simply set about transferring their combined, heavy burdens onto a more fragile terrain of consciousness--represented by the offspring come into being. To put it plainly, what the parents, and the community, failed to take on, has simply been passed on to the next generation in a form more complex and daunting than ever.

In short, as you will have understood, this is indeed a case of abdication coupled with total irresponsibility. Well, this is simply and purely what human embodies in this world turned completely upside down.

When you observe the torn psyche, plagued by cultural and traditional identity crises, of mixed blood, you grasp the level of additional challenges they face. It is plain to see, it is well known, yet doesn't seem to make a difference, the march continues, consciences utterly numbed. May those who are and have been involved in this endeavor not misunderstand the point being made here. Every issue must go through its crucial phase of recognition before any resolution is possible. We are here simply making a diagnosis to give a chance for a swift healing of the individual in his wholeness.

This issue of detrimental genetic crossbreeding applies not only to interracial unions but also to intra-racial matings. The problem lies in the DNA grade running on negative and conflicting value systems rather than positive and dynamic ones. Human being, as part of evolutionary dynamics, should seek and engage in the unfoldment of the best version of himself, which suggests that the individual must not only be on an inner journey of self-transcendancy and enlightenment, but also in the search for a matching within physical sexual duality. More plainly put, this means that any smart, enlightened individual must always seek a partnership of at least equal grading to his own, and this, wisely, should preferably take place within his own race.

In the event that no partnership of this grading can be found in the immediate context, the best course of action--and this only if it be essential to do so--is to ensure one chooses the very best available. For procreation is a choice, not an obligation arising from a perceived social ego-driven duty to avoid being looked down upon, or just to fit in. Only in this way will the social individual, the current human prototype, evolve on an upward spiral toward a wellness of high Cosmic fullness. And, ultimately, that is the purpose of life.

In conclusion, we avoid racial genetic crossbreeding for the sake of appearances and social standing, and we seek excellency in grading based on solid positive, dynamic and evolving values, on an individual journey that nurtures our inner creative potential so that, eventually, we may unite at the right moment with a partner of similar stature.

## The Road Toward Noble Sexuality

Given the clear and extensive evidence that has just been presented through the very words of our High Source, Father-Mother, with my own supporting comments, no one can deny the obvious fact that, under our current societal paradigms, the use people makes of sex has reduced it to a form of individual and/or mutual masturbation for the sole purpose of carnal self-gratification and the relief, if need be, of the body from said sexual pressure or drive. One of the many seeds being, in most cases, undesired offspring, or one whose desire is feigned for the worst possible reasons. The resulting consequences speak for themselves.

Now, considering the primary function of this Life Force, which is to afford mankind with the ability to joyfully and perpetually rise up in co-creating of the ever-unfolding expansion of Life with its Creator, it is certain that how mankind perceives it amounts to a true waste, bringing only frustration, emotional and physical suffering, illness, premature aging, and death. And all of this just for a small, fleeting, physical self-satisfaction that he is driven to be seeking desperately again and again and again, pushing the envelope too far each time, hastening the degradation of life.

Given that all this "libido," or perverted sexual desire, exerts a real control over humankind in its current state of consciousness, due to misteaching, deceiving, and pushing down this path of **lovelessness** by fallen beings from Luciferian factions trapped among the nations in our physical Earthly dimension, this new awareness, brought about herein, humbly aims at providing the individual, and the collective, with an opportunity to seize that he may regain control of the situation once and for all. Doing so will certainly allow mankind's civilization, in a radical way, to overthrow the occult forces of Evil, which have relentlessly deprived him of its life energy, abusively drained for their ego's benefit for far too long. This largely with our subconscious collaboration, of course, because otherwise it would not have occurred.

The control here in point involves relearning how to harness this libido, this drive finally becoming truly sexual, to one's advantage in alignment with its high creative potential, as originally intended. To achieve this, one has no choice but to exercise it through meditative practices of high intent, aiming at regaining control over our life functions. This regained mastery will restore to mankind the power to command, at will, the individual life force, during these tantric exercises, to rise along the spine with the specific purpose of nourishing and revitalizing his entire energetic life vehicle, the body and the soul that surround one. The effectiveness of these commands informs the individual of his regained control as a Divine spirit, master of his own reality--a control that man has lost for far too long.

In this progression, the individual involved will soon come to understand that it is of his responsibility to actively **seek out and voluntarily awaken this force at the base**

of his spine, making a controlled and high use of it, instead of waiting for the pressure of an uncontrolled desire to compel him to do so. The law of free will is very clear on this point. God never forces; you only get what you ask for. This force is already within each individual, and it is only through pure intent that one receives its purest, most vitalizing gift. With disciplined and consistent practice, the Kundalini will become permanently activated, finally allowing its High Divine Function to settle in once and for all in its primary role.

Once this step completed, anyone being involved will ultimately grasp the truth of the statement made in the aforementioned Commandment of God, which asserts that Sexual Union between a man and a woman is sacred and for the responsible and balanced procreation of the species in the midst of which they are evolving. To illustrate the point, imagine the situation and consider whether it's possible to achieve these noble and powerful life goals other than through self-exploration, in complete self-sufficiency of celibacy, of one's full sexual expression with all the control and discipline of intent that it requires. The rushed, immature model of mated couple in which humankind is utterly mired has caused enough social harm to prove its limitations. This occurrence reasonably being impossible within a couple until after each potential partner has been able to rise to an appropriate level of alignment with this consciousness.

Another point of caution to emphasize is the following. Very often, in their search for answers to queries on this sensitive matter, people come across numerous written and especially visual materials that project various perceptions and recommendations such as : "take control of thy body, thy sexuality"; "everyone is different and you can experience great pleasure and attain a powerful orgasm by exploring all the sensations doing it anywhere and anyhow as long as you can manage to get it," namely anal, vaginal, cunnilingus, clitoral orgasms, etc. Well, after examining the issue in the instructive details provided in these pages, one cannot help but note the blatant ignorance underlying these projections from anti-Divine principles, given that no noble intent other than the gratification of carnal/physical pleasure motivates the act.

Furthermore, the practice of anal sex is clearly unnatural and can only lead to imbalance and, therefore, deterioration. The same applies to cunnilingus (oral masturbation for both men and women). From these one contracts diseases because these so-called intimate parts are not designed for this kind of practice. The viruses and other pathogens that one ingests or introduces into these parts end up complicating matters, furthering a situation already prone to various infections. And to top it all off, you have an abundance of rationales and advice circulating online mainly, that completely disregard and certainly ignore the prime element in any approach to all facets of Life: INTENT.

Humankind always functions on intent, except that to this state he has been reduced, all sense of quality control has been lost. In reality, long since have our intents ceased to be our own. Mankind has ceased thinking and dreaming on this Earth, wallowing as he does in spiritual and, hence, intellectual laziness. Therefore, intent is key. But this intent can only be expressed in alignment with the Laws of Nature and Life through prior knowledge of the truth about the Ways and Processes of Creator God, if indeed humankind be in the pursuit of Divine excellency.

*AND THE INTENT UTTERED IN THE ONSET OF ALL THINGS MUST BE HIGH ENOUGH SO AS TO RISE ONE TO THE DESIRED LEVEL OF CONSCIOUSNESS. THE HIGHER THE INTENT, THE HIGHER THE ATTAINMENT.*

In essence, if sexual relations within a mated couple amount to nothing more than mutual masturbation, which is indeed so, then isn't it better doing it alone for self-gratification as needed and at a frequency free from any external pressure? This option, at least, spares the individual all the degradation that often results from having a partner. Now, when full understanding and high intent are present, masturbation, so often criticized, can be transformed into a powerful tool for mastering our life (bodily) functions in intentional communion with the Divine within. This enables people to avoid so many things that are obvious to everyone, including unwanted pregnancies, and leads them to a conscious and responsible control of procreation advocated by God's Law.

Let us keep this, once again, firmly in mind:

**The Highest Universal Truth is that Sex and Life are synonymous. The sex principle is the Creative Principle of all life, and its real function is to provide the incarnate being with the ability, during his earthly sojourn, to maintain eternal health, extending his body lifespan as much as he wishes, sustaining permanent joy, rejuvenating his body, etc., and all this in and through Wisdom and Intent via a connection that links him more and more powerfully to the Source-God within and all around him.**

To delve in deeper, in the same vein, one might find that those categorized as homosexual (male/female), bisexual, and transsexual--so often vilified yet promoted by media and politics, and becoming increasingly pervasive within our gloomy societies--will find, in understanding this path, a secure healing-way out from all these individual and collective psychological battles against so-called heterosexual society, which, incidentally, is part of the problem. Furthermore, it is worth noting the involvement of subconscious forces, on the one hand, and hidden forces, on the other, over which we have no control, due to our legendary ignorance. Truth alone sets free.

Let's take transsexuals for instance. Why would anyone want to change sex in the first place if not based on an inner feeling related to society's general perception of the opposite sex and the very function of sex itself? Since the problem lies at the subconscious level, this physical mutilation of the anatomy turns out to be a self-inflicted suffering and a serious sin against one's Divine Self. In other words, we presume to know better than God or do better than Nature, which is utterly a nonsense.

The same ignorance is evident in the X classification that some people claim, meaning they consider selves to belong to the neutral class, outside of any sex classification. The spirit-mind is certainly asexual, but a physical being is necessarily sexed. Either female or male, generally speaking on this planet Terra. One might speak of hermaphroditism in rare cases here below, but sex is certainly present. Every creature of time and space is sexed, including animal, vegetable, and mineral kingdoms.

Ultimately, those for whom this category was created are transsexuals who, having made this choice, find themselves rightly in this situation. They end up being neither one nor the other, hence the so-called neutrality. Yet they were women but wanted to become men, or inversely. The problem of not accepting one's sex is never resolved by consensual criminal surgery; on the contrary, the pain or unease digs deeper and ends up consuming the entire being for the benefit of the anti-God. And we must certainly not ignore the reality of the presence, in large numbers among human races, of soulless, human-like beings bearing the hallmark of Satan's horde. It is essentially these individuals who are highlighted in these media-driven behavioral patterns to degrade and lead astray the masses of humankind lost in the labyrinth of darkness of global consciousness.

Therefore, all this nonsense should be thrown into the trash of Satanic schemes intended for a wise and ultimate de-creation.

Once again, from the moment one realizes that sexual intercourse within our human relationships of all kinds is merely mutual masturbation and accept the truth about what sex is not, these kinds of unnatural practices will quickly become a thing of the past. These thoughts will cease crossing our minds.

Therefore, let's recall that noble INTENT alone, in connection with the Creator Father within, activates this higher function, enabling the ascension of the entity into its fullness of being. The orgasm frequencies thus attained continue to increase in qualitative terms as the practice becomes regular and is triggered by will. The benefits, among others, for male sex mankind is the development, in the process, of the ability to achieve orgasm at will, while mentally and easily controlling one's seminal ejaculation. These orgasms consist of high-frequency vibrations which, when sustained, will help improve highly the body form performance.

*At this point, a reminder is of need. Man is by nature an inseminator and is not meant to ejaculate with every orgasm, as is the case in his current state of consciousness. If seminal ejaculation does not occur within the intentional context of insemination, one can simply and easily deduce that there has been misuse, a misdeal. As for a woman, she is a semen recipient, and within her this occurs differently yet naturally following the same pattern. But orgasm is part of the entire equation, and this is where intent allows for the rising in fulfillment. Thus, you have yet another argument to underscore the fact that the libidinous sexual act is a corruption of the Divine nature of its creation.*

In fact, this is only meant to occur when there is an intent to procreate. By doing so, the full benefit of the vibrational frequency attained remains internal, spreading throughout the entire system to restore overall bodily harmony. The same thing occurs in women who, in addition, will gradually learn to stop menstruation and control their ovulation, along with many other developments that will manifest over time for everyone intentionally involved in this ascension path.

### **Ascension Into a Regenerative Biology**

With all the light been shed on the crucial issue of sexuality through the keys insights above laid out, the seeker has reached the required level to grasp what ascension is in a regenerative biology and how to get there by working solely with the Omniscient, Omnipotent and Omnipresent Divine Spirit within.

The topic addressed in this chapter is directly related, and all else by the way, to the sex principle, which founds thought process. Humankind is sole creator of his living reality, and only thought process mastering allows one to be in control of his life circumstances.

The entire purpose of the insights provided in this paper is not only to achieve a healthy readjustment of our perception-feeling-thought regarding sexuality, but also, ultimately, the practice of a lifestyle that leads to tangible results impacting the quality of living in its various facets, including the physical body form that humankind is given to see with his physical eyes.

Regenerative biology refers to a human body that has developed the ability to self-regenerate. The organism operates in a pre-programmed mode to repair or replace damaged cells, tissues, and organs. Therefore, ascension into regenerative biology is simply the result of intentionally aligning one's thoughts with the Divine Father-Mother within the individual being. As you think, so you believe, and so will it be done onto you. Our thoughts transform into beliefs which, if nurtured for a long time, become manifest as our realities. This is how humankind

weaves its life fabric.<sup>3</sup> It is at this level of attainment that, with the mastering of his thoughts, mankind comes to a control of all bodily functions. It follows that he can, among other things, halt the aging process, reverse it and rejuvenate, maintain a balance that puts an end to all disease, and so on.

Nevertheless, in this journey contextual to our Mother Earth, some, through ignorance, work on medical appliances or products, believing and leading others to believe that using them will allow the body to evolve from the outside in. But the entire purpose of ascension, of raising the vibration of the trine body--mind-soul-body--is to learn to create what one requires from within, with the mind, and solely with the mind. Along the way, one may, depending on circumstances, once in a while require medicinal ingredients or plants to help self during the process. However, the body is meant to learn to create, under the guidance of one's mind, everything it needs, and this is what a Regenerative and self-sustaining Biology is all about.

**In essence, if one is a god/goddess in a physical form, then one has the power to modify the form as needed, and this requires nothing outside of oneself to achieve it, that is, outside the Divine Spirit within.**

With this process intentionally initiated, the DNA begins to be fully activated to restore the physical form to its original blueprint of Divine Perfection. The two-stranded DNA, which is the common heritage of the vast majority of humanity, will expand to at least twelve strands and, with the assistance of the Divine Hierarchy, will continue to progress according to the quantity and quality of work involved and the individual's commitment--that is, surrendering his will as much as he wishes into the hands of the Creator-God. For ascension is rising in consciousness to the highest point of life's unfolding, where the will of humankind and that of the Creator merge, become one.

Humans with two active strands of DNA, which the majority incarnates, are accustomed to a very rigid or fragile skeleton and a generally low-vibrational body. However, the crystalline body form that is thus attained in this process is in a vibrational frequency much more aligned with the blueprint of the Divine Presence and responds much more readily to it. The skeleton and all organs of the body thus receive significantly more Life Force.

---

<sup>3</sup> The life fabric refers to the guiding thread, the underlying structure, or the set of significant events that make up a person's life journey. It represents the course of life, often perceived as the backdrop against which the experiences, emotions, and decisions that form our personal history unfold.

A self-regenerating crystalline biology will depend essentially on photonic energy, on Life Prana, in other words, on the high-vibrational Life Force. **It is there that planet Earth and all species are headed for in the future.**

Nowadays, humans are extremely concerned with viruses and other pathogens such as Marburg, Lassa fever, Malaria, Covid, AIDS, EBOLA etc. These and many other immune dysfunctions are largely the result of the crime disguised as medical prevention in the vaccination process, and other means used by the anti-God rebellion, which has developed a new series of viruses aimed at assaulting the immune system. But as the crystalline blueprint is anchored, the immune system functioning is altered in such a way that AIDS and many other autoimmune viruses cease to be able to destroy the cells. The immune system is then able to perform its job, which is to consume and transmute all types of viruses that cause autoimmune diseases.

The immune system of a crystalline form is efficient enough to make illness, even the common flu or cold, an experience of the past. Therefore, ascending humans can use symptoms such as those of flu or cold to understand that they are still overly polluted and that there is a need to delve deeper into mental detoxification practices to transcend the condition. On the other hand, the absence of these symptoms is a sign of the strengthening of our system in general. What is certain is that there will be ups and downs throughout the process until a gradual stabilization of one's state of balance or general well-being is achieved. The energetic field of a person is thus more or less "beaten up." Such experiences are karmic, and as karma is transcended, the patterning will pass. Flush out the karma and recover the performance, and you can rebuild the system to pull self out of this kind of decline. Illness, if it manifests, is a sign of surfacing of some level of imbalance in one's ascension. Correct the imbalance and the karmic cause behind it, and the disease can be suppressed.

This is the process that leads the individual to the goal everyone dreams of, perpetual health, in other words, perpetual all-encompassing bodily harmony.

Furthermore, a reality most people are unaware of is that humanity is faced with a machinery that pumps the energy grid, specifically, auric energy,<sup>4</sup> out of the physical form into devices used by the Anunnaki<sup>5</sup> for far too long to vampirize the Chi, the Life Force of Humankind. Simply put, all of humanity is trapped in a mental prison-cell wherein preconceived and sustained thought-forms, cultivated by malevolent occult circles through a psycho-emotional mechanism, subconsciously mold every opinion of the masses on a daily basis. This means that all of our dreams and thoughts are not truly our own, and that humankind relinquished the power of its

---

<sup>4</sup> Auric energy refers to the subtle, vibrant electromagnetic field that surrounds the physical body of living beings, acting as a mirror of their emotional, mental, and spiritual state.

<sup>5</sup> In Mesopotamian mythology, the term Anunnaki (Sumerian/Akkadian), Anu (ruler of Nibiru)", means 'Those who came from Heaven to Earth'.

own thought and ceased to dream long ago. In essence, all our dysfunctional thought patterns--and dysfunctional they are--primarily contribute to fueling a very low-vibrational egregore<sup>6</sup> that feeds the anti-Christ elements who sit atop the real power structures, hidden behind the scenes of the political baits brought to the forefront. We're here speaking of the dark factions of the very physical fallen beings of the Luciferian rebellion. And they are indeed among us, hidden yet in plain sight, and their perceived success stems solely from the ignorance and apathy of the races that populate the surface of Earth. This is a major source of most of the diseases and frustrations in this world. Therefore, it is undeniably logical that when karma is released, the machinery dismantled, the energetic grid recovered, what was lost is restored to its rightful place, and the individual regains his wholeness.

During the transformation in point, there is more fluid circulating through the physiological system due to the increased number of carrier cells<sup>7</sup> needed to facilitate the regeneration and detoxification of a crystalline system, hence the growth of a more suitable heart.

Sometimes, ascending humans find they have what appears to be "high blood pressure." The fact is that a crystalline structure has higher blood pressure because there are more ventricles pumping blood and more fluid to pump, so you should know you do not need to worry about these things. If healthcare professionals understood what was going on--but they don't and never will, given the obscure nature of the medical profession--they would certainly be less concerned by symptoms of this kind observed in some people. Therefore, the individual should learn to trust his body, guided by his mind, throughout the process.

**Procreation, for instance, should not require menstruations in women. Menstrual periods are a loss of nutrients and fluids that is not necessary for a crystalline structure. Procreation was once triggered by conscious intent. Changes in the expansion of embodied consciousness allow the individual to have conscious control over it. Therefore, there will be no production of eggs when there is no intent to conceive a child. Only when there be intent will eggs then be produced as needed.**

The presence of the death hormone in all types of meat commands to become vegetarians. When any animal or fish dies, the death hormone is released into every organ, muscle, and system throughout the body form. This hormone seeps into the muscles and fat we consume when eating meat. Furthermore, there are other serious forms of pollution that contaminate the entire food chain, including

---

<sup>6</sup> An egregore is a "thought-form" or a collective psychic entity, born from the concentration, emotions and beliefs shared by a group of individuals.

<sup>7</sup> Carrier cells, often called stem or progenitor cells, are undifferentiated cells capable of self-renewal and differentiation into specialized cells (blood, fat, bone) to repair or regenerate tissues.

plants and so-called seafood. We simply need to become wiser in how we feed selves, our eating habits.

Meat addiction is best understood in light of the death hormone. This hormone numbs the pain in which most humans exist at the level of two strands DNA. Perhaps this is why it has been so difficult for the human species as a whole to give up this need to consume flesh, even though all the nutrients necessary for maintaining health are readily available in plants in higher quality at this point in history.

Now, the plan for ascension will allow the gradual transmutation of the death hormone system into a new hormonal system of joy. The hormone of joy is similar to what happens in the physical form when doing exercises. Doing exercises creates endorphins that allow the body to feel anchored, relaxed, and "happy." But all of this is primarily a mind exercise that creates and nurtures the desired thought until it becomes a reality within one's being.

The digestive system, indeed the whole body system, undergoes several phases of resurrection in the ascension. Enzymes become increasingly capable of breaking down the nutrients we consume, especially proteins, soy and beans, etc. Therefore, through ascension, we can find that allergies simply disappear over time. All food allergies are related to an inability to break down a particular substance in digestion, most of which are introduced into our diet through genetic manipulation of food.

So much for a brief summary of what happens, among other things, on this conscious path back to the Divine within anyone individual. And this is within the reach of all who make it their choice; and understanding Sexuality and its Function lies at the core of it all.

In the following pages, you will find several techniques you can choose using of to achieve the aforementioned goals. And the results will be there if you are truly committed.

## Instructions For The Kundalini-Marakaba Activation Exercise

### Protocol One

First point, you must learn and memorize the series of statements and commandments highlighted in bold in the various points that follow, which clarify your intent in this process--that is, ultimately, union with the Divine Presence within you.

The second point is that the entire exercise must take place in the silence of one's being, meaning that all commandments are issued in thought or through silent utterances within one's heart. Communication with the Creator-God within each one individual must always take place in what is called the Zero Stillness or the Stillness of the Spirit-Soul. That's how the decentration into Stillness, the effectiveness and purity of the connection, is achieved.

1-- Put yourself in a lying position (at first, afterwards you can easily move to other positions with ease).

2-- Practice a series of yogic breathing to raise body vibration.

**Rhythmic breathing:**

**Breathe in deeply for 6 seconds; hold for 6 seconds; Breathe out to empty lungs for 6 seconds and hold for 6 seconds.**

**Continue for about 3 minutes.**

3-- Come back to normal breathing and simply observe without interfering.

Then make silently in your heart the following statement:

**I invite you my guides and counselors in spirit in service unto the One Light to join me and assist in the process.**

Thereafter, in silence, say this:

**I ask that the Creator's Shield of Light be put around me for love, wisdom, protection and support.**

Then follows, still in silence, this commandment:

**I command all the negative energies and entities to withdraw from my space and cease to exist in the name of Creator Source of Light.**

4-- Emit by focusing on the Divine Presence in your heart the intended purpose.

Repeat mentally the next:

**My intent, Mighty Divine Presence, is to activate and raise the Kundalini along my spine to nourish and illuminate all my spiritual dwelling (Marakaba) for a permanent connection and fusion with my Divine Self.**

Then you declare silently the following:

**My intent is to have Joy, Beauty, Eternal Youth and Immortality guided by and in Divine Wisdom and Truth.**

**Father, my will is that only Your Will be done in all things and for all things.**

5-- Connect to the Divine Source at the center of All Creation and to the Heart of the Earth.

6-- Use masturbation to activate the Life/Sexual energy and reach orgasm.

7-- At orgasm deeply inhale and block by squeezing the anus as you mentally command the Life force (Kundalini) to ascend from the base of the spine to the heart and continue to the 13<sup>th</sup> Chakra (that of the Higher Self) located outside the body about 5 cm above the head.

From there the energy is projected to the God-Source and returns to you abundantly in an unceasing flow.

8-- The rise of the sexual life force will cause the heart to beat faster (be fearless the process is normal and the Divine Being within is in control)

9-- Repeat the process as much as possible to attain powerful orgasms that will rebalance and heal the individual Being and beyond the collective Being, Mother Earth.

10-- Send your thoughts to extend your Soul-Marakaba to encompass the entire Earth and the Universe.

## Meditation Technique

### Protocol Two

1. Put yourself in a lying position on your back (at first, after you can easily move to other positions with ease).

2. Practice a series of yogic rhythmic breathing to elevate the vibration of the body.

Breathe deeply for 6 seconds; block for 6 seconds; Exhale expelling air from the lungs for 6 seconds and block for 6 seconds.

Continue for about 3 to 4 minutes.

3. Return to normal breathing and simply observe without interfering.

Then make silently in your heart the following statement:

**I invite my guides/angels and counselors in spirit in service unto the One Light to join me and assist in the process.**

Thereafter, in silence, say this:

**I ask that the Creator's Shield of Light be put around me for love, protection and support.**

Then follows, still in silence, this commandment:

**I command all the negative energies and entities to withdraw from my space and cease to exist in the name of the Creator Source of Light.**

4. Emit by focusing on the Divine Presence in your heart the desired intent.

Repeat mentally in silence the next:

**My intention, Divine Presence, is to activate and raise the Kundalini along my spine to nourish and illuminate all my spiritual dwelling (Marakaba=aura) for a permanent connection and fusion with my Divine Self.**

Then make the next statement still in silence :

**My intention is to have Joy, Beauty, Youth and Immortality guided by and in Divine Wisdom and Truth.**

**Father, my will is that only Your Will be done in all things and for all things.**

5. Stay calm, connect to the Divine Source at the center of All Creation and to the Heart of the Earth.

6. Let your daily earthly thoughts evaporate and let your Divine Presence within your heart take control and instruct you.

The two techniques just detailed are aimed at the same results except that the first involves intentional sexual stimulation with the help of masturbation to reach a fast orgasmic frequency that will be propagated powerfully throughout the body and beyond, the whole spiritual dwelling, that is to say the MARAKABA.

It allows rapid evolution in the process of controlling ejaculation at orgasm, be it with a male or female human, and exploring your own sexuality self-sustainingly with your Divinity in the intimacy of your bedroom.

To achieve these goals, sexual intercourse in the mated couple must be set aside by mutual agreement, allowing each partner to derive greater fulfillment from this form of sexual exploration aimed at self-knowledge--a way that ultimately leads one back unto self within the Unconditional Love we are meant to fully embody before we can reach out to others with this much-sought and misunderstood Love.

Only then will Love, true Love, return in Human relationships.

## The 7 Divine Rays of Life

During some meditation sessions, you can call in one by one the 7 Rays of Life for an energetic cleansing of your whole being and living space, according to your needs. This is not necessarily mandatory, but it is necessary to be aware that the Rays of Life exist and work with us whenever we invoke the Divinity in a specific intent. The intent alone suffices to activate help from these rays.

Each Ray is governed by a COHAN, a teacher, who is the master of the integrity of the energy.

An Archangel is responsible for the distribution of the energies of this Ray and angels are in this service under his administration.

What is required at this level is to just visualize more or less the proper color coming down and filling one's entire multidimensional being according to the issue one wishes to address and invoke at the same time the Archangel and Angels attached to the service of the required energy and express intent as to what one wishes to see manifested.

After which you maintain a while the visualization and imagine the action actually occurring. Then move on to the next Ray.

Below is an overview of the administration of the seven (7) Rays and their functions.

**The Blue Ray** is led by Master El Morya and Archangel Michael. It is that of Divine Will, Leadership and Direction.

**The Violet Ray** is led by Master Violinio Germain and Archangel Tsadkiel. It's that of Transmutation, Transcendence, Mediation and Freedom.

**The White Ray** is led by Master Serapis Bey and Archangel Gabriel. It is that of Purity of Intent, Creativity, and Clarity.

**The Ruby Ray** is led by Lady Nada and Archangel Uriel. It is that of Inner Peace, Love, and Balance.

**The Yellow Ray** is led by Master Lanto and Archangel Jophiel. It is that of Wisdom, Contemplation, High Thoughts.

**The Pink Ray** is led by Master Paul the Venetian and Archangel Camael. It is that of Unconditional Divine Love.

**The Green Ray** is led by Master Hilarion and Archangel Raphael. It's one of Spiritual Health and Prosperity.

*AT THE END OF THE CALLING IN OF THESE RAYS AND THEIR SERVANTS, REMAIN IN THIS MEDITATIVE STATE SIMPLY KEEPING THE FOCUS IN YOUR HEART.*

### **How to Get Divine Instructions**

The following is one approach, among many others, to obtaining instructions from your Inner Divine Being and your Guides/Angels, should need be. Everyone can learn and practice this. It only requires complete trust in the process.

If you attest to what you "see" or feel, this increases your trust and helps you evaluate your progress.

Sit in a quiet place where you will not be disturbed.

Imagine a ray of white light emanating from the Creator-Source at the heart of The Creation entering your crown chakra, running through your body and down toward the Earth's core.

Then imagine the ray returning in the same way and completing a circuit.

Command the Light to circulate automatically and as fast as possible.

Request that you see clearly and stay objective.

Cleanse self and the space around you by commanding the evil energies to vacate the place, your energetic space, and cease to exist in the name of Creator-Source, The ONE.

Ask your question and see what images or information are sent.

If you are not sure what you are seeing or is happening, do not jump to conclusions.

Ask these questions mentally about a specific situation you need to clarify:

**WHAT DO I NEED TO KNOW?**

**WHAT DOES THAT MEAN ?**

**HOW CAN IT BE RESOLVED?**

In any case, repeat these questions and others possibly again and again until you get clear and unambiguous answers within your Mind.

This is not the only way. YOU can develop your own. This can be just a starting point. See what works for you and determine your own path.

## Reprogramming The Subconscious

The technique of Reprogramming the Subconscious Mind is one that makes use of the efficient tool of hypnosis or most certainly self-hypnosis to reach the subconscious and reprogramming it in order to move toward an enlightened mastery of that part of the Soul which eludes the vast majority of mankind.

The Subconscious is that much more powerful part of our Trine Body, in relation to our embodied consciousness, that plays in loop recordings of thought-patterns impacting our daily life one way or another. These patterns which, most often, into our life bring about unfortunate events, and fortunate ones on other occasions, are what we call karma, which is made up of misunderstandings of our past and present lives that brought about some perception-feeling-thought scenarios misaligned or unbalanced. The opposite of karma being dharma, namely the enlightened, balanced parts of the individual or collective subconscious.

These energy patterns always present in our energetic bodies from life to life continue to attract in our journey some life lessons until we have grown and got it all figured out. This realization ends up rebalancing things and freeing up space for a lot more Divine Light within. But this mode of progression of automatons being corrected by painful life experiences is slow and burdensome. Hence the relevance of this efficient Divine tool that is self-hypnosis that assists in making giant leaps in our incarnational journey.

This, then, is a technique that provides with ability any one individual who has come into understanding of what the workings of Life are, to enter into his/her subconscious any recording-program intended for the improvement of the living conditions.

With the help of positive statements, one can choose to work on any facet of one's personality. Of course, to get there and have a greater impact upon the subconscious, one must already have some idea of the intended purpose.

Positive statements are great tools that can help ones overcome fear, build trust, develop thoughts of abundance and more. They must always be formulated in present tense and be positive. No negative phrases such as "I am not", "I do not want to do" and others.

The core idea is that the affirmation changes our thoughts and emotions into something more positive, so we feel more confident, happy, secure, and prosperous, no matter what state we are trying to reach.

First we ask ourselves about the specific goal we want to achieve in our life?

Maybe would we like to improve our health ? Or maybe eventually have more confidence? Lose weight or quit smoking ? Connect more easily to our Divine intuition?

Whatever the purpose, know that you alone have the power to make it happen!

So choose a goal that will suit you and ultimately help you become a better person. The person you want to become.

Once you have found your goal, start working on it and do not stop until you achieve it. Practice self-hypnosis and continue with meditation sessions as explained in the previous pages by fueling these same positive thoughts among others in addition to intents recommended for the work of intent with God until you have achieved your goal.

Make it a habit to always work with one goal at a time during your self-hypnosis sessions. It's a lot easier in this kind of work to be successful when you focus entirely on one goal.

It is by repeating your positive statements several times a day that you will succeed in implanting and sealing the new idea in your subconscious.

The method is as follows:

You write a series of affirmative phrases that relate to your goal.

You learn to memorize them.

Then put yourself in a meditative position with gentle meditative music without lyrics and preferably that soothes your Soul. (Searching on the Net on YouTube). The use of headphones can facilitate the focus.

Take some rhythmic Yogic breaths, as already explained.

Then make silently the following statement:

I invite you my guides and counselors in spirit who serve God of Light to join me and assist in the process.

Thereafter, in silence, say this:

I ask that the Creator's Shield of Light be put around me for love, wisdom, protection and support.

Then follows, still in silence, this commandment:

I command all negative energies and entities to vacate my vibrational space and cease to exist in the name of the Creator Source of Light.

At the end, state, focusing on the Divine Presence in your heart, the desired intent, still in silence :

My intention, Mighty Divine Presence, is to be in communion with You as I restore harmony and balance into my spiritual dwelling for a lighted life journey.

Then connect to the Divine Source, the center of All Creation, and to the Heart of Terra-Urantia, Mother Earth.

Stay calm for a while and when your daily earthly thoughts have evaporated leaving you in an altered state closer to the Divine, you begin to recite in a slightly audible voice the affirmations prepared and memorized in a repetitive manner for a period of time of about 7 to 10 minutes.

Thereafter you stop and stay in this communion for a while before thanking your Divine Self and all aides for their assistance.

Gently come back to you and get up.

When you have started this exercise, you ought to be doing it at least once or if possible several times a day for 30 days at a minimum without interruption. If there is an oversight during these 30 days, you must start all over again until it is done exactly as indicated, that is, at least 30 days in a row.

To assist ones, here are some positive affirmations prepared regarding certain areas of your life.

## Positive Statements

### Positive Statements for Manifesting Health

- I AM JOY, BALANCE AND HARMONY.
- MY WHOLE COMMUNAL TRINE BODY FUNCTIONS IN A PERFECTION OF ETERNAL COSMIC YOUTH.
- HARMONIOUSLY DIVINE ARE THE FORM, HEIGHT AND WEIGHT OF MY BODY.
- I AM PERFECTLY THAT WHICH I AM ON ALL LEVELS OF MANIFESTATION UP TO THE CREATOR-SOURCE.

### Positive Statements for Inner Awakening

- I AM THAT WHICH I AM, I AM THAT WHICH I THINK, FREE AND SOVEREIGN.
- I THINK THAT WHICH I SAY, I DO THAT WHICH I THINK.
- I ALWAYS KNOW WHICH ACTIONS TO TAKE TO REACH MY GOALS DIVINE.
- I AM IN PERFECT ALIGNMENT WITH MY INNER WISDOM AND I AM ONE WITH THE DIVINE.

## Substantial Summary

We have now reached the conclusion of this exercise, which has allowed shedding as much light as possible on the prime principle at the heart of the most fundamental principles of Creation-Life as perceived by humankind. At this stage, a final substantial summary is needed to help even the simplest mind grasp the whole in a few simple, clear, and relevant sentences.

At the origin of the creation of all life lies the One, sexless Creation-Idea. The setting in motion of a creation-idea is achieved through thought. The thought process is what is called polarization or, in other words, the sex principle. Thus, the creation-idea is one, resting in zero stillness, and its manifestation is dual, giving rise to motion. There is life where there is motion, and when motion ceases, all life returns to its zero of stillness.

The One Thinker is The One Creator, The Nameless One, The ONE. The One Idea of the Creator is what is called Creation. Manifest Creation means Thought-Creation, namely the One Idea, the indivisible-undivided, divided into multiple pairs of inversely conditioned idea-creations that simulate motion. The Idea-Creation is sexless, and the Thought-Creation is sexed.

The creation called Man-Human is one of the myriad ideas, arising from the Creator's Idea-Creation, conceived in His imaginations. The spirit of the creation-Man is a child of that of His Creator, THE ONE. By logical deduction, Man conceives his reality in his thought imaginations, in the image of His Creator.

The Laws of Creation are immutable. The logical implication is that as above so below; in other words, the infinitely large is like the infinitely small, the immaterial is like the material, on Earth as in Heaven.

Since thought process, synonymous with sex principle, is the sole principle at the core of creation and life, what occurs in the physical body must correspond to what occurs in the spirit-soul in the image of the Creator-Creation. To act otherwise proves the manifestation of a disconnect, a dichotomy. Thus, the physical sexuality of the human being--both with oneself and in relation to the opposite sex--must integrate the universal reality of the workings of life. It is from this perspective that relations between the races upon Earth must be approached, particularly in terms of sexual interactions.

Only in this way will order, harmony, and purity reign once again within and among the human races and civilization as a whole.

Divine Love, the eternal, is what occurs when the two poles of the divided pair--father-mother, male-female--are in equal giving and receiving. This is what the Law of

the One, or Law of Balance, or Balanced Rhythmic Interchange, signifies. Giving neither implies nor expects receiving; rather, it is sustained and balanced by an equal regiving. Equal giving-regiving renders every manifestation eternal to the will of the creator of that reality. But when this law of balance is not at the heart of the created thing, it carries and nurtures within itself the seeds of its own destruction. It eventually dies despite the egotistical will of its creator.

The nature of what is called Love is best explained relying upon the oneness of Life within Creation. If there is only one God-Being fragmented into a myriad of apparent beings, then it logically follows that giving to another is giving to self. Consequently, giving does not require receiving, since giving to one implies giving to all, including self, within Creation. This better explains the law of equal giving and regiving, for one always receives in proportion to what one gives. Any other manifestation that does not align with this universal principle is Loveless, un-Loving. This is the sad reality that prevails upon our Mother Planet.

All of this leads us to put the focus on the thought process, which must thus undergo a radical transformation, the goal being to regain control of the power of our thoughts. For thoughts are the foundation of all creation.

And to achieve this, humankind must correct his path in a direction that will lead him back to his prime abode, toward the Mighty Divine Presence within, which alone has the power to adjust his thoughts. The ego-driven will cannot do this and never will. To put it plainly, one must place one's will in the hands of the Creator-God.

There is only one approach that effectively allows man to commune with his Creator: Divine Meditation. For true Divine communion takes place in the stillness of one's soul and heart. Loud prayers constitute a stratagem of misleading employed by religions and mass-manipulation cultures of this world lost in rebellion.

Since the Sex Principle is synonymous with the thought process, the perspective from which human beings perceive Sexuality is therefore in great need of adjustment. And since the latter falls exclusively within the purview of the Thought Adjuster--the Divine spark within each person--the choice of daily Divine communion is imperative for any candidate for resurrectional awakening, which inevitably involves thought transformation.

This process inexorably leads to the rising of the consciousness pattern of perception-feeling-thought regarding Life as a whole. From this moment on, everything becomes possible without limit through expansion into the High Cosmic Christ Consciousness, a path leading to conscious oneness with the Creator Father. This leads the being to progress to the point where changes brought about in his consciousness become manifest in his physical body. At this stage, he becomes master

of his life and can alter any undesirable circumstance and improve what needs to be improved.
